§ 90-414.4. Required participation in HIE Network for some providers.

(a) Findings. – The General Assembly makes the following findings:

(1) That controlling escalating health care costs of the Medicaid program and other State-funded health services is of significant importance to the State, its taxpayers, its Medicaid recipients, and other recipients of State-funded health services.

(2) That the State needs timely access to certain demographic and clinical information pertaining to services rendered to Medicaid and other State-funded health care program beneficiaries and paid for with Medicaid or other State-funded health care funds in order to assess performance, improve health care outcomes, pinpoint medical expense trends, identify beneficiary health risks, and evaluate how the State is spending money on Medicaid and other State-funded health services.

(3) That making demographic and clinical information available to the State by secure electronic means as set forth in subsection (b) of this section will, with respect to Medicaid and other State-funded health care programs, improve care coordination within and across health systems, increase care quality for such beneficiaries, enable more effective population health management, reduce duplication of medical services, augment syndromic surveillance, allow more accurate measurement of care services and outcomes, increase strategic knowledge about the health of the population, and facilitate health care cost containment.
