Chapter I: Brownfields Program

A. Executive Summary

This report to the General Assembly is required by the Brownfields Property Reuse Act of 1997 (G.S. 130A-310.40) and describes the activities and status of the N.C. Department of Environmental Quality's (DEQ's or department's) Division of Waste Management (division or DWM) Brownfields Program (program) for the period of Oct. 1, 2017 through Sept. 30, 2018, i.e., federal fiscal year (FFY) 2018. The program is pleased to report continued success in the state's efforts to revitalize and safely reuse brownfields properties.

Program Output

The Brownfields Program produced 56 finalized brownfields agreements during the reporting period, bringing the total number of finalized agreements since its inception to 520. For the current reporting period, totals for the measures tracked by the program are:

- Program applications received: 78
- Brownfields agreements finalized: 56
- Acres of Brownfields revitalized to safe, productive reuse: 973
- Estimated committed capital investment for projects completed during FFY 2018: \$2.04 billion

All of these benefits are produced without any state-appropriated funds. The Brownfields Program operates on fees from the prospective developers and a cooperative agreement from the U.S. Environmental Protection Agency. Since the program began, it has facilitated more than \$17 billion in estimated private investment in the redevelopment of brownfields properties across North Carolina, without cost to state taxpayers.

Outreach to Local Governments

Working in partnership with local governments to advance redevelopment projects in their communities has led to continued success for those local governments applying for and winning competitive brownfields grants offered by the EPA for the assessment and cleanup of brownfields properties. A total of \$3.4 million in grants was awarded to 11 North Carolina local governments for the EPA's 2018 grant cycle. These include Columbus County (\$300,000), the City of Durham (\$300,000), the City of Kinston (\$195,000), the City of Lenoir (\$300,000), the City of Lincolnton (\$300,000), Piedmont Triad Regional Council (\$600,000), the City of Robbins (\$200,000), the City of Salisbury (\$300,000), the Town of Siler City (\$300,000), the Town of Spring Hope (\$300,000) and the City of Washington (\$300,000). These local governments now have funds needed to kick-start brownfields redevelopment efforts in their jurisdictions. The Brownfields Program will provide continued assistance by working with their local developers and businesses that need a brownfields agreement to gain project financing. The Brownfields Program will also continue to support the efforts of local governments in obtaining EPA grants.

The Brownfields Program also participated in several meetings of the Hometown Strong economic development efforts including those in Burke County, Lenoir County and

Pasquotank County. In doing so, the program educates local governments about the benefits of the Brownfields Program and encourages and supports their efforts to apply for EPA grants.

B. Program Background

Brownfields are abandoned, idled or underused properties where environmental contamination hinders redevelopment due to concerns about environmental liability. Redevelopment of brownfields properties has become increasingly popular as developers and local governments realize that these properties offer viable opportunities to bring economic growth, public health protection, jobs and quality-of-life benefits to cities and rural areas. The Brownfields Property Reuse Act of 1997 (BPRA) gives the Division of Waste Management the authority to enter into brownfields agreements with prospective developers that did not cause or contribute to site contamination. The BPRA modifies the environmental liability barrier for prospective developers and motivates them to bring these properties and their hindrances to the Division of Waste Management's attention. The Division of Waste Management works in partnership with the prospective developer to evaluate the potential environmental risks associated with site contamination and then negotiates a brownfields agreement stipulating the steps necessary to make the site safe for a specific intended reuse or suite of uses. The result is a redevelopment project that fuels economic growth while protecting public health and the environment.

Redevelopment projects that are undertaken via the program's brownfields agreement process, and the developers who advance these projects, enjoy several benefits. Developers work with the program to define the actions they must complete to make the property safe for the intended reuse, and lenders are more willing to make loans on these projects because the cost to complete these actions is not an open-ended proposition. Additionally, as long as developers make and maintain the site safe for the intended reuse, they receive liability protection against future state enforcement for existing contamination. The same liability protection extends by statute to lenders, tenants, occupants and future owners as long as these entities did not cause or contribute to site contamination. Finally, owners of property with a brownfields agreement have access to a special property tax exclusion whereby property tax is phased in over five years, resulting in a property tax savings of approximately 50 percent over those first five years. These tax savings can be used to offset the costs to complete the actions required by the program that make the property safe for reuse.

The BPRA allows the division to distinguish between prospective developers of brownfields properties and the polluters of those properties. Instead of mandating that the site be remediated to unrestricted use standards, the BPRA requires developers make the site safe for a specifically identified reuse. The program evaluates site contamination and identifies the potential risks that residual contamination may pose to public health and the environment. The department then determines what actions the prospective developer must take to ensure safe redevelopment. These actions can range from land-use restrictions to cleanup, or a mixture of both. In addition to holding prospective developers accountable to their agreements, DEQ reserves the right to enforce against those parties responsible for the original contamination.

The overall result is a winning scenario for both the environment and economic development. Risk reductions and cleanups are achieved at sites that could have harmed the public or

environment, and prospective developers capitalize on opportunities to redevelop abandoned properties that once had little hope for productive reuse. The public benefits are job creation, improved quality of life in the surrounding neighborhoods, local tax base expansion and contribution to the general fund. By the end of FFY 2018, an estimated \$17 billion in capital investment will have been committed to redevelop abandoned properties that afflict urban and rural landscapes.

The program also supports smart growth and sustainability, and it motivates the real estate market to recycle these sites back into to safe, productive reuse, while preserving or reducing the use of pristine or undeveloped “greenfields” property. Every project that reuses property, whether it is in an urban center or a rural area, preserves green space, reduces suburban sprawl and supports sustainable urban development. The 520 properties that have received completed agreements represent more than 9,000 acres of recycled land and, wherever possible, buildings that have historic or aesthetic value. This is, in effect, acreage that is being recycled into reuse, sparing more pristine lands from development and risk for future contamination.

C. Program Status

During FFY 2018, the program received 78 applications for projects seeking entry into the program. This compares to the 61 applications received in FFY 2017, indicating an increasing demand for brownfields agreements. During FFY 2018, the program completed 56 brownfields agreements, which is similar in output to the past few years. This similarity in number is despite staff full-time equivalent (FTE) positions being shifted from the production of agreements into the Property Management Unit. See Figure 1 below for the trends in program measurables over the last several years.

For 13 years, the program has received funding from the EPA under its State Response Program Cooperative Agreement, authorized under the federal brownfields act. This federal funding covered the period from Oct. 1, 2017 through Sept. 30, 2018 and provided a total of 6.35 FTEs to the Brownfields Program. For the Brownfields Program, this federal grant funds a core of management and technical positions. In recent years, the EPA has slowly decreased this type of funding for all states, including North Carolina. The program has been able to respond to these federal funding cuts by increasing fee funding to maintain capacity. Fee receipt funding represents a majority of the program’s funding, and now supports 13 permanent positions and one temporary position. This represents a consistent level of FTEs for the program from last year, but shows a consolidation of its previous temporary positions into permanent ones as the staff were trained to become effective brownfields project managers.

Because the program’s increased output has been so pronounced, its fee revenue remains slightly greater than its spending rate for new positions. With additional compliance assistance needed as a result of increasing numbers of brownfields agreements being completed, this revenue surplus is absolutely necessary. With senior management approval, the program will continue to judiciously hire additional fee-funded staff to serve both brownfields agreement production needs as well as post-agreement compliance assistance.

Figure 1. Brownfields Program Trends

D. Program Inventory

The Brownfields Program's inventory consists of three categories of projects, explained below.

1. Finalized Brownfields Agreements

Finalized Brownfields Agreements are those projects that have a signed and recorded brownfields agreement (or have completed the public notice phase of the brownfields process and are waiting for the completed agreement to be signed by the prospective developer). As of Sept. 30, 2018, the program has finalized a cumulative total of 520 brownfields agreements across the state, 56 of which were completed in the one-year period between Oct. 1, 2017 and Sept. 30, 2018. A list of those brownfields agreements finalized during FFY 2018 is provided in the Appendix.

2. Active Eligible Projects

Active eligible projects have been deemed eligible for a brownfields agreement under BPRA statutory criteria. Developers are working with the Division of Waste Management in some stage of data gathering, analysis or agreement negotiation. As of Sept. 30, 2018, there were 191 active eligible projects. Projects at this stage receive guidance from the Division of Waste Management as the developers gather the additional data needed to ensure protection of public health and the environment. Once site assessment is complete, the Division of Waste Management analyzes the data, evaluates risks, determines what actions must be taken to adequately address the risks, drafts and negotiates the terms of the brownfields agreement with the prospective developer, and then approves initiation of the statutory 30-day public comment period.

3. Projects Pending Eligibility

Projects pending eligibility are in the initial stage of the brownfields process as they apply for entry into the program. Sites in this category have yet to meet the statutory requirements for eligibility for a brownfields agreement. For sites in this category, the program has requested clarification or additional information from prospective developers regarding a site. Normally, developers respond to these requests for clarification, the sites are deemed eligible, and sites then quickly move into the active eligible category. As of Sept. 30, 2018, 28 sites were pending eligibility.

E. Improving Effectiveness

Leveraging Resources into Private Sector Investment

Another measure the program tracks is committed private investment facilitated by brownfields agreements. Developers provide the estimated investment figure in their application for entry into the program. The cumulative total private investment facilitated by the program from its inception is nearly \$17 billion, with \$2.04 billion of that being added by projects for which brownfields agreements were finalized this year. Generally, these investments in the redevelopment of these properties would not have happened without the liability relief provided by a brownfields agreement. Throughout its existence, the Brownfields Program has provided a high economic development value for the federal funds it uses, and it uses no state appropriation. Furthermore, the high ratio to which the

funds have been successfully leveraged into private development dollars for brownfields redevelopment is just one measure of the effectiveness of the BPRA. The economic activity and increased tax base generated by construction and subsequent use of these brownfields projects far exceeds the public funds expended by many orders of magnitude.

Planning for Evolution of Future Work

Because the program has completed very large numbers of agreements over the last few years, the need for more post-agreement work continues to rise. This includes work on compliance assistance for all 520 completed agreements as well as work that arises from new owners seeking land use changes on existing agreements or on new information regarding contaminants on properties that may affect public health. When public health protections rely on land use restrictions, a robust compliance monitoring and assistance program is an absolute must. With the substantial and sustained increase in numbers of existing brownfields agreements, the program saw a growing need to rebalance some of its expenditures toward compliance monitoring and assistance. During this year, the program created a new organizational unit designed to address all post-agreement activities that take place to manage the continued effectiveness of the land use restrictions at brownfields properties. This unit is referred to as the Property Management Unit and consists of three staff for its initial operations during this reporting period with more staff planned for next year. The new unit is responsible for all aspects of administering brownfields agreements, amending those agreements and assessing risks that may arise from new information on contaminants.

F. Fund Status

The program receives no state appropriation and exists through two funding sources: federal cooperative agreement funds and program fee receipts. All of the brownfields fees charged by the program are deposited into the Brownfields Property Reuse Act Implementation Account as authorized under the statute.

For the state fiscal reporting year from July 1, 2017 through June 30, 2018, the Brownfields Property Reuse Act Implementation Account had a beginning balance of \$2,252,333, fee receipts of \$1,519,042 and disbursements of \$1,242,987. This yields a state fiscal year ending fund balance of \$2,528,388. Table 1 below shows the fund status for the last six years.

Table 1. Brownfields Property Reuse Act Implementation Account Balances

State Fiscal Year End	Federal Fiscal Year End	Fund Balance
June 30, 2013		\$636,665
June 30, 2014		\$753,911
June 30, 2015		\$1,756,737
June 30, 2016		\$2,246,664
June 30, 2017		\$2,252,333
	Sept 30, 2017	\$2,367,497
June 30, 2018		\$2,528,388
	Sept. 30, 2018	\$2,697,560

One of the program goals was to hire personnel to increase capacity to meet demand for brownfields agreements. With declining federal grant funds, expenditures of receipt funds must increase. The increase in the fund balance in recent years has slowly been tempered with the hiring of technical staff to increase program capacity. This has allowed both an increased production capacity of the program, and through the initiation of the Property Management Unit, an ability to manage needed post-agreement activities. The continued success of the Redevelopment Now Program option and the needed capacity development in the Property Management Unit make for a sustainable and bright future for revenue/expenditure balance. However, it is clear that to meet demand and reduce the time it takes to obtain a brownfields agreement, the program should continue to use its brownfields implementation account to increase its staff capacity. This in turn will allow more brownfields agreements and will add to the economic development the program generates.

G. Further Information

For additional information on the Brownfields Program, please visit the program's website at: <http://www.ncbrownfields.org>.

Chapter II: Dry-Cleaning Solvent Cleanup Act

A. Executive Summary

As required by the Dry-Cleaning Solvent Cleanup Act (DSCA) of 1997 and amendments (G.S. 143-215.104), this report provides an annual update on activities conducted in the DSCA Program in fiscal year (FY) 2017-18. The DSCA of 1997 and its amendments created a fund for assessment and cleanup of dry-cleaning solvent environmental contamination at dry-cleaning and wholesale distribution facilities. It also authorized the program to develop and enforce rules relating to the prevention of dry-cleaning solvent releases at operating facilities.

Since the DSCA Program began, 476 sites with known or suspected dry-cleaning solvent contamination have been reported to the N.C. Department of Environmental Quality's (DEQ) Division of Waste Management (DWM). Of these, 414 have been certified into the DSCA Program.

During FY 2017-18, the DSCA Program continued to make significant progress in all aspects of program implementation. Highlights of the program's accomplishments in remediating sites, protecting human health and preventing future releases, include:

- Issuing No Further Action (NFA) notices for 14 remediated sites, with 39 additional sites identified as ready for NFA status;
- Maintaining filtration systems for four residences;
- Installing vapor mitigation systems for five residences and four businesses to protect occupants from contaminant vapor intrusion risks;
- Implementing five soil remedies at five DSCA sites;
- Conducting 372 full compliance inspections at 371 active dry-cleaners;
- Performing outreach visits to educate and assist new business owners/operators with environmental compliance; and
- Distributing nearly 500 compliance calendars to assist dry-cleaners with record-keeping requirements.

The DSCA Fund continues to be solvent with an end-of-fiscal year fund balance of approximately \$7.9 million and encumbered funds totaling \$2.5 million. The increase in the fund balance over last year is attributed to a decrease in expenditures resulting from effective cost control measures. Cost controls are being implemented to ensure that funds are available to address sites that pose greater potential risks. The program is using its resources efficiently, and expenditures are closely monitored to ensure adequate funding is maintained. Based on data regarding site cleanup costs in North Carolina and the nation, cleaning up the 414 sites that have been certified in DSCA will cost an estimated \$145 million. DEQ estimates there may be as many as 1,500 contaminated dry-cleaning sites in North Carolina. Projected costs to assess and clean up 50 percent of those sites are expected to exceed \$263 million. To ensure that the program and funding remain viable to adequately address sites certified and new sites yet to be discovered, DEQ proposed an amendment to DSCA to extend the sunset dates for the program and funding.

B. Program Activity

The General Assembly enacted DSCA to: (1) clean up contamination from dry-cleaning solvents at both retail dry-cleaners and wholesale solvent distribution sites, and (2) protect human health and the environment by preventing future dry-cleaning solvent contamination. DEQ made significant progress during FY 2017-18 in implementing the cleanup and compliance components of DSCA.

1. Site Cleanups

During the past fiscal year, DWM directed significant energy toward assessment and remediation of sites with contamination from dry-cleaning solvents. DWM continued to implement initiatives to ensure protection of human health by mitigating vapor intrusion (indoor air pollution from solvent contamination in the soil or groundwater) and providing clean water supplies to affected residents. During FY 2017-18, DWM staff and the program's three independent contractors performed the following activities:

- screened sites for imminent hazards, such as threatened water supply wells and vapor intrusion into buildings;
- abated indoor vapor hazards from contaminated soils and groundwater;
- provided temporary clean water supplies;
- conducted comprehensive site assessments delineating extent of contamination;
- remediated contaminated soil;
- remediated contaminated groundwater; and
- evaluated site risks and prepared sites for closure.

2. Sites in the Program

Sixteen new sites were certified into the program during FY 2017-18. Table 1 provides current and cumulative statistics for sites certified into the DSCA Program. A site becomes certified when a petitioner enters into an assessment and remediation agreement with DWM. Figure 1 depicts the number of contaminated dry-cleaning sites participating in the DSCA Program. A list of certified sites, along with current site status, is provided in Appendix A. Table 2 provides the distribution of certified sites by classification and operating facility size.

Rules that establish a risk-based approach to assessing and cleaning up certified sites in the DSCA Program became effective on Oct. 1, 2007. These rules and associated guidance allow program staff to determine the risk posed to human health and the environment at each site and, if necessary, to calculate the appropriate cleanup levels for soil and groundwater.

