

NC House District 23: Edgecombe and Wilson Counties

High Speed Internet in Census Tracts

DSL Availability is reported by WIRECENTER. Wirecenters do not follow county OR census tract boundaries. There may be several census tracts in one wirecenter. Likewise, a single tract may be part of several wirecenters.

The proper interpretation of this map is that a specific tract is covered by a wirecenter that has x% DSL availability based on representative color.

DSL Availability 2006

- 0% - 49%
- 50% - 69%
- 70% - 89%
- 90% - 100%
- 3-Mile Range for DSL
- Cable
- Census Tract
- Municipal Boundaries
- Lakes, Rivers
- Combined Restricted Land

Numbers in BLUE indicate the number of housing units in the entire Census Tract.

Source: DSL data and Central Office data supplied by Service Providers. No data provided for remotes.
