

**§ 87-43.3. Classification of licenses.**

(a) An electrical contracting license shall be issued in one of the following classifications:

- (1) Limited, under which a licensee shall be permitted to engage in a single electrical contracting project of a value, as established by the Board, not in excess of one hundred thousand dollars (\$100,000) and on which the equipment or installation in the contract is rated at not more than 1,000 volts. The limited classification and any special restricted classifications shall require no more than 3,000 hours of experience, of which, no less than 2,000 hours shall consist of primary experience gained by direct installation of electrical wiring and equipment governed by the National Electric Code.
- (2) Intermediate, under which a licensee shall be permitted to engage in a single electrical contracting project of a value, as established by the Board, not in excess of two hundred thousand dollars (\$200,000). The intermediate classification shall require no more than 5,750 hours of experience, of which, no less than 5,000 hours shall consist of primary experience gained by direct installation of electrical wiring and equipment governed by the National Electric Code.
- (3) Unlimited, under which a licensee shall be permitted to engage in any electrical contracting project regardless of value. The unlimited classification shall require no more than 9,000 hours of experience, of which, no less than 8,000 hours shall consist of primary experience gained by direct installation of electrical wiring and equipment governed by the National Electric Code.

(b) An electrical contracting license shall be issued in such other special Restricted classifications as the Board may establish from time to time to provide, (i) for the licensing of persons, partnerships, firms or corporations wishing to engage in special restricted electrical contracting, under which license a licensee shall be permitted to engage only in a specific phase of electrical contracting of a special, limited nature, and (ii) for the licensing of persons, partnerships, firms or corporations wishing to engage in electrical contracting work as an incidental part of their primary business, which is a lawful business other than electrical contracting, under which license a licensee shall be permitted to engage only in a specific phase of electrical contracting of a special, limited nature directly in connection with said primary business.

(c) The Board may establish appropriate standards for each classification, such standards not to be inconsistent with the provisions of G.S. 87-42. The Board may, by rule, modify the project value limitations up to the maximum amounts set forth in this section for limited and intermediate licenses no more than once every three years based upon an increase or decrease in the project cost index for electrical projects in this State.