During FY 2017-18, DWM issued No Further Action (NFA) notices for 14 contaminated dry-cleaning sites in the program, bringing the total to 84 DSCA sites that have been given NFA status since the risk-based rules became effective in 2007. DWM is recommending no further action at an additional 39 DSCA sites ("Sites Pending Closure" in Table 1). The program anticipates issuing between 10 and 12 NFA notices in the upcoming

fiscal year. Preparing a site for No Further Action involves completing an assessment of the extent and magnitude of contamination, evaluating the risks posed by the contaminants, mitigating any unacceptable risks, remediating contamination as needed, ensuring stability of the groundwater contaminant plume, preparing a risk management plan, soliciting public input and recording notices to ensure that site conditions remain protective. In accordance with DSCA statutes, the program provides the proposed risk management plan and associated notices to the appropriate local governments (counties and municipalities) and announces the availability of the plan to the public through local newspapers, direct mailings to property owners on or adjacent to the contamination site and by posting a notice at the site. Table 2 below shows the number and percentages of DSCA-certified site classifications.

Table 1. DSCA-Certified Site Status (through June 30, 2018)

Certification Status	FY 2017-18	Cumulative
Contaminated Sites	18	476
Certified	16	414
Determined Ineligible	-	4
Not Certified	-	58
Certified Sites in Assessment/Remediation	291	-
Certified Sites Pending Closure	39	-
Certified Sites Closed	14	84

Figure 1: Known Dry-Cleaning Solvent Contaminated Sites in North Carolina

Table 2. Classifications of DSCA Certified Sites (through June 30, 2018)

Classifications	Number of Sites	Percentage
Abandoned Site	276	67 %
Wholesale Distribution Facility	3	1 %
Operating Dry-Cleaning Site	135	32 %
<i>Small Size (1-4 employees)</i>	70	52 %
<i>Medium Size (5 - 9 employees)</i>	38	28 %
<i>Large Size (> 10 employees)</i>	27	20 %

Table 3 provides a summary of actions undertaken to address direct threats to human health and the environment. During FY 2017-18, the division continued to supply clean water to four residences where municipal water is not available. In total, the division has provided municipal water to 64 residences and 11 businesses that have had their water supply wells impacted or threatened by dry-cleaning solvent contamination from 17 DSCA sites.

Table 3. DSCA Site Cleanup Statistics

Accomplishments	FY 2017-18	Cumulative
<i>Water Supply Provided</i>		
Municipal Water Connection - residences	-	64
Municipal Water Connection - businesses	-	11
Temporary Water Supplied - residences	4	31
Temporary Water Supplied - businesses	-	6
# of DSCA sites involved	2	17
<i>Vapor Intrusion (VI) Mitigated</i>		
VI Control System Installed - residences	5	19
VI Control System Installed - businesses	4	72
# of DSCA sites involved	7	59
<i>Active Remediation Implemented</i>		
# of DSCA Soil Remediations Implemented	5	99
# of DSCA sites involved	5	89
# of DSCA Groundwater Remediations Implemented	-	71
# of DSCA sites involved	-	51

Addressing indoor air pollution from tetrachloroethylene (PERC) releases continues to be a high priority since many DSCA sites have occupied structures on or adjacent to PERC contamination. The program has identified a number of buildings where soil and/or groundwater contamination has produced unacceptably high concentrations of PERC vapor in indoor air and required mitigation. During FY 2017-18, DWM installed vapor mitigation systems at five residences and four businesses to control unacceptable vapor levels caused by releases at seven DSCA sites. Since 2006, DWM has installed

vapor control measures at 72 businesses and 19 residences as a result of dry-cleaning solvent contamination from 59 DSCA sites.

Many DSCA sites require soil and groundwater cleanup to protect human health and the environment. To remove contaminant sources that threaten indoor air in buildings and cause further degradation of groundwater, DWM implemented soil remedies at five DSCA sites. These remedial technologies included excavation and soil vapor extraction. During FY 2017-18, the program also monitored the effectiveness of groundwater remedies at 18 DSCA sites and maintained active groundwater remediation systems at two sites. During the life of the DSCA Program, DWM has implemented 99 soil cleanup actions at 89 DSCA sites and conducted 71 groundwater cleanup actions at 51 DSCA sites.

3. Site Prioritization System

The DSCA Program requires that site cleanup disbursements be made on higher priority sites first. Data from the program's vapor intrusion investigations indicate that this type of direct human exposure is a threat at several DSCA sites. To ensure that this health concern receives appropriate attention, the program has revised its prioritization method to include potential indoor air threats. Due to the growing number of DSCA sites and the complex nature of assessing and remediating PERC contamination, the DSCA Program continues to evaluate and implement cost-efficient measures to ensure the fund's solvency.

4. Vapor Intrusion

Among states with dry-cleaning programs, the North Carolina DSCA Program continues to work at the forefront in addressing vapor intrusion issues at dry-cleaning solvent-contaminated sites. Due to the volatility of PERC, one of the most common dry-cleaning solvents, the potential for vapor intrusion exists at many dry-cleaning sites. The DSCA Program has shared its large library of North Carolina vapor intrusion data with the U.S. Environmental Protection Agency (EPA) to supplement data it uses to establish attenuation factors and screening levels. The EPA welcomed North Carolina's data from commercial structures in the southeastern United States.

An emerging issue that may affect some contaminated dry-cleaning sites involves the presence of trichloroethylene (TCE) in indoor air. Not only is TCE a chemical produced by the breakdown of PERC in the environment, but TCE is also a spotting agent in the dry-cleaning industry as well as a common solvent used in many industrial settings. At contaminated sites, health threats from volatile contaminants in indoor air are often associated with long-term (chronic) exposure to chemicals migrating from subsurface into indoor air. Recent studies along with other toxicological information suggest that short-term (acute) exposure to TCE in indoor air may raise the risk for fetal heart malformation during the first trimester of pregnancy. Staff from the division's cleanup programs, including the DSCA Program, are working with the department to develop protocols to promptly address acute exposure situations. When site data suggest that there is potential for exposure to unacceptable levels of TCE in indoor air, staff provide immediate notification and educational resources to affected parties. The DSCA Program promptly mitigates risks to indoor air quality when

dry-cleaning solvent contamination in the environment is causing unacceptable risks in indoor air.

5. Investigation of Potential New Sites

In 2007, DSCA was amended to allow the program to spend up to 1 percent of the DSCA fund balance each year to investigate active and abandoned dry-cleaning sites that the program believes may be contaminated. If dry-cleaning solvent contamination is found, the potential responsible party is given the choice of entering the program as a petitioner or allowing the site to be addressed under the division's Inactive Hazardous Sites Branch. If they choose the latter, the responsible party may be required to reimburse DSCA for the investigation costs. Under this provision, the program conducted limited investigations at 11 potential dry-cleaning contaminated sites during FY 2017-18. Since 2007, DSCA has investigated 105 sites for potential dry-cleaning solvent contamination, of which, 65 were certified into the program.

The DSCA Program continues to partner with other agencies to identify new sites and coordinate assessment and cleanup efforts to ensure effective use of state resources. Data provided by DEQ's Underground Storage Tank Section, Brownfields Program, Inactive Hazardous Sites Branch, Public Water Supply Section and municipal environmental programs reveal monitoring wells and supply wells with contaminants that may be from dry-cleaning operations. DSCA staff compare contaminated well locations to known locations of more than 2,000 active and abandoned dry-cleaning facility sites to help identify potential dry-cleaning contaminant sources. The program also shares data and coordinates assessment and cleanup activities with other DWM programs, such as the Brownfields Program and Underground Storage Tanks Section, to ensure that remedial strategies are protective and implemented effectively.

6. Identified Contamination Sites

A total of 476 sites known or suspected to be contaminated by dry-cleaning solvents have been reported to the department. DSCA has certified 414 of these sites into the cleanup program, as noted in Table 1. Appendix A lists, by county, the sites with known or suspected dry-cleaning solvent contamination reported to the department and sites certified in the program. During FY 2017-18, DSCA certified 16 new sites into the program. The program's 1 percent investigation allowance was used to identify contamination at two of the sites certified during the fiscal year. As noted above, the program anticipates that additional dry-cleaning solvent contamination sites will be discovered using the investigative allowance in FY 2018-19.

7. DSCA Contracts

The program currently manages three contracts with state-led environmental engineering firms, with a total end-of-fiscal year encumbrance of approximately \$2.5 million. The contracts establish terms and conditions under which qualified environmental engineering firms assess and remediate contaminated dry-cleaning sites in the DSCA Program.

8. Customer Service Initiatives

During FY 2017-18, the program continued to promote the DEQ mission and provide excellent customer service by making public records more accessible, providing easy access to DSCA site locations, engaging communities affected by dry-cleaning solvent contamination and sharing program updates with interested stakeholders on a regular basis. The program uses its website to provide a variety of information including, but not limited to maps, public records access, forms, rules and statutes, updates on sites of interest, stakeholder meeting information and staff contact information.

a. Public Records

Improving the accessibility to public records has been a high priority for all DWM programs. To date, all of the DSCA Program's current and legacy records have been digitized, and the frequently requested document types have been uploaded to the Laserfiche document management system. Laserfiche is available through DEQ's and DWM's websites, and allows users the ability to search for and download public records.

b. Site Location Information

The availability of site location information is important to the public and many decision makers, including property buyers and sellers, lenders, municipalities, and state and local environmental programs. The program continues to maintain location data on a web-based map viewer on the DWM website. In addition, the program has consistently supported and been involved in the development of DWM's well permitting support system, which is an online site locator tool based on ARC-GIS Online platform. The tool can be accessed at:

<https://ncdenr.maps.arcgis.com/apps/webappviewer/index.html?id=7dd59be2750b40bebfbfa49fc383f688>

c. Stakeholder Meetings and Presentations

The division continues to encourage stakeholder involvement in the DSCA Program. The existing stakeholder group is comprised of representatives from the dry-cleaning industry, environmental organizations, attorneys, environmental consultants and the public. Program representatives hold semi-annual meetings to report on accomplishments and initiatives, solicit feedback on topics that affect the program and present remediation projects of interest to the attendees.

During FY 2017-18, a DSCA Program staff member began chairing the State Coalition for the Remediation of Drycleaners (SCRD). The coalition was established in 1998, with support from the EPA's Office of Superfund Remediation and Technology Innovation. It is comprised of representatives from 13 states with established dry-cleaning remediation programs and 12 additional states with representatives who are considering developing a dry-cleaning remediation program or are managing dry-cleaner remediation under other authorities. The coalition conducts regular conference calls throughout the year to provide a forum to share and discuss program information, remediation technologies, case studies, state initiatives, or state and federal hot topics.

DSCA staff made presentations at the October 2017 and April 2018 DSCA Stakeholder meetings, October 2017 Association of Engineering Geologist's Vapor Intrusion Conference, State Coalition for the Remediation of Drycleaners teleconference in October 2017 and November 2017 Groundwater Resources Association of California Conference on Drycleaner Remediation.

C. Facility Compliance

The Environmental Management Commission is authorized under the Dry-Cleaning Solvent Cleanup Act to develop rules that operating dry-cleaning facilities must follow to prevent environmental contamination by dry-cleaning solvents. During FY 2017-18, the DSCA Program had three to four inspectors performing outreach visits, inspections and enforcement at dry-cleaning facilities and wholesale distribution facilities statewide.

In addition to the program's Minimum Management Practices (MMP) regulations, enforcement authority is delegated to the DWM for violations of applicable air quality rules. The division's Hazardous Waste Section has granted authority to the DSCA Program's Compliance Unit to inspect dry-cleaners for compliance with the federal Resource Conservation and Recovery Act (RCRA) Hazardous Waste regulations. This allows one program in DEQ to ensure compliance with all environmental regulatory requirements and gives dry-cleaners and the public a single DEQ point-of-contact for compliance questions or concerns.

Educational Assistance Visits

During FY 2017-18, DWM inspectors conducted seven educational assistance visits at active dry-cleaning facilities. To date, DSCA inspectors performed 802 educational outreach visits at active dry-cleaners – many of which had not previously been inspected by a DEQ program. This outreach educates owners and operators regarding the MMPs, hazardous waste and air quality regulations. Inspectors also use these visits to thoroughly document all observed compliance issues.

Inspections and Enforcement

The DSCA Program conducts unannounced, full compliance inspections at dry-cleaning facilities and wholesale distribution facilities to ensure that dry-cleaning facilities are compliant with all applicable regulations. In setting inspection priorities, the program considers multiple factors including facility specific compliance history, business owner/operator changes, emerging solvents or equipment and regulatory changes at the federal, state or municipal level.

During FY 2017-18, DSCA Program staff conducted 372 full inspections at 371 active dry-cleaning facilities. Common violations identified were failure to install spill containment under dry-cleaning machines and waste solvent storage areas, failure to seal waste solvent containers, failure to inspect dry-cleaning equipment and failure to record and maintain National Emission Standards for Hazardous Air Pollutants record-keeping logs.

To be eligible to participate in the DSCA cleanup program, all operating dry-cleaning facilities and wholesale distribution facilities must be compliant with the DSCA MMPs. During FY 2017-18, DSCA Program staff inspected 11 active facilities seeking entry into

the cleanup program and 55 certified active facilities to ensure that cleanup funds are being used at facilities where owners and operators are diligent about preventing future dry-cleaning solvent releases.

Additional Compliance Outreach

The DSCA Compliance Unit continues to evaluate and implement enhancements to improve compliance rates among the regulated community.

Since 2007, the DSCA Program has produced a PERC compliance calendar that provides all applicable rules, recordkeeping, guidance and reference information in one document for the convenience of facility owners and operators. The calendar has received positive reviews from North Carolina dry-cleaners and industry officials in other states, where it has been praised for its comprehensive scope and functionality.

Since the 2016 calendar year, the program has also developed and produced a petroleum solvent compliance calendar for cleaners who operate dry-cleaning machines that use regulated petroleum solvent. The calendars include instructions in Spanish and Korean. The program staff mailed or hand-delivered approximately 270 PERC calendars and 220 petroleum calendars to dry-cleaning facilities statewide for 2017.

The DSCA Program also employs an inspector who speaks Korean fluently and translates outreach materials and regulations to better serve North Carolina's regulated community. Reducing language and cultural barriers helps improve communication and compliance among Korean-speaking dry-cleaning owners and operators. The Korean-speaking members of the dry-cleaning community have responded very positively to the DSCA Program's efforts to improve communication. The program continues to evaluate ways to better enable compliance among all North Carolina dry-cleaners and wholesale distribution facilities.

D. Program Financial Status and Projections

1. Fund Receipts and Disbursements

The primary funding sources for the dry-cleaning solvent cleanup fund are a tax on dry-cleaning solvents, the state portion of the current sales tax on dry-cleaning and co-payments from petitioners participating in the cleanup program. Disbursements consist primarily of payments to the program's independent contractors for site assessment and remediation and program administration costs. DSCA Fund receipts and disbursements for the FY 2017-18 and for the life of the DSCA Program are shown in Table 4.

Table 4. DSCA Fund through FY 2017-18

<u>Receipts</u>	<u>FY 2017-18</u>	<u>Duration of Program</u>
Solvent Tax Revenue	\$ 171,821.39	\$ 12,070,379.46
Sales Tax Revenue	\$ 8,411,479.31	\$ 119,873,871.17
Petitioner Payments	\$ 98,093.33	\$ 1,731,021.74
Miscellaneous (investigation)	\$ 0	\$ 919.93
Rebate	\$ 0	\$ 28,870.11
Interest	\$ 0	\$ 7,522,262.17
TOTAL	\$ 8,681,394.03	\$ 141,227,324.58
 <u>Disbursements</u>		
Dept. of Revenue ¹	\$ 0	\$ 57,272.02
Petitioner Reimbursements	\$ 0	\$ 1,963,991.89
Contracts	\$ 5,916,397.08	\$ 103,777,524.16
Well Permit Fees	\$ 59,000.00	\$ 464,010.00
Hazardous Waste Fees	\$ 98,700.00	\$ 1,531,703.41
Transfer to Inactive Hazardous Sites	\$ 0	\$ 400,000.00
Transfer to Green Square Project	\$ 0	\$ 1,291,035.00
Transfer – Budget Shortfall	\$ 0	\$ 6,475,812.93
DEQ Administration	\$ 1,355,357.45	\$ 17,347,992.77
TOTAL	\$ 7,429,454.53	\$ 133,309,343.52
Fund Balance		\$ 7,917,981.06
Funds Encumbered in Contracts		\$ 2,564,690.98

¹ Represents the actual amount charged by the N.C. Department of Revenue for its expenses. The Department of Revenue is authorized by DSCA to charge no more than \$125,000 per year.

