

§ 160A-298. Railroad crossings.

(a) A city shall have authority to direct, control, and prohibit the laying of railroad tracks and switches in public streets and alleys and to require that all railroad tracks, crossings, and bridges be constructed so as not to interfere with drainage patterns or with the ordinary travel and use of the public streets and alleys.

(b) The costs of constructing, reconstructing, and improving public streets and alleys, including the widening thereof, within areas covered by railroad cross ties, including cross timbers, shall be borne equally by the city and the railroad company. The costs of maintaining and repairing such areas after construction shall be borne by the railroad company.

(c) A city shall have authority to require the installation, construction, erection, reconstruction, and improvement of warning signs, gates, lights, and other safety devices at grade crossings, and the city shall bear ninety percent (90%) of the costs thereof and the railroad company shall bear ten percent (10%) of the costs. The costs of maintaining warning signs, gates, lights, and other safety devices installed after January 1, 1972, shall be borne equally by the city and the railroad company. The maintenance shall be performed by the railroad company and the city shall pay annually to the railroad company fifty percent (50%) of these costs. In maintaining maintenance cost records and determining such costs, the city and the railroad company shall use the same methods and procedures as are now or may hereafter be used by the Board of Transportation.

(d) A city shall have authority to require that a grade crossing be eliminated and replaced by a railroad bridge or by a railroad underpass, if the council finds as a fact that the grade crossing constitutes an unreasonable hazard to vehicular or pedestrian traffic. In such event, the city shall bear ninety percent (90%) of the costs and the railroad company shall bear ten percent (10%) of the costs. If the city constructs a new street which requires a grade separation and which does not replace an existing street, the city shall bear all of the costs. If a railroad company constructs a new track across at grade, or under, or over an existing street, the railroad company shall pay the entire cost thereof. The city shall pay the costs of maintaining street bridges which cross over railroads. Railroad companies shall pay the cost of maintaining railroad bridges over streets, except that cities shall pay the costs of maintaining street pavement, sidewalks, street drainage, and street lighting where streets cross under railroads.

(e) Whenever the widening, improving, or other changes in a street require that a railroad bridge be relocated, enlarged, heightened, or otherwise reconstructed, the city shall bear ninety percent (90%) of the costs and the railroad company shall bear ten percent (10%) of the costs.

(f) It is the intent of this section to make uniform the law concerning the construction and maintenance of railroad crossings, bridges, underpasses, and warning devices within cities. To this end, all general laws and local acts in conflict with this section are repealed, and no local act taking effect on or after January 1, 1972, shall be construed to modify, amend, or repeal any portion of this section unless it specifically so provides by express reference to this section.