2. Estimated Future Assessment and Remediation Expenditures

During FY 2017-18, fund expenditures directly related to implementation of DSCA decreased from the previous fiscal year (see DSCA-Related Disbursements in Table 5 and Figure 2). As the fund balance decreased, the program continued to implement control measures to ensure that funds are available to address sites that pose greater potential risks. The DSCA Program closely monitors expenditures to ensure adequate funding is maintained to assess all sites, perform mitigation and remediation activities when needed and move sites toward closure. Site work expenditures have reduced the fund balance from its peak of \$37.6 million in 2008 to a low of \$5.6 million in 2016. DSCA Fund receipts for the past nine years have been relatively stable, ranging between approximately \$8 million and \$9 million per year. Consistent with prior years, the total FY 2017-18 receipts from the solvent tax, sales and use tax and petitioner payments remain stable, and are only slightly (3.4 percent) higher than the total receipts for FY 2016-17.

Table 5. Historic DSCA Fund Statistics

Fiscal Year	Receipts	Total Disbursements	DSCA-Related Disbursements	Fund Balance
FY 03-04	9,487,233.94	489,024.96	489,024.96	13,547,987.50
FY 04-05	9,660,612.84	1,806,911.93	1,806,911.93	21,401,688.41
FY 05-06	9,913,615.29	2,126,835.62	2,126,835.62	29,188,468.08
FY 06-07	10,687,669.06	4,184,051.63	4,184,051.63	35,692,085.50
FY 07-08	10,307,477.83	8,413,240.75	8,413,240.75	37,586,322.59

FY 17-18	8,681,394.03	7,429,454.53	7,349,688.20	7,917,981.06

* Difference in total disbursements and DSCA-related disbursements due to Non-DSCA related fund transfers

Figure 2. DSCA Fund Trends

Using the DSCA Program's state-lead cleanup costs and national estimates of total average costs to clean up contaminated dry-cleaning sites, the program can project the estimated costs to address the sites currently certified in the DSCA Program. Using an estimated average total cleanup cost of \$350,000 per site, it will take more than \$145 million (not including DEQ's administrative costs) to address the 414 sites that have been certified in the program. Based on data from the N.C. Department of Labor, there are at least 2,000 active

and abandoned dry-cleaning facilities in the state. Investigations performed across the nation indicate that contamination is present in at least 75 percent of all dry-cleaning operations. Applying this percentage to the number of current and former facilities in North Carolina, a total of 1,500 contaminated sites may be present, equaling an estimated \$525 million in cleanup costs. If only 50 percent of these contaminated sites are accepted into the DSCA Program, the projected total cleanup cost (adjusted for inflation) would be approximately \$263 million.

E. DSCA Administrative Costs

According to DSCA, up to 20 percent of annual revenues deposited into the fund may be used by DEQ and the North Carolina Attorney General's Office to administer the program. The administrative costs-to-revenue ratio has been relatively steady, fluctuating between 15 and 17 percent since FY 2009-10. The current administrative cost-to-revenue ratio is at 15.6 percent and expected to increase only slightly in the coming fiscal year as vacant positions are filled and attorney support is restored.

Actions to Ensure Fund Solvency

Between 2008 and 2011, the increased expenditures on site cleanups had substantially reduced the fund balance (Figure 2). During the past three fiscal years, the program experienced an increase in the number of sites petitioning into the cleanup program, along with an increase in vapor intrusion-related assessment and mitigation. As demonstrated during previous years, the program continues to closely monitor and adjust expenditures to ensure that funds are available to address certified sites. The DSCA Program's prioritization strategy ensures that sites requiring remediation are addressed in priority order while maintaining fund solvency.

As noted above, total collections for FY 2017-18 were approximately \$8.7 million. The fund has a balance of approximately \$7.9 million, with contract monies encumbered or pending encumbrance totaling \$2.5 million. The DSCA Fund is solvent.

The DSCA Program is entirely receipt-funded by taxes on dry-cleaning solvents and the dry-cleaning related sales and use tax. These taxes are appropriately used to assess and remediate dry-cleaning solvent contamination. Given the DSCA Program's broad dry-cleaning industry support and its success in cleaning up contaminated dry-cleaning sites, mitigating risks and preventing future releases, DEQ proposed legislation to extend the program and the funding.

To help ensure that the program and funding remain viable to adequately address sites certified and new sites yet to be discovered, an amendment to DSCA is being proposed to extend the sunset dates for the program and its funding for an additional 10 years. General Statutes (G.S.) 143-215.104A of the Dry-Cleaning Solvent Cleanup Act of 1997 originally established a sunset date January 1, 2012 for the DSCA Program. Similarly, G.S. 105-187.35 set a sunset date of January 1, 2010 for the dry-cleaning solvent tax, and G.S. 105-164.44E established a sunset date of July 1, 2010 for transferring sales and use tax to the DSCA Fund. In 2009, with support from the department and the dry-cleaning industry, Session Law 2009-483 added 10 years to the sunset dates extending the DSCA Program to

January 1, 2022; the dry-cleaning solvent tax to January 1, 2020; and the sales and use tax transfer to July 1, 2020.

The DSCA Program provides a cost-effective means of protecting the public and the environment from risks posed by dry-cleaning solvent contamination and provides property owners and dry-cleaners the opportunity to allow site contamination to be remediated at costs that they can afford.

Chapter III: Hazardous Waste Program

A. Executive Summary

This annual report describes the activities of North Carolina's Hazardous Waste Management Program, Resident Inspector Program and Mercury Switch Removal Program from July 1, 2017, through June 30, 2018. It is prepared pursuant to N.C.G.S.130A-294(i) and is presented to the General Assembly and its Fiscal Research Division, Senate Appropriations Subcommittee on Natural and Economic Resources, House Appropriations Subcommittee on Natural and Economic Resources, and Environmental Review Commission.

North Carolina's Hazardous Waste Management Program protects human health and the environment from the risks presented by potential mismanagement of hazardous waste.

Hazardous waste received in North Carolina by facilities in state fiscal year (FY) 2017-18 amounted to 22,371 tons. Hazardous waste generated in North Carolina by facilities in state FY 2017-18 totaled approximately 80,235 tons. Hazardous waste generated data is from the U.S. Environmental Protection Agency's (EPA) RCRA Info and Easitrak software systems. The hazardous waste received data is from the N.C. Resident Inspector Program. Both the number of small quantity generators and number of very small quantity generators (formerly called conditionally exempt generators) increased, though the quantity of hazardous waste generated by these facilities is not reported. Inspection, compliance assistance and enforcement activities at hazardous waste facilities resulted in the safe management of an estimated 2,221 gallons and 2,280 pounds of hazardous waste, 250 gallons and 2,832 pounds of non-hazardous waste, 101.8 tons of contaminated soil, 2,220 gallons of used oil and 750 pounds of universal waste. Mismanagement of the waste could have presented potential health or environmental risks.

In addition, the program continues to make significant progress in cleaning up contamination at permitted hazardous waste management facilities. The national goal is for final remedies to be constructed and fully operational at 95 percent of these facilities by 2020, although this does not necessarily mean remediation will have been completed. Currently in North Carolina, 70 percent of facilities have been remedy constructed.

B. Hazardous Waste Management Program

North Carolina was authorized to implement the federal hazardous waste regulatory program in lieu of the Environmental Protection Agency in 1980. Federal authorization is the process through which EPA delegates primary program implementation and enforcement responsibility to states, while maintaining an oversight role to ensure national consistency. The federal program, established under the Resource Conservation and Recovery Act (RCRA), regulates the generation, transport, treatment, storage, disposal and recycling of hazardous waste. The program also governs the environmental remediation of hazardous waste treatment, storage and disposal facilities that have been contaminated by prior waste management activities. The North Carolina hazardous waste program is implemented by the Hazardous Waste Section (HWS) in DEQ's Division of Waste Management.

1. Hazardous Waste Generation, Management and Remediation

a. Generation

Hazardous waste is defined as industrial material destined for disposal that may be ignitable, corrosive, reactive and/or toxic and, as such, poses a risk to human health and the environment if improperly managed.

The comprehensive hazardous waste generation data is available biennially thru RCRAInfo (see Information Management Section). The national reporting cycle for 2017 will not be available until late 2018.

In state FY 2017-18, there were approximately 732 (as of Oct. 18, 2018, source RCRAInfo) North Carolina Large Quantity Generators.¹ The amount of waste generated in FY 2017-18 was approximately 80,235 tons with 787 facilities reporting (100 percent).

In state FY 2017-18, there were approximately 1,856 (as of 10/18/2018) small quantity generators² in North Carolina as well as 4,877 (as of 10/18/2018) very small quantity generators.³ These generators are subject to reduced reporting and regulatory requirements because they are often small businesses for whom periodic reporting could be overly burdensome. They are also subject to reduced reporting because the amounts of waste generated at each individual site are less likely to present significant risks to human health and the environment. However, these facilities collectively generate a significant amount of hazardous waste that must be managed properly and in compliance with applicable rules. Significant resources are devoted to technical assistance, outreach and compliance activities at these facilities. Staff conduct compliance assistance visits or other types of inspections as a way of outreach to help facilities with the RCRA regulations.

b. Management

Comprehensive hazardous waste generation data is available biennially. The national reporting cycle for 2017 will not be available until late 2018.

In state FY 2017-18, North Carolina's nine commercial hazardous waste facilities⁴ received and processed 24,200 tons of hazardous waste from offsite generators.

c. Remediation

There are 80 active hazardous waste treatment, storage, disposal and corrective action facilities in North Carolina. Each facility is governed by a permit, an enforceable order

¹ Large Quantity Generators are defined as facilities that generate 1,000 kg or more of hazardous waste in a month, or 1 kg or more of acutely hazardous waste in a month.

² Small quantity generators are facilities that generate between 100 and 1,000 kg of hazardous waste in a month.

³ Very Small Quantity Generators (formerly called Conditionally Exempt Generators) generate hazardous waste at a rate less than 100 kg in a month and are not required to notify.

⁴ Commercial hazardous waste facilities are permitted facilities that accept hazardous waste from offsite generators and store, treat, and dispose hazardous waste.

or another operational control mechanism for management and/or remediation of hazardous waste.

There are 90 facilities subject to the RCRA Corrective Action Program, which addresses remediation of environmental contamination at permitted hazardous waste facilities. The Hazardous Waste Program tracks the remediation progress at these sites using five environmental indicators:

- 1) Human exposure controlled,
- 2) Groundwater contamination controlled,
- 3) Cleanup remedy constructed,
- 4) Ready for Anticipated Use, and
- 5) Remedy completed.

The Ready for Anticipated Use (RAU CA800) indicator is new and North Carolina has EPA goals of two in FY-18, two in FY-19, two in FY-20, three in FY-21 and three in FY-22. The current baseline for the RAU CA800 is 90 facilities. As of June 30, 2018, North Carolina accomplished the two projected for EPA FY-18. The program continues to make significant progress in overseeing the remediation of contamination at permitted hazardous waste management facilities. The national goal is for 95 percent of these facilities to meet three environmental indicators by Oct. 1, 2020 (beginning of the federal fiscal year). Currently in North Carolina, 96 percent of facilities have human exposure controlled, 93 percent have groundwater contamination controlled and 70 percent have a remedy constructed. In addition, the EPA recently set a goal of 32 percent of the facilities completing all remediation by 2020. Currently, 25 percent of North Carolina facilities have all hazardous waste remediation complete.

To achieve the national goal of 95 percent of the facilities having a remedy constructed by EPA for federal fiscal year 2020, the Hazardous Waste Section has established the following goals:

Hazardous Waste Section Projections to meet the EPA 2020 goal	EPA FFY-18 Accomplished	EPA FFY-19	EPA FFY-20
Human Exposures Controlled	96%	100%	100%
Groundwater Contamination Controlled	93%	94%	97%
Remedy Constructed	70%	77%	81%

Hazardous Waste Section Projections to meet the EPA 2020 goal	EPA FFY-18 Accomplished	EPA FFY-19	EPA FFY-20
All RCRA Remediation Complete	25%	26%	28%

*The Remedy Constructed indicator is very dependent on the facility, not necessarily the Hazardous Waste Project Manager. The facility needs to have done a sufficient job assessing the contamination before they can propose and implement what could be considered a final remedy. One needs to remember fully assessing groundwater contamination and remediating groundwater contamination is not an easy nor inexpensive proposition.

Strategy to achieve the goals listed above:

The Facility Management Branch (FMB) evaluates and projects these goals for the FFY-20 multiple times per year: during the EPA Work Plan development stage, at the EPA End-of-Year Reporting stage, at each VIP review and during the regular supervisor/employee meetings. To meet the FFY-20 goals, two Groundwater Contamination Controlled goals must be achieved and 23 Remedy Selected and Remedy Constructed goals must be achieved. The FMB has met the EPA 2020 goal of 95 percent of Human Exposures Controlled. In addition, in FFY-18, the EPA added an indicator for Ready for Anticipated Use. The goals for this new indicator are described above.

Facilities that have not met the Human Exposures Controlled or Groundwater Contamination Controlled projections have been evaluated and notified concerning information needed to meet the goals. The FMB is confident these goals will be met.

The Remedy Constructed goal will require extensive discussions between the FMB and facilities to identify and approve remedies that are protective of human health and the environment, and meet the appropriate media standards. The selection of the proper remedy and implementation of the remedy may require a large investment of time and money at each facility. For the FMB to meet the goal of 95 percent, no more than four facilities can miss the goal. There are three facilities that will not be able achieve the goal because they are bankrupt or financially marginal facilities. EPA is aware that it is unlikely that the branch will meet the 95 percent Construction Complete goal. However, the FMB will continue working to meet these goals.

The FMB will evaluate facilities that appear to have the necessary elements required for the RAU CA800. Once evaluated and a positive RAU CA800 is determined, the proper forms will be filled out. The branch does anticipate meeting the RAU CA800 goals through EPA FY-22.

To meet the All RCRA Remediation Complete goal, a facility must meet the appropriate clean-up standards for all media: soil, groundwater, surface water and air. Typically, groundwater cleanup is a multi-decade process, depending on the constituents and concentrations that need to be remediated. However, the Risk-Based Remediation of Industrial Sites legislation enacted through Session Law 2011-186 and revised by Session Law 2015-286 allows for a risk-based approach to the soil, groundwater and air standards as long as the remedy still provides for protection of human health and the environment. Because the EPA revised the goal for this indicator from 25 percent to 32 percent, it is

unlikely that North Carolina will meet the new goal. However, the FMB will continue to work with facilities toward accomplishing this goal.

2. Compliance and Enforcement

The Hazardous Waste Program is responsible for implementing inspection, compliance and enforcement activities. The environmental benefits achieved through compliance and enforcement activities are identified each year to measure the overall success of the program in meeting environmental goals. During FY 2017-18, the section's actions ensured the safe management of an estimated 2,221 gallons and 2,280 pounds of hazardous waste, 250 gallons and 2,832 pounds of non-hazardous waste, 101.8 tons of contaminated soil, 2,220 gallons of used oil and 750 pounds of universal waste that otherwise may have been mismanaged. These actions also ensured the protection of more than 1,470 individuals (mostly staff at affected facilities) who could have been adversely affected.

3. Information Management

Comprehensive information about North Carolina's hazardous waste facilities is entered and stored in the national hazardous waste database known as Resource Conservation and Recovery Act Information (RCRAInfo) and RCRARep, a system that gives EPA and state environmental staff access to RCRA and Biennial Report information. The RCRAInfo database was developed by the EPA and the states, and it is managed by the EPA. RCRAInfo contains comprehensive information on facilities that generate and/or manage hazardous waste in the state as well as all the Hazardous Waste Section's activities affecting these facilities. RCRARep is an EPA computer system developed by EPA Region I and designed for read-only programmatic use. To view environmental information for specific hazardous waste sites in North Carolina, visit: <https://www3.epa.gov/enviro/>. For details about the N.C. Division of Waste Management and its Hazardous Waste Section, visit the division's website: <https://deq.nc.gov/about/divisions/waste-management>, or the section's website: <https://deq.nc.gov/about/divisions/waste-management/hw>.

4. Hazardous Waste Program Development

The Hazardous Waste Program will continue to ensure safe hazardous waste management in North Carolina by:

- Supporting opportunities for waste minimization and recycling, supporting annual generator workshops that educate the largest generators about hazardous waste regulations and helping these generators achieve and maintain compliance.
- Maintaining a guidance document to educate small quantity generators about hazardous waste regulations that help them achieve and maintain compliance.
- Continuing to seek EPA authorization to maintain the section's authority to implement the federal program.
- Maintaining high quality hazardous waste data for hazardous waste trend analysis and sound decision-making.

- Participating in the EPA rulemaking process. Examples include the updated 2015 Definition of Solid Waste Rule, 2017 Hazardous Waste Generator Improvements Rule, and Management of Pharmaceutical Hazardous Waste Rule, anticipated in 2019.

5. Hazardous Waste Reduction Initiatives

The Hazardous Waste Section promotes waste minimization and recycling in all of its programs. Some of these activities include:

- Incorporating pollution prevention training (based on targeted priority chemical waste streams) into annual generator workshops, industry meetings and enforcement settlement negotiations.
- Reviewing facility requests for alternative management practices for hazardous waste (use/reuse, substitution, reclassification and delisting).
- Supporting intervention projects to reduce or eliminate the presence of priority chemicals through partnerships with other agencies.
- Ensuring that generators continue to develop programs to minimize or reduce the volume and quantity or toxicity of hazardous waste when staff conducts compliance assistance visits or during inspections.

6. Cost of Hazardous Waste Management Program

Hazardous Waste Legislative Report Financials July 1, 2017 to June 29, 2018 Expenditures

	Receipts	Appropriations	Federal	TOTALS
Salary and Fringe	\$1,775,072.20	0.00	\$1,645,781.09	\$3,420,853.29
Purchased Services	\$128,640.14	0.00	\$345,417.44	\$474,057.58
Supplies	\$1903.88	0.00	\$20,500.61	\$22,404.49
Property Plant and Equipment	\$2,744.31	0.00	\$25,157.33	\$27,901.64
Other Expenses and Adjustments	\$0.00	0.00	\$235,892.94	\$235,892.94
Intragovernmental Transfers	\$568.53	0.00	\$7,106.39	\$7,674.92
TOTALS	\$1,908,929.06	0.00	\$2,279,855.80	\$4,188,784.86

C. Resident Inspector Program

1. Executive Summary

The Resident Inspector Program has been operating for more than 25 years in the N.C. Department of Environmental Quality's (DEQ) Division of Waste Management. The program uses a multimedia approach during required regulatory inspections involving hazardous waste management and treatment requirements, workplace safety, air emissions requirements, and wastewater treatment and discharge requirements. Resident inspectors

also evaluate commercial hazardous waste facilities for potential violations in other regulatory areas, such as the N.C. Department of Labor's Occupational Safety and Health Act and the N.C. Department of Transportation's hazardous materials transportation regulations. The program inspected the state's nine permitted commercial hazardous waste treatment, storage and disposal facilities during this time period. For FY 2017-18, the Resident Inspector Program operated with a staff of 4.5 positions. The program's operating fee-based budget collected \$412,325 and program expenses totaled \$342,800. Program staff conducted 448 multi-media inspections, with three notices of violation.

2. Program Description

The Resident Inspector Program was established "... to enhance the ability of the department to protect public health and the environment by providing the department with the authority and resources necessary to maintain a rigorous inspection and enforcement program at commercial hazardous waste facilities" [G.S. 130A-295.02(f)]. The program monitors all aspects of commercial hazardous waste facilities in North Carolina, provides facility support through assistance and education, assures compliance with laws and rules administered by DEQ and may include enforcement of laws or rules administered by any other state agency through a memorandum of agreement.

The Resident Inspector Program is part of the Hazardous Waste Section's Compliance Branch. For FY 2017-18, the program was comprised of three resident inspectors, one administrative assistant and one (half-time) program supervisor.

During FY 2017-18, Resident Inspector Program staff conducted 448 multimedia inspections at North Carolina's nine commercial hazardous waste treatment and storage facilities. This performance exceeded the statute-mandated minimum of 440 inspections. [See Table 1 for details.]

3. Program Funding

The Resident Inspector Program is intended to be funded solely by fees collected from the commercial hazardous waste facilities [G.S. 130A-295.02(h)]. These fees are based on each facility's category ranking and the volume (tons) of hazardous waste received. For FY 2017-18, facility ranking fees totaled \$303,696 and tonnage fees (\$4.50 per ton) equaled \$108,901. [See Table 1.] The program's expenses totaled \$342,800.

4. Program Results

Resident inspectors offer compliance assistance routinely – often in the form of education, technical assistance and recommendations or comments during the site visits. Since the inspectors visit these facilities at least twice a month, they become familiar with facility management, operations and site conditions. Resident inspectors can easily identify potential problem areas and work with the facility toward a permanent solution. If a facility begins to have operational or compliance problems, the inspector reviews these problem areas during each visit to provide assistance and keep the facility's compliance awareness high. Inspectors communicate frequently with facility management and front-line workers to address conditions or behaviors before they become a compliance issue. The inspectors also communicate to clarify permit conditions and current regulatory

requirements and explain the reasons for the requirements as well as the potential risks and costs of noncompliance. During the past fiscal year, resident inspectors issued three notices of violation. [See Table 1 for details.]

The Resident Inspector Program staff members continue to provide rigorous oversight of commercial hazardous waste facilities in the state. The staff constantly seeks new approaches and initiatives to ensure that commercial hazardous waste facilities can protect public health and the environment. The Resident Inspector Program staff has also worked with the commercial facilities to maintain compliance during times of economic challenge. Economic pressures can cause hazardous waste facilities to operate with fewer staff members and provide employees less training. All these factors can lead to noncompliance. The Resident Inspector Program continues to work toward a high level of compliance at the commercial hazardous waste facilities in North Carolina through facility education, technical assistance and regulatory oversight activities.

Table 1. Resident Inspector Program Commercial Hazardous Waste Facilities' Data FY 2017-18

COMMERCIAL TREATMENT/ STORAGE/ DISPOSAL FACILITY	Facility Ranking	Minimum # of Inspections	Actual # Inspections Conducted	HW Tons Received FY2016-17	HW Tons Received FY 2017-18	Notices of Deficiency Issued	Notices of Violation Issued	Compliance Orders Issued

D. Mercury Switch Removal Program

1. Executive Summary

The Mercury Switch Removal Program (MSR Program) has been operating for 13 years in the N.C. Department of Environmental Quality's (DEQ) Division of Waste Management. The program continues to inspect the end-of-life vehicle dismantling, crushing and shredding facilities. For FY 2017-18, the Mercury Switch Removal Program operated with a staff equivalent to approximately 3.5 positions supplied by the Hazardous Waste Section's Compliance Branch. The program's operating budget is funded by fees collected as part of the N.C. Department of Transportation's application for certificate of vehicle title fee.

The program's total operating costs this year were \$314,267. Those costs include switch reimbursements of \$5 for every mercury switch removed and recycled or disposed of as RCRA 'Universal Waste.' A total of \$29,450 was disbursed to the dismantlers, crushers and shredders for switch reimbursements. Program staff conducted 199 inspections during FY 2017-18 to determine compliance with state and federal RCRA regulations. No notices of violation or notices of deficiency were issued.

2. Program Description

Through S.L. 2005-384, as amended by S.L. 2007-142, the General Assembly acted to reduce the amount of mercury entering the state's environment. As stated in G.S. 130A-310.51, the purpose of the program is to reduce the quantity of mercury released into the environment by removing mercury switches from end-of-life vehicles and creating a removal, collection and recovery program for those switches. The mercury switches control convenience lighting in the trunk and under the hood. Specifically, the law requires all vehicle dismantlers, vehicle recyclers, vehicle crushers and/or vehicle scrap processors to remove, collect and recover mercury switches contained in end-of-life vehicles prior to crushing, shredding or smelting the vehicles.

To ensure compliance with requirements established in G.S. 130A-310.50 through 310.57, DEQ's DWM's Hazardous Waste Section created the MSR Program, which is coordinated through the Hazardous Waste Section's Compliance Branch.

During FY 2017-18, the MSR Program inspectors conducted 199 inspections in North Carolina. The site visits are used to evaluate whether the facility was subject to the law and acquaint those regulated facility operators with the legislative requirements. Additional compliance assistance was given by the inspectors, as needed, regarding the MSR Program and other RCRA and Clean Water Act regulated requirements.

In accordance with the National Vehicle Mercury Switch Removal Program (NVMSRP), North Carolina's MSR Program receives support from a corporation, End-of-Life Vehicle Solutions (ELVS), which was formed by and represents the major automobile manufacturers. ELVS provides the following support to North Carolina's vehicle dismantlers/recyclers, vehicle crushers and scrap processing facilities:

- Educational materials regarding mercury switch removal, guidance on which vehicles contain mercury switches, instructions on how to locate, identify and remove mercury switches.
- U.S. Department of Transportation (DOT) appropriate storage/shipping containers, including applicable labeling and shipping documents necessary for the shipment of the mercury switches.
- Transportation of the mercury switches in a timely fashion to a RCRA-permitted mercury recycling/disposal facility.
- Recycling of the mercury switches by a qualified mercury retort facility or, when recycling is not feasible, for the proper disposal of the mercury switches at an RCRA permitted disposal facility.
- Indemnification from liability for participating vehicle dismantlers, scrap processing facilities, vehicle crushers and others, once mercury switches are collected by the ELVS contractor.

With this level of support from automobile manufacturers, dismantlers/recyclers, vehicle crushers and scrap processing facilities can effectively remove the mercury switches from the end-of-life vehicles before crushing, shredding or smelting them.

When the switches are removed from the vehicles, they are placed in the supplied DOT container, which is labeled with the date the first switch was placed in the container and with the words “Universal Waste – Mercury Containing Equipment.” When the container is full, with a maximum of 454 switches per container, or the date on the container approaches one year, the container is shipped to the ELVS-contracted receiving facility (shipping is paid for by ELVS). ELVS continues to provide new containers and supplies as needed.

3. Program Funding

The MSR Program was funded by fees collected as part of the DOT fee for application of vehicle title certificate. Twenty cents of each \$40-per-vehicle certificate of title fee is now given to DWM for this program. (Formerly, fifty cents of each fee went to the now defunct Mercury Pollution Prevention Trust Fund). Under G.S. 130A 310.54(b)(1) & (b1), the Mercury Pollution Prevention Fund, in part, reimburses the MSR Program for: (a) \$5 for each mercury switch removed and properly recycled or disposed via the NVMSRP, paid to a vehicle crusher, vehicle dismantler, vehicle recycler or scrap vehicle processing facility; and (b) costs incurred by the department to administer the program.

Operationally, the funding provided for approximately 3.5 full-time equivalent positions, travel and equipment expenses plus mercury switch removal reimbursement payments. Program duties are, on a part-time basis, spread among these staff and others, including a chemist and supervisor. FY 2017-18 revenues were approximately \$440,124. Reimbursement paid to the vehicle dismantlers/recyclers, vehicle crushers or scrap processing facilities, for removal of the mercury switches with proper recovery and

disposal (\$5 per switch) totaled \$29,450 and total administrative costs totaled \$314,267. The fund balance did not see a net increase due to changes in legislation for the fiscal year.

4. Program Results

As directed by ELVS, the contracted facility receiving the collected mercury switches supplies data to the MSR Program detailing the number of switches received, date the switches were received and name and location of the facility that shipped the switches (dismantler, crusher, shredder, etc.).

For FY 2017-18, 10,222 mercury switches were removed from vehicles and received by the ELVS contractor from North Carolina vehicle dismantlers/recyclers, vehicle crushers and scrap processing facilities. This waste is managed as universal waste. A total of 22.49 pounds of mercury (from the 10,222 switches) was prevented from being released to the environment in North Carolina as a result of mercury switches removed from vehicles this year.

In the 13 years this program has been in place, a total of 1,223 pounds of mercury has been prevented from being released into North Carolina's environment from metal processing and smelting of scrap vehicles.

S.L. 2017-57 modified the sunset date of the Mercury Switch program from June 30, 2017 to June 30, 2021 by repealing Part 6 of Article 9 of Chapter 130A of the General Statutes. The law also ended the transfer of funds into the Mercury Pollution Prevention Fund from the N.C. Highway Fund, removed most of the dollars from the fund and transferred all remaining funds to the N.C. Division of Waste Management. All activities of the program in North Carolina, including education, assistance, inspections and switch reimbursements, will cease as of June 30, 2021.

Chapter IV: Inactive Hazardous Sites Program

A. Executive Summary

The N.C. General Assembly created the Inactive Hazardous Sites Program in the Department of Environmental Quality's (DEQ) Division of Waste Management (the division) to identify, investigate and clean up properties contaminated with hazardous substances. The program also manages the assessment and cleanup of old pre-regulatory landfill sites that have environmental contamination and predate modern landfill standards designed to prevent contamination. This report satisfies the requirements, set out in G.S. 130A-310.10, for an annual report to the General Assembly.

To date, a total of 3,166 chemical spill or disposal sites and old, unlined dumps or landfills (pre-regulatory) have been cataloged in North Carolina. Of this number, 2,557 still require work to address public health or environmental hazards.

Of the 2,557 remaining open cases, 666 are old, unlined landfills that predate solid and hazardous waste permitting laws. By state law, approximately 45 percent of the proceeds of a statewide solid waste disposal tax is directed to address contamination at these pre-regulatory landfills. The division has established contracts with private firms to assess and remediate the pre-regulatory landfill sites. In FY 2016-17, the division started a pilot study of an alternative privatized method of state-funded assessment and remediation at four pre-1983 landfills to evaluate ways to improve efficiency and reduce cost. This study will span a three-year contract term.

At the end of FY 2017-18, the uncommitted cash balance in the Inactive Hazardous Sites Cleanup Fund (IHSCF) dedicated to addressing the non-landfill inactive hazardous waste sites was \$8,796. The fund receives an annual \$400,000 appropriation for this purpose. Expenditures for the pre-regulatory landfills are starting to deplete the surplus which accumulated during the early years when the program was conducting mostly lower cost assessment work. Active remediation is now underway at 11 of the highest risk sites and the program's rate of disbursements is increasing.

The program has recovered funds for assessment and remediation through bankruptcy claims for several sites over the years. In most cases, these new monies go into special trust funds, since the payments can only be used for specific sites in accordance with bankruptcy settlement agreements.

The following provides a status of sites cataloged by the Inactive Hazardous Sites Program.

Catalog of Contaminated Sites:

Total Number of Inactive Hazardous Sites Cataloged Since 1987	3,166
Chemical Spill or Disposal Sites	2,488
Pre-Regulatory Landfills	678
Total Number of Sites Requiring No Further Action	609
Chemical Spill or Disposal Sites	597

Pre-Regulatory Landfill Sites	14
Remaining Open Sites	2,557
Chemical Spill or Disposal Sites	1,891
Pre-Regulatory Landfills	666

Program Activities During FY 2017-18:

Chemical Spill or Disposal Sites:

Oversight of Responsible Party Cleanup Actions - Total	262
Registered Environmental Consultant (REC)-Supervised Remedial Actions	115
Staff-Supervised Remedial Actions under Administrative Agreements	66
Additional Staff-Supervised Actions Pending Administrative Agreements	78
Spill Response Actions	3

Inactive Hazardous Sites Cleanup Fund Actions

Contaminated Site Assessments Completed or Ongoing	31
Homes Provided Alternate Water or Treatment Systems Maintained	13

Testing Conducted by Staff

Water Supply Wells Sampled at Non-Landfill Sites	30
Sites with Other Testing (soils, surface water)	21

New Site Screenings

Sites Screened	48
Sites (Chemical Spills) Added to Inventory	36
Sites Re-Opened	2

Sites Evaluated for No Further Action (NFA) Status

Sites Evaluated	20
NFAs Granted for Entire Site	14

Pre-Regulatory Landfill Sites:

First Phase Assessment Completed <i>(receptor and general perimeter research)</i>	8
First Phase Assessment Ongoing	2
Contaminant Delineation Phase Completed <i>(can be multiple field events)</i>	13
Contaminant Delineation Phase Ongoing	45
Local Government Assessments Ongoing	11
Remedial Design Ongoing	23
Remedial Action Ongoing	11
Remedial Action Completed	3
No Further Action Assignments	1
New Site Evaluations	4
Homes Provided Alternate Water or Treatment Systems Maintained	13
Number of Water Supply Wells Sampled	70

B. Inactive Hazardous Sites Inventory and the Inactive Hazardous Waste Sites Priority List

The Division of Waste Management's Inactive Hazardous Sites Branch implements the Inactive Hazardous Sites Response Act of 1987 (IHSRA). The IHSRA requires the division to maintain a catalog of inactive hazardous substance or waste disposal sites. The program has cataloged 2,488 chemical spill sites and 678 old, unlined landfills. Table 1, on page 35, lists the sites added to the inventory in FY 2017-18. A total of 36 new chemical spill sites were added to the inventory of sites this past fiscal year. In addition, two chemical spill sites were reopened based on additional evidence of contamination. A total of 609 sites now have all work completed and are assigned "No Further Action" status. Fourteen completed all work and were assigned "No Further Action" status in FY 2017-18. Table 2, on page 36, provides a list of the "No Further Action" sites.

N.C.G.S. 130A-310.2 requires the division to prioritize sites cataloged in the Inactive Hazardous Sites Inventory based on the threat to public health and the environment. Sites are first cataloged in the "Evaluations Pending" category of the Inventory until the division ranks the site based on rules found in 15A NCAC 13C .0200. Once ranked, sites are transferred to the Inactive Hazardous Waste Sites Priority List. The priority list is provided in Appendix A to this report, organized in order of the threat to public health and the environment. The purpose of this list is to prioritize full-scale (complete) remedial actions (or cleanups) at sites without responsible parties. The rank or absence of a site on the priority list does not limit the division in conducting abatement actions at sites with immediate hazards.

N.C.G.S. 130A-310.10 requires reporting of the location of each inactive hazardous waste disposal site, type and amount of hazardous substances or waste known or believed to be located at each of these sites, last action taken at each of these of these sites and date of the last action. Due to the large numbers of contaminated sites, most of the sites have not undergone complete assessments needed to provide complete information. Appendix B provides the required supplemental information to the extent available.

Table 1. Inactive Hazardous Sites Inventory List of New Sites FY 2017-18

Chemical Spill/Disposal Sites:

ID NUMBER	NAME	CITY	COUNTY

C. Sites that May or Are Known to Require Use of the Inactive Hazardous Sites Cleanup Fund

Purpose of the Fund

The Inactive Hazardous Sites Cleanup Fund (fund) is used to: (1) address imminent hazard sites; (2) pay for assessment and cleanup when responsible parties do not comply with orders to clean up sites; (3) pay for assessment and cleanup of sites without financially-viable

responsible parties (orphan sites); and (4) pay for preparation of a notice of Inactive Hazardous Substance or Waste Disposal Site if the owner does not comply with orders to record a notice. When a financially viable responsible party exists, the state must attempt to recover its expenditures from the responsible party.

The Inactive Hazardous Waste Sites Priority List helps determine priorities for cleanup. Responsible parties for top priority sites are encouraged to voluntarily clean up their sites. When a responsible party does not comply with a request and subsequent order to clean up a site, the state must perform the cleanup using the Fund. The demand for state funds to conduct site cleanups depends on two factors: (1) how often responsible parties refuse to comply with orders to conduct cleanup and (2) the number of sites that lack financially viable responsible parties.

Inactive Hazardous Sites Cleanup Fund Actions

The Inactive Hazardous Sites Cleanup Fund was used to address several sites this year. A summary of the work conducted is provided in Table 3.

Table 3. Summary of 44 Inactive Hazardous Sites Cleanup Fund Expenditures FY 2017-18

<i>Site Name</i>	<i>City/ County</i>	<i>Activity</i>	<i>FY 2017-18 Fund Expenditures</i>
Allen Lane Contaminated Wells	Hillsborough/ Orange	Maintenance of a treatment system installed on a contaminated residential well.	\$1,699
Belton Street Solvents	Charlotte/ Mecklenburg	Conducted groundwater sampling.	\$17,323
Bragg Blvd Solvents	Fayetteville/ Cumberland	Conducted a groundwater and soil gas investigation.	\$9,338
Breckenwood Subdivision	Pleasant Garden/ Guilford	Maintenance of a treatment system installed on a contaminated residential well.	\$2,804
Broyhill Furniture	Conover/Catawba	Conducted soil gas and groundwater sampling with bankruptcy proceeds.	\$24,869
Busick Road	Reidsville/ Rockingham	Maintenance of a treatment system installed on a contaminated residential well.	\$2,474
Buss Automation	Lenoir/ Caldwell	Conducted soil and groundwater sampling.	\$22,902
Christian Creek Rd PCE	Swannanoa/ Buncombe	Bottled water being provided while the EPA installs water lines. Water lines now installed and bottled water discontinued.	\$5

Cinderella Knitting Mills	Kings Mountain/ Cleveland	Conducted groundwater and residential crawlspace sampling. Work was initiated in FY 2014-15 and continued into FY 2017-18.	\$16,364
Clarkson Street Contamination	Charlotte/ Mecklenburg	Conducted soil gas and indoor air sampling.	\$30,822
Corning Glass Works	Raleigh/ Wake	Conducted split sampling of groundwater and soil gas to determine the risks of off-facility hazards being investigated by Corning.	\$19,222
Country Club Lane Contamination	Roxboro/ Person	Maintenance of a treatment system installed on a contaminated residential well.	\$2,725
Danny Roberts/ Interstate BP	Durham/ Durham	Maintenance of a treatment system installed on a contaminated residential well.	\$2,260
Delburg Street Solvents	Davidson/ Mecklenburg	Soil gas and groundwater sampling.	\$41,160
Eighth Ave Ext Solvents	Cramerton/ Gaston	Groundwater and soil gas sampling continued from last fiscal year. Also provided bottled water to owners with contaminated wells while the EPA is installing a water line.	\$15
Fallies Dry Cleaning	Mocksville/ Davie	Conducted a groundwater and soil gas sampling. Work initiated in FY 2015-16 and continued into FY 2017-18.	\$6,135
Frye Creek @ US 321 N	Hickory/ Catawba	Groundwater investigation conducted with limited bankruptcy proceeds.	\$26,493
Gentex Printing	Rocky Mount/ Nash	Conducted a groundwater and surface water sampling. Work initiated in FY 2016-17 and continued into FY 2017-18.	\$12,506
Glade Road Wells	Gastonia/ Gaston	Bottled water provided to homes with contaminated wells prior to installing treatment systems. Treatment systems now installed. Work initiated in FY 2016-17 and continued into FY 2017-18.	\$30,876
Haywood Road Contamination	Asheville/ Buncombe	Conducted soil gas and groundwater sampling.	\$10,607
Hometown Cash and Carry	Greensboro/ Guilford	Conducted groundwater and soil gas sampling.	\$9,311
Lane Venture Plant 14	Conover/ Catawba	Conducted groundwater sampling.	\$54,265
King Street Contamination	Burlington/ Alamance	Conducted soil gas and groundwater sampling.	\$10,137
Kysor-Mich. Fleet Division	Charlotte/ Mecklenburg	Conducted soil gas and groundwater sampling.	\$28,494

Makepeace Property	Sanford/ Lee	Conducted groundwater sampling.	\$507
Palmer Automotive	Charlotte/ Mecklenburg	Soil, soil gas and groundwater sampling.	\$20,161
Patties Book Swap	Asheville/ Buncombe	Soil gas and groundwater sampling.	\$10,784
Parris & Main St Solvents	High Point/ Guilford	Conducted soil gas and groundwater sampling.	\$14,967
Peele's Service Station	Jamesville/ Martin	Conducted soil gas sampling.	\$9,033
Perry Builders – Mobile Tract	Henderson/ Vance	Conducted soil gas sampling.	\$18,384
Priddy Property	Lawsonville/ Stokes	Maintenance of a treatment system installed on a contaminated residential well.	\$3,076
Rhone-Poulenc (Rhodia)	Gastonia/ Gaston	Split testing of a groundwater sample collected by the remediating party.	\$100
Southside Rd Incident	Lincolnton/ Lincoln	Water line installation to replace a contaminated well servicing multiple homes. Work initiated in FY 2016-17 and continued into FY 2017-18.	\$45,150
Staley PCE/ Brown's Grocery	Staley/ Randolph	Maintenance of a treatment system installed on a contaminated well.	\$4,442
TL Herring	Wilson/ Wilson	Conducted soil gas sampling.	\$11,887
Trawick Rd/ Bond St	Raleigh/ Wake	Sampling of private well with a treatment system previously installed.	\$721
Triangle Machine & Electronics	Kernersville/ Forsyth	Conducted soil gas and groundwater sampling.	\$8,449
28 th Street TCE Contamination	Winston-Salem/ Forsyth	Conducted indoor air testing.	\$5,642
Washington Street Incidents	Graham/ Alamance	Conducted groundwater and soil gas sampling. Work initiated FY 2016-17 and continued in FY 2017-18.	\$2,465
W.E. Garrison Company	Raleigh/ Wake	Maintenance of a treatment system installed on a contaminated well.	\$2,465
Westinghouse Elec Meter and Light	Raleigh/ Wake	Conducted groundwater, soil gas and indoor air sampling. Work initiated in FY 2016-17 and continued into FY 2017-18.	\$41,368
White Residence	Wilmington/ New Hanover	Water supply well sampling.	\$2,832
Winterville Machine Works	Winterville/ Pitt	Conducted groundwater sampling.	\$7,384

Woodleaf & Ridge PCE	Salisbury/ Rowan	Maintenance of a treatment system installed on a contaminated well.	\$2,169

Inactive Hazardous Sites Program Bankruptcy Actions

The division's Inactive Hazardous Sites Program has also recovered some funds to address specific sites through bankruptcy claims. These funds are held in private escrow accounts, separate state special funds or in the Inactive Hazardous Sites Cleanup Fund. The following summarizes bankruptcy activities conducted in FY 2017-18:

- **CMC** – \$925,000 was recovered for assessment and cleanup of the Elkin site and is held in a private trust. Remedial action was implemented in FY2010-11. The program staff is conducting periodic groundwater monitoring. Funds in the amount of \$193,111 remain for monitoring. In the last two reporting years, the division has been coordinating an effort with the trustee of the account, the trustee of the CMI accounts (see below) and the City of Elkin to transfer the property and some of the adjoining former CMI properties to the City of Elkin to be managed as park space.
- **CMI** – \$1.25 million, \$750,000 and \$100,000 have been recovered for three CMI sites in Elkin and the monies are held in private escrow accounts. These funds have been used to conduct assessment/remediation. Balances of \$13,503, \$23,976, and \$4,814 remain, respectively, for each site. The division has been coordinating an effort with the trustee of the account, the trustee of the CMC account and the City of Elkin to transfer the CMC property (see above) and some of the adjoining former CMI properties to the City of Elkin to be managed as park space. Assessment at these properties was conducted to allow for a risk-based closure. Program staff continues work on this site.
- **Dawson International** – A total claim in the amount of \$6,670,199 was filed in November 2016 for three sites: Cinderella Knitting in Kings Mountain, Morgan Mills in Albermarle and Reeves Brothers in Albermarle. Distribution pending.
- **Fuel Systems** – In FY 2012-13, \$98,010 was recovered for assessment and cleanup of the Kysor site in Charlotte. An additional distribution of \$5,966 was recovered in FY 2014-15. The fund formerly received interest and thus the total amount of income for this site is \$103,976. Program staff have since completed surface water and solid gas sampling events the past two years using these funds.
- **Gilbert and Bennett** – In FY 2005-06, \$87,912 was recovered for the Cape Fear Wood site in Fayetteville. Another responsible party is conducting remediation work under the division's Hazardous Waste Section. Once completed, the bankruptcy funds will be used to conduct remaining cleanup actions.
- **Furniture Brands** – A bankruptcy claim was filed in FY 2013-14 for the Lane Venture #14 and Broyhill sites in Conover, the Henredon site in Morganton and the Thomasville Furniture site in West Jefferson. The division received \$134,474 on its claim in April 2017 and an additional amount of \$27,872 in January 2018. In FY 2016-17, surface water testing was conducted, and in FY 2017-18, division staff conducted soil gas and groundwater testing at the Broyhill and Lane Venture sites using these funds.
- **Pillowtex** – A total of \$244,800, constituting multiple disbursements, has been recovered to address the Fieldcrest Mills site in Spencer and the Cannon Mills site in Kannapolis. Sampling conducted at the Spencer site shows widespread lower level groundwater contamination. The Cannon Mills site will be addressed through the Pre-Regulatory

Landfill Program. Soil gas, groundwater and surface water sampling were conducted in FY 2017-18. A total of \$139,826 remains in funds.

- **SCM** – A total of \$5.3 million was obtained to address the SCM site in Charlotte. The funds are held in a private trust fund. The trustee contracts the work at the division's direction. Funds support one-third of a position to oversee work. Contaminant characterization is completed. Remedial action pending submission and division approval of the remedial action plan.
- **TSG** – In FY 2016-17, \$30,000 was recovered on the division bankruptcy claim for the Frye Creek site in Hickory. Groundwater sampling was conducted at the site using the recovered funds in FY 2017-18.

Chemical Spill or Disposal Sites That Shall or May Require Use of the Inactive Hazardous Sites Cleanup Fund

An annual appropriation of \$400,000 is used to address the highest risk chemical spill sites without responsible parties that can pay for cleanup. A total of 393 sites are known to have no financially-viable responsible party available to pay for contaminant testing and cleanup. Of these, 349 sites are identified as higher risk because they are used for residential purposes, have contaminated water supply wells or have a drinking water source within one-quarter mile of the site. The total number of orphan sites is unknown, but it is expected to be a high percentage of the remaining open cases. It is difficult to prove who caused the contaminant releases at these sites. When it is known, those responsible parties are often no longer in business or are financially unsound. Determining whether a responsible party exists (and thus, whether state funds will be needed for assessment and cleanup) most often requires research, inquiry and sampling. Due to the level of effort required, the division performs responsible party research for sites that are next in priority for action.

Orphan site work can include determining the nature and extent of contamination through testing and other investigation, soil and waste cleanup, waterline installation or groundwater restoration projects. An average cost-per-site was determined by first calculating the average cost for orphan soil cleanup actions conducted by the division's Inactive Hazardous Sites Branch and averaging that figure with an average site cleanup cost for several state programs, published by the Association of State and Territorial Solid Waste Management Officials, adjusting for inflation. That figure comes to \$725,507 per site. The total cost for cleanup is estimated to be \$253,201,943 for the 349 highest risk orphan sites. For all 393 orphan sites identified thus far, the estimated total comes to \$285,124,251.

As of July 1, 2018, the balance of the fund was \$193,991. Of this total, \$159,403 are bankruptcy proceeds dedicated to conducting assessment and remediation at Lane Venture Plant 14 in Conover, Broyhill in Conover, Henredon Furniture in Morganton, Thomasville Furniture in West Jefferson and Kysor in Charlotte. The remaining \$34,588 in funds are committed toward payment of contracted work in progress or completed and not yet billed.

Pre-Regulatory Landfills

Session Law 2007- 550 established a statewide tax on solid waste disposal, half of which goes to address the hazards posed by landfills that predate federal and state rules on solid waste disposal. The portion of the solid waste disposal tax received by the program may be used

only for addressing the pre-regulatory landfill threats. The division received \$9,815,987 in tax revenue in FY 2016-17. Nineteen percent may be used for administrative expenses. Included in the administrative expense allowance is for administration of the non-pre-regulatory landfill portion of the Inactive Hazardous Sites Program and \$500,000 of the division's Solid and Hazardous Waste Section Programs.

FY 2017-18 Income (50% of Tax After DOR Administration Cut)	\$10,113,746
Administration Expenses (19% Allowed)	\$1,921,612
Solid and Hazardous Waste Program Staff (allowed)	\$500,000
IHSP Non-Pre-Regulatory Landfill Program (allowed)	\$426,484
Pre-Regulatory Landfill Program (allowed)	\$995,128

The division has cataloged 678 unpermitted, unlined landfills. Initial work at each site involved confirming the location, determining the current use of the property and identifying the use of surrounding property to help prioritize the sites for action. Based on inspections conducted as part of that work, 80 percent of the sites have been determined to have a water supply source, residence, school, church, day care or park on or within 1,000 feet of the landfill. The division established contracts for contaminant assessment and mitigation of the sites. Using these contracts, the nature and extent of the contamination was defined through testing. A remedy is then designed and implemented to address the exposure risks. The division also provides review and approval of contaminant assessment work being conducted by local governments at these sites and reimburses the cost of that work from the tax proceeds. In FY 2017-18, 11 contaminant assessments were conducted by local governments with division oversight and reimbursement. Additional FY 2017-18 actions:

- Eight completed first phase contaminant investigations (work involves updating information on location of water supply wells, streams, structures and other potential exposure routes, and conducting assessment activities needed to determine the perimeter of the waste);
- Two ongoing first phase contaminant investigations;
- Thirteen completed contaminant delineation investigations (work to characterize the nature and extent of contamination in soils, groundwater, vapors and surface water constituting multiple testing events);
- Forty-five ongoing contaminant delineation investigations;
- Four completed remedial actions;
- Thirty-four ongoing remedial design/actions;
- Seventy private water supply wells on or near unpermitted landfills sampled;
- Thirteen homes provided alternate water supplies or maintenance of treatment systems for wells with unsafe levels of contamination; and
- Four new sites were screened for program qualification.

The assessment and cleanup process is complex. Exposure caused by contaminated water supplies, contaminated vapors entering buildings, methane gas posing explosion risks and exposed wastes on residential property must be addressed. Difficulties can arise in attempting to gain access to affected properties at each site and with illegal dumping during investigation and remedial action activities. During the assessment and cleanup process, the division must balance the owner's current and planned use of the property with acceptable safe usage.

The division started a pilot study of alternative privatized methods of state-funded assessment and remediation of four pre-1983 landfills to evaluate ways to improve efficiency and reduce cost. In January 2017, the division entered into two contracts with professional engineering firms to implement independent environmental investigations and risk-based cleanup of the four sites. The firms are required to develop effective and stable risk-based remedies in a manner consistent with applicable statutes. Work will be conducted independently, and the engineering firms under contract will certify the quality of work. The division will verify compliance prior to authorizing payment on associated invoices. When the study is finished, a comparison of time and costs between direct program oversight and privatized implementation will be completed and reported to identify ways to improve the cleanup process, reduce costs and make the investigation and cleanup activities associated with pre-1983 landfills more efficient. The four sites are:

Bostic Refuse Disposal	Bostic, Rutherford County
Bunn Dump	Bunn, Franklin County
Burnt Mill Creek LF	Wilmington, New Hanover County
Sims Legion Park LF	Gaston, Gaston County

The sites in remedial action during FY 2017-18 are:

Airport Landfill	Winston-Salem, Forsyth County
Bud Holding Company	Greensboro, Guilford County
Buncombe Co.	Enka, Buncombe County
Cannon Mills Landfill	Kannapolis, Rowan County
Central Park LF	Winston-Salem, Forsyth County
City of Lumberton	Lumberton, Robeson County
City of Wilson – 1	Wilson, Wilson County
Closed City of Henderson	Henderson, Vance County
Cumberland Co.	Hope Mills, Cumberland County
Davidson River Dump	Pisgah Forest, Transylvania, County
E. H. Glass	Greensboro, Guilford County
East Wake	Knightdale, Wake County
Edgecombe County	Tarboro, Edgecombe County
Elon College	Elon College, Alamance County
Fairview LF	Fairview, Buncombe County
Flemington	Wilmington, New Hanover County
Henderson County	Hendersonville, Henderson County
Hildebran Disposal	Hildebran, Burke County
Hominy Creek	Asheville, Buncombe County
Mt. Holly	Mt. Holly, Gaston County

 Monroe, Union County
 Raleigh, Wake County
 Otway, Carteret County
 Canton, Haywood County
 Durham, Durham County
 Spring Hope, Nash County
 Stedman, Cumberland County
 Tarboro, Nash County
 Lincolnton, Lincoln County

D. Federal National Priorities List Sites Requiring a State Cost Share

National Priorities List (NPL) sites are hazardous substance or waste disposal sites that are priorities for cleanup under the federal Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), more commonly known as Superfund. These are sites identified by the EPA as high priorities for environmental cleanup because of the nature of the contamination and actual or potential threat to human health and the environment. North Carolina has 41 NPL sites.

The NPL includes sites with financially-viable responsible parties and orphan sites. Cleanup costs are financed by responsible parties or a federal trust fund with a state cost share. When the federal trust fund is used, CERCLA requires North Carolina to pay 10 percent of the cleanup cost, plus 100 percent of the cost to operate and maintain the remediation system.

Table 4 provides a list of the North Carolina NPL sites and the following information for each site: location, investigation/cleanup status, estimated costs and projected start dates for cleanup. Part I of Table 4, found on pages 45-46, includes those sites where the federal trust fund/North Carolina cost share is required. A summary of North Carolina's cost-share obligations is provided at the end of this part. Part II of Table 4, found on pages 47-48, includes the status of responsible party-funded cleanups.

Record of Decision documents for four more federal trust fund lead/state cost share sites are expected to be signed in September 2018. These include: ABC One-Hour Cleaners, Hemphill Road TCE, Ram Leather and Holcombe Creosote Company. The total cleanup cost of these sites is \$31,179,060. The state cost share will be \$3,117,906, which will be required when the EPA initiates cleanup at these sites. More information is provided in the following tables.

**Table 4. North Carolina National Priorities List Sites
Part I: Sites Where Federal Trust Fund/North Carolina Cost Share is Required**

<i>NPL Site</i>	<i>City/County</i>	<i>Operable Unit</i>	<i>Cleanup Status</i>	<i>Cleanup Cost</i>	<i>Work Phase Start</i>

RA - Remedial Action

RI - Remedial Investigation

RI/FS - Remedial

SUMMARY OF NORTH CAROLINA COST-SHARE REQUIREMENTS (AS OF JUNE 30, 2017)

- Estimated total cost of pending/ongoing federal trust fund/state cost-share cleanups (based on signed contracts): \$123,837,291*
- North Carolina's 10 percent cost share for pending/ongoing cleanups (based on signed contracts): \$12,383,729*
- Amount of cost share funds distributed in FY 2017-18: \$245,383
- Fund balance: \$4,985,101
- Amount committed in contracts for cost share payments and operation and maintenance of remedies: \$4,131,432

*This number will increase due to remedial action cost estimates not being available for all sites. Also, other sites may be added to the National Priorities List, which will require a state cost-share and increases in remedial costs from the original state/EPA contract amounts can occur.

E. Responsible Party Voluntary Site Remedial Action

When the Inactive Hazardous Sites Branch requests that a person responsible for contamination at a priority site take action to address the risks, some parties agree to voluntarily conduct a cleanup. Some responsible parties and owners also initiate an approved assessment and/or remedial action on their own. Due to the number of voluntary remediation projects and limited staff resources, the General Assembly authorized the division to privatize oversight of voluntary remediation activities at lower-priority sites. The division continues to provide oversight for assessment and remediation at sites that present more severe public health threats or other concerns.

The privatized portion of the voluntary cleanup program is called the Registered Environmental Consultant (REC) Program. Under this program, a responsible party hires a private consultant to conduct the site assessment and cleanup and to certify that those activities comply with regulations. The REC's certification replaces division oversight of the assessment and cleanup. Firms must meet certain requirements to qualify as an REC. The division audits several REC projects each year to ensure program integrity. The division has the authority to

sanction an REC where necessary. Division staff conduct REC certification, training and performance audits. These staff are funded through fees collected from the voluntary program participants.

A current list of the 181 sites where assessments and cleanups are underway in accordance with an administrative agreement with the state is provided in Table 5. There are 115 REC-directed and 66 division-directed actions. Table 6 is a list of an additional 80 division-directed responsible party assessment and cleanup actions pending administrative agreements.

**Table 5. 178 Voluntary Party Remedial Actions Under Administrative Agreements During FY 2017-18
(115 REC-Directed and 66 Division-Directed)**

It is important to note that in addition to the waste at the sites listed in Tables 5 and 6, Note: Inactive Hazardous Sites Branch staff are conducting work at many other sites. Such work includes (1) assessing and abating risk from contaminated drinking water wells and other contamination at residential and other high risk properties where there are no identifiable responsible parties; (2) investigating responsible parties at higher priority sites; (3) preparing bankruptcy claims and overseeing contractor work conducted with receipts; (4) responding to requests for “No Further Action Status” reviews; (5) responding to spills; (6) screening of newly discovered sites; and (7) responding to public inquiries on sites.

F. Imminent Hazard Sites

The division and the EPA are committed to addressing imminent hazard sites when identified. Table 7 provides a list of sites where potential imminent hazards were reported, or where abatement activities continued, in FY 2017-18. Their location, site description, status and funding source are also provided.

Table 7. Summary of 27 Imminent Hazard Sites

<i>Site</i>	<i>City/County</i>	<i>Site Description</i>	<i>Status</i>	<i>Funding Source</i>
Armour Street Dye Area	Davidson/Mecklenburg	DWM received a call from a residential property owner that had witnessed employees of a former dye facility historically (pre-1950's) dumping wastewater at the end of Armour Street. The alleged dumping area is upgradient from the home and is currently wooded with residential properties backing up to the wooded area.	DWM has visited the area various times to attempt to collect a surface water sample but insufficient water was available. No visible remnant of contamination was apparent. DWM installed three temporary monitoring wells in fall 2017 to assess groundwater and determine if a release has occurred. No contaminants of concern were detected. No further action deemed warranted at the site.	DWM
Austin Foods	Cary/Wake	Former industrial property with off-property groundwater contamination toward a park and a residential area. A portion of the source property now under a North Carolina brownfields agreement.	DWM collected soil gas and groundwater samples from downgradient parcels in the spring of 2018 to evaluate the potential for hazardous vapors to enter homes or contaminated groundwater to affect a neighborhood park. Based on the results, no further work is not planned at this time.	DWM
Bragg Blvd Solvents	Fayetteville/Cumberland	Elevated concentrations of contaminants in groundwater exceeding structural vapor intrusion screening criteria. Groundwater contamination extends over multiple properties.	Work began at this site in FY 2016-17 and continued into FY 2017-18. DWM tested soil vapor and groundwater at various properties to try to determine source. The property owner for one of the suspect source sites would not provide access. Testing at the other properties did not indicate exceedances of vapor screening numbers. The owner that refused access was advised of the risks.	DWM

Site	City/County	Site Description	Status	Funding Source
Chemical and Solvents, Inc.	Greensboro/ Guilford	Chlorinated solvents are present in both soil and groundwater at the site. Potential for vapors from groundwater contamination to migrate into homes in a nearby residential area.	DWM conducted a groundwater and soil gas investigation in the residential area. Trichloroethylene was detected in soil gas below two houses. The EPA is in the process of planning a large-scale sampling event to determine vapor intrusion potential in the residential area.	DWM/EPA
Corning Glass Works	Raleigh/ Wake	Chlorinated solvent contamination from historic electronics manufacturing operations.	DWM split-sampled off-property soil gas and groundwater samples collected by the remediating party's consultant for the site. Results confirmed soil gas was below structural vapor intrusion screening levels.	DWM
Cinderella Knitting Mills	Kings Mountain/ Cleveland	Former textile mill with elevated perchloroethylene (PCE) levels in soil and groundwater. Concerns for potential for structural vapor intrusion for the on-property building and off-property homes. Groundwater contamination extends off the property on to a city park which is bordered by a stream accessible to the public.	In May 2016, DWM conducted soil gas sampling around the exterior of the on-site building and along the property edge in the direction of residential properties to evaluate structural vapor intrusion potential. The levels exceeded vapor screening levels. DWM also sampled surface water and found concentrations exceeded state surface water standards. The EPA conducted indoor air testing in the plant building. The responsible party has filed for bankruptcy. The EPA and DWM have filed proofs of claim to attempt to secure funds through a bankruptcy settlement. In FY 2016-17, due to elevated levels in indoor air, the EPA installed a vapor mitigation system. DWM conducted additional soil gas sampling at the surrounding residences to determine vapor intrusion potential in the residences. In August 2018, a follow up soil gas investigation was conducted using passive diffusion samplers. A final lab report detailing the results of this sampling is due in November 2018.	DWM/EPA

Site	City/County	Site Description	Status	Funding Source
Crowders Mountain State Park	Gastonia/ Gaston	Large disposal of drummed wastes located on residential and park property. Nearby homes have water supply wells.	In FY 2015-16, DWM removed some of the drums. Due to large volume, DWM did not have the resources to remove all the drums and contaminated soil. The EPA completed the waste and soil removal. DWM also conducted limited groundwater remediation to reduce the threat to private wells. DWM continues to monitor groundwater while the remediation takes affect and continues to test nearby water supply wells. A new round of groundwater samples will be collected in November 2018. Additional private well sampling will be conducted at the same time.	EPA/ DWM
Metrolina Warehouse	Davidson/ Mecklenburg	The breaching by erosion and wildlife of an earthen cap resulted in the release of asbestos-containing material (ACM) from a former manufacturing facility onto a public road. ACM is reported to have been removed from the manufacturing location and used as fill at nearby residential properties. ACM was identified on nearby residential properties. The EPA has been the lead in addressing the situation with DWM support.	DWM requested that the EPA conduct a Removal Site Evaluation (RSE), to include soil testing of potentially affected residential properties. After completing the investigation, the EPA conducted a waste removal action at 23 residential properties. The EPA and DWM have held several public meetings and have had frequent meetings of with the Town of Davidson, N.C. DHHS, N.C. DOT and the property owners to plan and coordinate work and public communications. A new public meeting will be conducted in November 2018.	EPA/ DWM
Delburg Street Solvents	Davidson/ Mecklenburg	A former dye facility on Delburg Road (pre-1950's) is being redeveloped by with assistance from the N.C. Brownfields Program. Soil gas samples were collected by the brownfields prospective purchaser as part of their obtaining a brownfields agreement by the state (release from liability). Solvents in soil gas samples indicate a release of contamination. The prospective purchaser is bound by the agreement to make the property safe but does not have an obligation to address off property areas of contamination.	DWM installed and sampled monitoring wells along with soil gas points in the fall of 2017. No contaminants of concern were detected in these wells or soil gas points.	DWM

Site	City/County	Site Description	Status	Funding Source
Eastway Drive & The Plaza Solvents	Charlotte/Mecklenburg	This site is an area of solvent contamination located near multiple current and former dry-cleaning sites some of which are participating in the state's Dry-Cleaning Solvent Recovery Act (DSCA) Program. These dry-cleaning sites may be in part, if not entirely, responsible for the contamination. Many residential properties are found within a 1500-foot radius of the site. The contaminant concentrations pose a potential risk of structural vapor intrusion (VI) for residential and commercial properties.	DWM's Inactive Hazardous Sites Branch and DSCA Program are conducting various groundwater and soil gas testing to determine extent and potential for exposure. Work is ongoing with two soil gas data reports having been submitted by the DSCA program to the IHSB on September 21, 2018 and on September 25, 2018, respectively. Based on the IHSB review, further VI assessment is likely warranted to evaluate indoor air quality inside existing residential structures.	DWM
Fallies Drycleaning	Mocksville/Davie	The former site of a commercial drycleaner with perchloroethylene (PCE) in soil above state clean up goals. One residence and one business appear to be in the direct downgradient pathway of the potential groundwater contaminant plume.	DWM conducted a limited groundwater assessment within the area of the nearest businesses and residences during FY 2015-16 and FY 2016-17. PCE levels in groundwater warranted a soil gas investigation to evaluate risk to nearby homes of indoor air contamination. Work was completed in October 2017. As the laboratory analytical results indicate no vapor concentrations above action levels, no further work is planned.	DWM
Gentex Printing	Rocky Mount/Nash	Historic fabric printing operations at site left chlorinated solvents in groundwater.	DWM collected sub-slab soil gas and surface water samples in fall 2017. Results indicate sub-slab concentrations exceed screening levels. Further work is planned for next fiscal year after other higher risk sites are addressed and new money is available.	DWM
Glen Raven Mills	Burlington/Alamance	Former textile mill had a release of chlorinated solvents to groundwater from plant operations which posed a possible vapor intrusion threat to nearby homes.	Groundwater and soil vapor testing was conducted in spring 2018. Groundwater contamination remains at the site, but no unacceptable vapor intrusion risks were identified at locations where sampling access permission was provided. Owners not providing permission were advised of the risks.	DWM

Site	City/County	Site Description	Status	Funding Source
Harwell Road Septic Pit - Lee Motor Works - Ashe Pattern - Country Acres - Harwell Estates Mobile Home Park	Gastonia/ Gaston	Cluster of sites/areas with similar groundwater contamination. Six residential water supply wells were contaminated with solvents above drinking water standards.	Starting in FY 2015-16 and continuing, the EPA and the DWM have taken several actions. A water supply well survey and several rounds of water supply well sampling have been conducted. In February 2017, analytical results for samples collected from the Harwell Estates Mobile Home park supply wells showed the wells exceeded the drinking water standards. DWM provided bottled water while the EPA installed a temporary treatment system in March 2017.	EPA/ DWM
Hometown Cash and Carry	Greensboro/ Guilford	Chlorinated solvents in groundwater possibly related to a former furniture stripping operation. Contaminant plume may be co-mingled with contamination from nearby dry-cleaning facility.	DWM collected soil gas samples in fall 2017. Based on results, the source of contamination appears to be nearby dry-cleaning business. Site transferred to DWM's DSCA Program for further evaluation.	DWM
King Street Solvent Contamination	Burlington/ Alamance	Chlorinated solvents discovered in groundwater during closure of home heating oil UST.	DWM collected soil gas and groundwater samples from a residential property in February 2018. Results show no exceedances of vapor screening concentrations. No further work planned at this time.	DWM
Makepeace Property	Sanford/Lee	Historic operations at the site left chlorinated solvents in the soils and groundwater.	DWM installed passive diffusion bags in groundwater monitoring wells and obtained access permission from surrounding owners to conduct surface water testing on their properties. Will proceed with surface water sampling in fall 2018 to determine extent of plume.	DWM
Parris & N. Main St. Solvents	High Point/ Guilford	Chlorinated solvents in groundwater at concentrations exceeding structural vapor intrusion screening levels. Source unknown.	DWM conducted soil gas and groundwater sampling in fall 2017. Results of soil gas sampling indicate no structural vapor intrusion issue. No further sampling planned at this time.	DWM
Peele's Service Station/ Honora Manning	Jamesville/ Martin	Chlorinated Solvents detected in residential well during UST site investigation.	DWM collected soil gas samples in fall 2017. No unacceptable risks identified.	DWM

Site	City/County	Site Description	Status	Funding Source
Perry Builders-Mobile Tract	Henderson/Vance	Chlorinated solvents found in residential water supply well. Source of contamination unknown.	Based on results of previous investigations performed by DWM, treatment system was installed on the contaminated well. Additional soil and vapor sampling was performed by DWM. Results of sampling conducted on residential property did not identify unacceptable contaminant concentrations in soil or vapor.	DWM
Southside Road Incident	Lincolnton/Lincoln	Residential well in a large neighborhood with perchloroethylene (PCE) above the drinking water standard.	The EPA and the DWM conducted sampling of residential wells. The EPA provided alternate water to affected home wells. In January 2017, a trailer park well was found to exceed the drinking water standard. DWM did not have the resources to address the connection. In May 2018, DWM was able to fund the connection of the trailer park to	EPA/DWM
T. L. Herring	Wilson/Wilson	Chlorinated solvents are present in groundwater at concentrations exceeding structural vapor intrusion screening levels. Source unknown.	DWM collected sub-slab soil gas samples in spring 2018. Results indicated no unacceptable risks. Site discovered to be a dry-cleaning solvent release and was transferred to DSCA Program.	DWM
Trinity American Corp.	Glenola/Randolph	Chlorinated solvents in groundwater from an on-site landfill and hexavalent chromium in soils from boiler blowdown liquid.	DWM sampled surface water for hexavalent chromium, as well as groundwater and water supply wells for chlorinated solvents in FY 2017-18. Hexavalent chromium was not detected in any samples. The risk of vapors from groundwater to indoor air was below screening levels, and wells will continue to be monitored next	DWM
28 th Street TCE	Winston-Salem/Forsyth	Trichloroethene (TCE) groundwater contamination in residential area from unknown source may pose threat from vapors migrating into buildings.	DWM conducted indoor air sampling. Results indicated no unacceptable risk. DWM continues to monitor groundwater concentrations near residences.	DWM

Site	City/County	Site Description	Status	Funding Source
Washington Street Incidents	Graham/Alamance	Chlorinated solvents were found above the state's ambient groundwater standards in a residential area. The source of the contamination had not been determined. Groundwater contamination exceeds the non-residential screening levels for structural vapor intrusion potential.	DWM collected groundwater samples and attempted to collect soil gas samples to evaluate structural vapor intrusion risk. The concentrations in groundwater were significantly reduced from previous testing. Due to extremely shallow water table levels, soil gas samples were unable to be collected. While contaminants in the groundwater have reduced, they still exceed screening levels for structural vapor intrusion risk. The owner of the source property did not agree to additional sampling. DWM will evaluate whether any off-property testing is needed using passive gas samplers.	DWM
Westinghouse Electric Meter & Light	Raleigh/Wake	Chlorinated solvents in groundwater have more recently been found to exceed structural vapor intrusion screening levels by an owner of one portion of the former plant site. The site has been subdivided and is been used for multiple purposes.	Work began in previous years and continued into FY 2017-18. DWM installed and sampled eight groundwater monitoring wells around the former manufacturing building for the site. The results confirmed lower levels of chlorinated solvents. Soil gas samples were collected in nearby areas around six businesses (restaurant, hotels and other businesses) posing higher potential for structural vapor intrusion. These properties were part of the former plant property. All samples had acceptable results except one. Indoor air testing was then conducted on a hotel where elevated soil gas concentrations were present. The results of the indoor air samples were below acceptable risk levels. Several indoor air samples were also collected in the former plant building by the owner. One sample in east corner of the building failed acceptable risk targets. The owner adjusted the HVAC to introduce more fresh air. Subsequent sampling showed the area to now meet acceptable vapor targets. Additional groundwater testing was also conducted in February 2018. DWM has since been able to locate a potential responsible party who is beginning to conduct additional assessment at the site. A developer seeking a brownfields agreement is also	DWM/ Owners

Site	City/County	Site Description	Status	Funding Source
			doing some limited assessment work.	
Winterville Machine Works	Winterville/Pitt	Active plating shop found to have trichloroethene (TCE) in groundwater exceeding structural vapor intrusion screening levels.	Work began in FY 2016-17 and continued into FY 2017-18. DWM conducted groundwater sampling at three residences, one business and one church to evaluate potential for vapors to enter buildings. Only the church exceeded screening targets. Representatives of the church would not provide access to further evaluate the vapor intrusion potential into the building. The responsible party is	DWM

G. Summary of the Inactive Hazardous Sites Cleanup Fund (Fund 6372 and 6379) and the National Priorities List Cost Share Fund (Fund 6375)

Inactive Hazardous Sites Cleanup Fund

Fund 6372

FY 2017-18

Beginning Cash Balance	\$199,539
Deposits (FY 2017-18)	
Appropriations	\$400,000
No Further Action review fees	\$17,500
Furniture Brands bankruptcy	\$27,872
Total Deposits	\$445,372
Expenditures (FY 2017-18)	
Orphan priority site sampling/remediation/alternate water supplies	\$550,660
Total Expenditures	\$550,660
Ending Cash Balance	\$193,991
Obligations	
Bottled water contract encumbrance	\$20,752
Laboratory contract encumbrance	\$5,040
Kysor bankruptcy funds (dedicated to Charlotte site)	\$76,192
Furniture Brands bankruptcy funds (dedicated to 4 sites)	\$83,211
Total Current Obligations	\$185,195
Effective Cash Balance at End of FY 2017-18	\$8,796
Orphan Cleanup Cost Requirements (see Chapter II for more details)	
Funds needed for 349 higher priority orphan sites identified	\$253,201,943
Funds needed for all orphan sites thus identified (393 sites)	\$285,124,251

Additional Funds from Bankruptcy Proceedings

Since initiating bankruptcy recovery actions, the division has recovered more than \$18 million in funds for assessment and remediation of sites. Payments out of a bankruptcy proceeding must go into a special trust account to be used only for the specific sites identified in the bankruptcy settlement agreement. Some of the settlement funds are also held in private escrow accounts.

**Revenue Dedicated to the Pre-Regulatory Landfills
Fund 6379
FY 2017-18**

Beginning Cash Balance	\$31,491,884
Deposits (FY 2017-18)	
Solid Waste Disposal Tax Revenue (actual total income)	\$10,113,746
Administrative expense overcharge refund	\$0
Total Deposits	+\$10,113,746
Expenditures (FY 2017-18)	
Contracts	\$9,745,553
Local government reimbursement	\$590,284
Transfer to DWM Solid & Hazardous Waste Programs	\$500,000
Transfer to City of Havelock	\$1,000,000
Operating budget:	
PRLF operating budget	\$746,990
Inactive Hazardous Sites operating budget	\$335,604
Combined operating budget	\$1,082,594
Total Expenditures	<u>-\$12,918,430</u>
Ending Cash Balance	\$28,687,200
Total Current Contract and Local Government Obligations (Encumbrances Not Yet Paid)	\$32,009,926
Current Effective Cash Balance	(\$3,322,726)

A portion of a solid waste disposal tax established by the legislature is dedicated toward contracting assessment and remediation at uncontrolled pre-regulatory landfills and to fund staff to implement the program. These funds are also used to fund a portion of the staff overseeing work at other inactive hazardous waste sites. The graph on the following page shows how expenditures are depleting the current surplus, which accumulated during the early years when the program was conducting mostly lower cost assessment work. Active remediation is now underway at 11 sites and the program's rate of disbursements is rising.

Figure 1. Pre-Regulatory Landfill Program Funds

**National Priorities List Cost-Share Fund
Fund 6375
FY 2017-18**

Estimated cost of federal trust fund/North Carolina cost-share cleanups	\$123,837,291
North Carolina's 10 percent cost-share for pending/ongoing cleanups	\$12,383,729*
Total fund disbursements for cost-share payments	\$8,938,728
Current balance	\$4,985,101
Encumbered amount of the fund balance for cost-share payments	\$2,412,008
Encumbered amount for operation and maintenance contract	\$195,434
Effective Cash Balance	\$2,377,659

*Cleanup cost estimates are not yet available for all sites. The cost-share figure will increase as cost estimates become available. Other sites may be added to the NPL that will require a state cost-share. This account is also used to pay for the state's operation and maintenance obligations at these sites. The fund has no continuing source of income.

Chapter V: Solid Waste and Materials Management

This consolidated annual report is required by the North Carolina General Statute 130A-309.06(c)(1) through (15). The report combines annual reports by the N.C. Department of Environmental Quality, including the Solid Waste Management Report, Scrap Tire Disposal Account Report, White Goods Management Report, Electronics Recycling Report and Abandoned Manufactured Home Report. This report also includes information from the N.C. Department of Transportation regarding its use of recycled materials in contracts and data from the N.C. Department of Administration on bid procedures and purchases of sustainable and efficient supplies and materials.

Solid waste and materials management information in this report comes from 652 local government annual reports (100 counties and 55 municipalities) and more than 350 solid waste management facilities, including out-of-state facilities. These reports represent activities related to the management of solid waste for the period of July 1, 2017 through June 30, 2018.

A. Executive Summary

The N.C. Department of Environmental Quality shall report to the Environmental Review Commission annually on the status of solid waste management efforts in the state.

The state's Division of Waste Management and Division of Environmental Assistance and Customer Service report that the population in North Carolina increased by approximately 1.3 percent in FY 2017-18 (July 1, 2017 - June 30, 2018), while the amount of waste disposed in municipal solid waste landfills and construction and demolition landfills edged up slightly from the previous fiscal year. A total of 11,651,999 tons of solid waste generated during FY 2017-18 in North Carolina was disposed at in-state and out-of-state facilities, which represents an increase in disposal of 417,641 tons (or 3.7 percent) from the previous fiscal year.

Last fiscal year, North Carolina began requiring the recording of the material removed from Duke Energy coal ash impoundments. In that first year, 743,822 tons of excavated material was disposed in lined municipal solid waste (MSW) landfills in Georgia and Virginia. In FY 2017-18, excavated coal ash disposed in out-of-state landfills amounted to 1,295,807 tons. Analysis of the waste stream shows that if waste generated in past decades, such as coal ash and other environmental cleanup sites, is included in the calculations along with waste generated from households and businesses waste disposal in FY 2017-18 equals 11,651,999 tons.

North Carolina's overall reliance on landfilling was not significantly changed over the previous year. However, without the addition of coal ash, the waste disposal per capita rate for FY 2017-18 was 1.07 tons per person per year, which was an increase from FY 2016-17 when the rate was 0.96 tons per capita or an increase of 420,636 tons of waste. The additional coal ash excavated from impoundments and placed into landfills resulted in an overall waste disposal rate of 1.13 tons per capita disposed of in FY 2017-18. North Carolina continues to dispose of solid waste at a lower rate relative to the last decade, where the rate was as high as 1.36 tons of waste per person per year.

The movement of coal combustion residuals continues to be an important focus when evaluating disposal trends in North Carolina. Large waste quantities are increasingly being removed from the waters of surface impoundments at North Carolina power plants and transported to either landfills engineered to be protective of the environment and human health or to recycling facilities for reuse in construction products such as cement, concrete block and wall board.

Data used in this report, along with other subsidiary reports, is available online at [NC DEQ: FY17-18 N.C. Solid Waste and Materials Management Annual Report](#).

A. Key Findings

- The state per capita rate of waste, including coal ash disposed into municipal solid waste (MSW) and construction and demolition (C&D) landfills during this fiscal year, remained steady at 1.13 tons per person as compared to the previous year rate of 1.11 tons per person.
- Excluding the additional disposal of coal ash, the per capita disposal rate for MSW waste increased from 0.96 from the previous year to 1.07 tons per person this year, which amounted to an increase of 417,641 tons. The increased waste generation may be attributable to the continuing improvement of economic conditions as well as the continued recovery efforts resulting from previous tropical storms Bonnie, Hermine and Matthew. The department's Division of Environmental Assistance and Customer Service working with the Division of Waste Management continued to play an important role in diverting waste from landfills by improving accessibility to recycling and recovery programs for more citizens and businesses, and by providing educational programs to local governments, businesses and the public.
- Disposal of 643,808 tons of excavated Coal Combustion Residuals (CCR) occurred during the fiscal year from Duke Energy coal ash impoundments, which was down from the previous fiscal year total of 1,295,807 tons.
- North Carolina MSW and Industrial landfill disposal amounted to 11.76 million tons in FY 2017-18.
- Waste disposed in North Carolina originating from South Carolina and Virginia was approximately 287,943 tons. In FY 2016-17, that quantity amounted to 258,815 tons.
- North Carolina landfills' remaining capacity equals approximately 29 years of municipal solid waste disposal capacity at the current rate of disposal.
- Industrial landfills reported disposal of 1,688,404 tons of waste, which is a decrease from 2,066,943 tons in the previous fiscal year. North Carolina industrial waste is predominantly from the electric energy industry (CCR) and producers of paper products (pulp and paper sludges).
- Coal combustion residuals were mined from an industrial landfill for reuse as synthetic gypsum in the production of drywall and more than 1 million tons was diverted from disposal for use as a mine reclamation project.

Departmental Considerations and Recommendations

- The General Assembly is encouraged to consider ways to support the increased recovery and recycling of wastes, which North Carolina manufacturers and material processors require to produce products within the state.

- The General Assembly is encouraged to consider evaluating the producer responsibility components of the state's electronics legislation to better support local recycling programs.

C. Solid Waste Management

The types of waste types handled at North Carolina facilities include municipal solid waste, industrial waste, construction and demolition waste, land-clearing waste, scrap tires, medical waste, compost and septage.

Coal combustion residuals, or CCR, generated at North Carolina's electric power plants, have received much study and attention because of the Coal Ash Management Act of 2014, which requires that the surface water disposal impoundments be removed and the ash be placed into lined landfills or recovered. In past years, CCR has primarily been disposed of into industrial landfills on site at power plants. Increasingly in North Carolina, CCR is being sent to recyclers, structural fills and MSW landfills. For additional information regarding CCR, please see the *Quarterly Report(s) to the N.C. Environmental Review Commission on Operations, Activities, Programs and Progress Relating to Coal Combustion Residuals Surface Impoundments*.

1. Municipal Solid Waste (MSW) and Construction and Demolition (C&D) Landfill Disposal

North Carolina disposed of a total of 11,651,999 tons of municipal solid waste generated during the fiscal year into MSW and C&D landfills within the state and out-of- state, which represented an increase of 420,636 tons of waste from the previous fiscal year. Figure 1 below displays the history of waste disposal since 1991. For each fiscal year, the tonnage figure represents the amount of waste material generated that year and placed in disposal facilities.

Figure 1. MSW and C&D 20-Year Disposal Forecast

Note: Population data source: <https://www.osbm.nc.gov/demog/county-projections> revision date 12/03/2018.

Methodology: Population for FY2017-18 uses the July 2018 population projection by the NC Office of State Budget and Management [OSBM]. The Actual historical population data is graphed using the most recent data provided in the 12/03/2018 data set.

In addition to normal MSW and C&D wastes, other post-industrial or business cleanups that are safely disposed into lined MSW landfills include petroleum-contaminated soils from leaking storage tanks, as part of the DWM's Underground Storage Tanks Section, and wastes from development at industrial facilities, as part of the division's Brownfield Program. In past years, the cleanup from Hurricanes Fran and Floyd created noticeable spikes in the amount of waste disposed into landfills. Some of the increase in FY 2017-18 waste disposal may be attributed to Hurricane Matthew. Waste disposed due to Hurricane Florence will be reported in the FY 2018-19 consolidated report.

A significant development in waste disposal since FY 2015-16 is due to the additional quantities of CCR excavated from impoundments managed by Duke Energy, so the residuals could be safely disposed of in lined MSW and industrial landfills, as required by the Coal Ash Management Act of 2014.

Figure 1 above also provides a second perspective on North Carolina's dependence on landfill disposal that includes both wastes generated during the current fiscal year plus

excavated coal ash material. It is unclear how long the use of MSW landfills for excavated impoundment CCR will continue. Tables related to waste disposal per county, facility and per capita, can be found in the following website: <https://deq.nc.gov/about/divisions/waste-management/waste-management-rules-data/solid-waste-management-annual-reports/fy17-18>

2. Coal Combustion Residual (CCR) and Product (CCP) Generation, Disposal and Reuse

Table 1 provides information on the disposition of coal combustion wastes that intersected with landfill disposal. The information is derived from reporting of the eight industries that generate ash at their coal-burning power plants across North Carolina.

Table 1. Coal Combustion Wastes and Landfill Disposal

Energy Generator Annual Reporting	Waste (tons) generated at power plants FY 2017-18		Ash (tons) excavated from impoundment
	Ash	FGD	
Total Produced	1,385,340	1,287,848	
Used in Structural Fill	69,491	0	2,075,736
Other Beneficial Uses	382,078	1,355,343	0
Disposed in Out-of-State MSW Landfills	3,581.75	0	618,437
Disposed in Industrial Landfills	853,332	221,009	3,489,935
Disposed in Basins	-	-	-

Recycling efforts continue to increase at industrial facilities statewide.

- Coal combustion product (CCP) in the form of ash is predominantly reused as an ingredient in cement.
- Flue gas desulphurization (FGD) residuals, or synthetic gypsum, is the primary ingredient in drywall.
- Fly ash, slag and bottom ash, can be used as construction materials such as gravel or fill.
- Session Law 2016-95, the Coal Ash Management Act revised, required that Duke Energy provide ash beneficiation projects capable of processing 300,000 tons of ash, reclaimed from surface impoundments, for cementitious products.
- Duke Energy has specified that three recycling sites will be located at the Buck Station (Spencer, N.C.), HF Lee Station (Goldsboro, N.C.) and Cape Fear (Moncure, N.C.).
- A total of 2,075,736 tons of CCP were used for permitted mine reclamation at the Chatham County Brickhaven Structural Fill.
- Duke Energy reported in FY 2017-18 that 1,355,343 tons of gypsum were sent to the drywall or wallboard industry for reuse.
- A total of 37,462.5 tons of gypsum was mined from the Belews Creek landfill in Surry County for reuse.

3. Solid Waste Tax

The N.C. Department of Revenue reported solid waste tax collection of \$19,797,229, which equates to 9,898,614 tons of taxable solid waste going into landfills within North Carolina and through transfer stations to landfills in neighboring states. The gap between reported disposed tonnage and tax-paid tonnage was due to waste at federally-owned landfills on military bases and some specific waste streams received at MSW facilities (for example, biosolids) that are exempt from the solid waste tax. In addition, the large amount of excavated CCR impoundment wastes were not taxed because they were not transferred through a permitted solid waste facility.

Revenue from the solid waste tax was distributed to:

- Inactive Hazardous Sites Cleanup Fund – 50 percent is used to fund the assessment and remediation of pre-1983 landfills.
- Local governments – 18.75 percent to counties and 18.75 percent to municipalities to assist local waste and materials management programs.
- General Fund – 12.5 percent.

Table 2 below shows the history of North Carolina's per capita disposal rate, including the impact of including excavated CCR on that rate. The table shows the baseline measurement of solid waste disposal in the benchmark years of FY 1990-91 and 1991-92 as well as the most recent 13 fiscal years. Two calculations were performed to determine per capita waste this fiscal year -- one showing disposal per capita for wastes generated during the fiscal year and the other including both generated waste plus excavated CCR.

Table 2. North Carolina's Per Capita Disposal Rate

Fiscal Year	Tons of waste disposed	NC population	Tons of waste per person in a year
2017-18 with excavated coal ash	11,651,999	10,283,255	1.13
2017-18 minus excavated coal ash	11,008,191	10,283,255	1.07
2016-17 with excavated coal ash	11,385,939	10,155,942	1.11
2016-17 minus excavated coal ash	9,707,057	10,155,942	0.96*
2015-16 with excavated coal ash	11,323,734	10,056,683	1.12
2015-16 minus excavated coal ash	10,579,912	10,056,683	1.05
2014-15	9,635,874	9,953,687	0.97
2013-14	9,273,571	9,861,952	0.94
2012-13	9,149,130	9,765,229	0.94
2011-12	9,443,380	9,669,244	0.98
2010-11	9,467,045	9,586,227	0.99
2009-10	9,395,457	9,382,609	1.00
2008-09	9,910,031	9,227,016	1.07
2007-08	11,284,712	9,069,398	1.24
2006-07	11,837,104	8,860,341	1.34
2005-06	11,765,183	8,682,066	1.36
1991-92 benchmark year	7,257,428	6,781,321	1.07
1990-91	7,161,455	6,632,448	1.08

*Figure for tons of waste *minus excavated coal ash* disposed per person during FY 2016-17 was incorrectly reported as 1.00 tons/person/year in last year's annual report. The figure in the chart above provides the corrected figure of 0.96 tons/person/year for FY 2016-17.

D. Municipal Solid Waste Landfill Capacity

The total remaining capacity of all North Carolina MSW landfills measures approximately 254 million cubic yards, equating to approximately 164 million tons, which is a reduction from last year. This estimate was calculated using 0.62 tons of waste per cubic yard of air space. The capacity does not include waste exported to out-of-state landfills. The state capacity equals 29 years of waste disposal if North Carolina's rate of landfill use remains steady at approximately 8.6 million tons per year. Continued efforts to increase recycling and material diversion should help the state maintain a strong landfill capacity. Much of the state's capacity is not available statewide due to permit conditions, franchise arrangements, service areas and distances. Although overall state capacity is sufficient, some regions have limited waste disposal capacity. Those areas may experience higher disposal costs and possible disruptions in service as facilities close or fuel costs make transport of waste to distant facilities prohibitive.

Tabulation of MSW and C&D landfill capacity can be found in the *2017-18 Landfill Capacity Report* online at: <https://deq.nc.gov/about/divisions/waste-management/waste-management-rules-data/solid-waste-management-annual-reports/fy17-18>.

1. Industrial Landfill Disposal

In North Carolina, 15 industrial landfills are permitted to receive various types of industrial waste, generally originating from on-site industrial complexes. All Industrial landfills except one are located where the waste is produced. The largest volume of waste disposed into industrial landfills is at electric power plants and consists of CCR. The paper product industry, which disposes of sludge and wood ash, is second by volume.

Tabulation of landfilled industrial waste can be found in the *2017-18 Landfill Capacity Report* online at: [NC DEQ: FY17-18 N.C. Solid Waste and Materials Management Annual Report](#).

2. Composting and Mulching

A total of 47 composting and an additional 16 mulching operations continued to divert organics from the municipal solid waste stream.

Composting operations diverted 18,469 tons of food residuals produced from industrial food processors with an additional 34,263 tons of yard waste, wood waste, biosolids and other wastes.

The combined composting and mulching operations managed more than 480,000 tons of feedstocks in FY 2017-18. Waste diversion through these operations continues to grow in importance. Currently, food waste diversion accounts for only 11 percent of feedstocks processed – an increase of 2 percent over last year. The facilities have available capacity to increase food waste diversion in North Carolina. Figure 2 below shows the fractions of materials used as feedstocks.

Figure 2. Feedstocks Composted/Mulched

3. Land Application

Septage waste land application is accomplished through staff permitting and compliance activities for more than 500 septage haulers, 184 septage detention (storage) and treatment (dewatering) facilities, and 116 land application sites (representing 1,897 acres). The majority of the land-applied waste is septic tank, portable toilet and restaurant grease trap waste; although, the program also assists waste generators with other wastes and by-products to determine if they are suitable for beneficial use through land application. Examples of beneficially reused waste include wood ash and tobacco dust. Best management practices are followed for each by-product to assure protection of public health and the environment, and after evaluation by staff, are included in the site operational plans.

Approximately 204,553,394 total gallons of domestic septage, grease septage and portable toilet waste was pumped in 2017 compared to an annual high of 230,430,662 pumped in 2016. The decrease in volume was from a decrease in the amount of grease septage. Figure 3 below shows the gallons of septage pumped per year.

Figure 3. Gallons of Septage Pumped Per Year

4. Medical Waste

During FY 2017-18, North Carolina maintained seven commercial medical waste treatment providers and 18 alternative treatment technologies approved for use in North Carolina.

Figure 4 below shows that the tonnage of medical waste treated at North Carolina's commercial waste treatment facilities decreased during the last fiscal year. Approximately 17,024 tons of medical waste from North Carolina and 7,080 tons from other states was treated at in-state medical waste treatment facilities. The amount of medical waste treated from North Carolina remained similar to that of the previous year; however, the amount of medical waste treated from other states experienced a 41 percent decrease from the previous year. Figure 4 does not show the medical waste generated or treated at medical facilities, such as hospitals and physicians' offices. Medical facility waste generation or treatment is regulated by the state's Department of Health and Human Services.

Figure 4. Tons of Medical Waste Processed by Fiscal Year

5. Household Hazardous Waste

Household hazardous wastes (HHW) are household chemicals that are poisonous or toxic, ignitable, corrosive or reactive with other chemicals. Among others, HHW includes items such as pharmaceuticals, household cleaners, pesticides, herbicides, fertilizers, pool chemicals, paints, automotive fluids and batteries. These chemicals are dangerous to human health and the environment. The Solid Waste Section recommends that citizens properly dispose of HHW at an approved collection site. Local HHW collection sites may be temporary, one-day events or permanent, ongoing collection sites.

Of the 100 counties in North Carolina, only 18 have permanent household hazardous waste collection sites (23 sites total). These 18 counties alone collected 5,399,801 pounds or about 2,449 tons of household hazardous wastes. The HHWs collected include: 3,516,069 pounds of various paints; 626,716 pounds of flammable liquids; 398,897 pounds of automotive fluids and filters; 74,262 pounds of various lead-acid, cadmium, lithium and alkaline batteries; 88,337 pounds of mercury containing fluorescent light bulbs; 155,854 pounds of compressed gases; 140,221 pounds of poisonous materials such as insecticides, herbicides and fungicides; 73,897 pounds of corrosive materials; 77,877 pounds of flammable solids; 57,504 pounds of oxidizing substances; and 107,990 pounds of other non-specific regulated hazardous wastes.

The counties also reported collecting 82,177 pounds of non-regulated, unspecific wastes and tallied 101,394 visits to permanent HHW facilities by residents.

Twenty-nine counties held 36 temporary, one-day collection events. Of the 36 temporary events held, 14 events reported total collections of 246,515 pounds (112 tons) of household hazardous chemical wastes.

Figure 5 below illustrates the amounts of HHW collected annually since FY 2010-11. A complete listing of locations of permanent HHW sites as well as one-day events can be found online at: <http://deq.nc.gov/about/divisions/waste-management/waste-management-permit-guidance/solid-waste-section/household-hazardous-waste>.

Although the collection of HHW is a costly endeavor, increasing numbers of local governments as well as civic organizations and private industries are arranging for this valuable service for North Carolina communities. Figure 5 below shows HHW in tons processed by fiscal year.

Figure 5. HHW in tons

6. Facility Inspections

The division is responsible for conducting inspections/site visits at the following variety of solid waste management facilities:

- C&D Landfills over MSW Landfills
- Closed Post-Closure Landfills
- Compost Facilities
- Construction and Demolition Landfills (C&DLF)
- Industrial Landfills
- Land Application Sites
- Land Clearing and Inert Debris Landfills (LCID)
- LCID Notification Landfills(open and closed)
- Coal Combustion Product Landfills and Structural Fills
- Compost Demonstrations
- Household Hazardous Waste Collection Sites
- Material Recovery Facilities
- Medical Waste Treatment Facilities and Incinerators
- Septage Detention and Treatment Facilities
- Septage (hauler) Firms
- Tire Monofills

- Municipal Solid Waste Landfills (MSWLF)
- Transfer Stations
- Treatment and Processing Facilities (T&P)
- Yard Waste Notifications
- Tire Processing /Collection Facilities
- White Goods Collection

7. Non-Facility Inspections and Evaluations

In addition to the types of facilities listed above, the department also inspects and evaluates for the following:

- Illegal Dumping: The department provides technical assistance to residents and businesses on the proper management, recycling or disposal of solid wastes. The department investigates complaints of solid waste illegal dumping, working to have the sites cleaned up and taking enforcement action when necessary for the protection of human health and the environment. The department also works with local governments to establish and maintain ordinances and programs that address littering and indiscriminate dumping in their communities.

- Disaster Response and Preparation: The department continues to work with local governments to foster the message that disaster preparedness is essential, given the history of storm destruction in North Carolina, and encourages communities to establish pre-approved temporary storage sites (DDS) for vegetative and demolition debris prior to an emergency or disaster. The department maintains a record of approximately 500 of these pre-approved temporary debris sites. Beginning in late September 2016, the department assisted with preparation for Hurricane Matthew by updating and improving the GIS map of pre-approved sites to provide it to the N.C. Department of Public Safety's Division of Emergency Management and initiated the evaluation of new DDS to prepare for debris clean-up efforts. The department assisted with response and clean-up beginning immediately

following the storm and continued through August 2017. It evaluated and coordinated the review of 56 new DDS with the State Historic Preservation Office and Natural Heritage Program, and coordinated with local governments, and later FEMA, for the activation and subsequent closure of 91 pre-approved DDS. The department also provided technical assistance for the proper disposal of storm debris, and worked with the state Department of Agriculture and Consumer Services and landfill operators to assist with the proper disposal of animal mortality.

- **Tax Certifications:** The department processes certification applications for special tax treatment of facilities and equipment used in recycling/resource recovery or from a solid waste at no cost to the applicant. Figure 6 below shows the number of applications approved and received for the past seven years. The DEQ has recently made internal changes to the process to reduce paper waste and expedite the processing time of applications.

Figure 6. Tax Certification Applications Received and Approved

8. Facility Operator Training and Public Outreach

The Solid Waste Section is committed to the protection of public health and the environment through education, inspections and compliance, and environmental monitoring. The section has a long-standing history of promoting training for both the regulated community and the public as required by statute as well as through technical assistance, collaboration, outreach activities and customer service. Below is a list of training opportunities the section provided this year:

- Landfill operators and managers training,
- Transfer facility operators training,
- Septage firm operator training,
- Septage annual operator training,
- Disaster debris management presentations and workshops,
- Regional roundtable discussions and technical assistance when requested,
- Coal Combustion Residuals landfill operator and manager training,
- N.C. Solid Waste Enforcement Officer Association (NC SWEOA), N.C. Solid Waste Association of North America (SWANA), N.C. Composting Council Conference (NCCC) and Marine Debris Symposium Presentations,
- Review and approval of continuing education units for solid waste operator and manager recertification, and
- Internal development training for staff, (i.e. Basic Environmental Crimes Course, USCC Compost Operations Training Course and Quarterly Section Training).

E. Local Government Waste Reduction Activities and Recycling Markets

Solid Waste and Materials Management Annual Reports received from local governments provide data on public source reduction, reuse, recycling and composting activities statewide as well as other aspects of solid waste management. Data from these reports helps produce a picture of waste reduction, recycling and materials management efforts in North Carolina. This data offers information that helps gauge the breadth and relative effectiveness of local government programs in diverting materials from disposal and delivering them to industry for reprocessing. Data from these annual reports also helps document the trends in recycling and reuse program implementation and the evolving nature of public materials recovery efforts in North Carolina.

1. Source Reduction and Reuse Programs

Operating a source reduction or local reuse program can be a cost-effective way to help citizens reduce the amount of solid waste that is discarded. These programs are typically popular with residents and have the potential to be a low-cost opportunity to engage the community, creating awareness about strategies that can be used to reduce the cost of disposal. Despite these benefits, only a minority of local governments operate these programs. In general, waste prevention through source reduction and reuse programs does not seem to be a high priority for most communities.

Table 3 below examines the types of source reduction and reuse programs operated by local governments over the past five years. The total number of local governments operating a source reduction and/or reuse program during FY 2017-18 dropped by one

when compared to the previous year. This fiscal year, 92 communities reported operating a program to help their residents reduce waste production or reuse materials.

Table 3. Local Source Reduction/Reuse Programs, FY 2013-14 to FY 2017-18

<i>Program Type</i>	<i>FY 2013-14</i>	<i>FY 2014-15</i>	<i>FY 2015-16</i>	<i>FY 2016-17</i>	<i>FY 2017-18</i>
Backyard Composting Programs	52	49	42	40	40
Source Reduction Programs	71	73	71	65	59
Public Reuse Programs	46	45	41	40	40
Total Local Governments with Source Reduction or Reuse Programs	108	108	94	93	92

2. Local Government Recovery

Tables 4 and 5 below document local government materials recovery operations over the past 10 years. When compared to the previous year, local government recovery showed a slight decrease in FY 2017-18. This decrease can mostly be attributed to the return of more normalized recovery of organic materials with no significant storm events occurring during the fiscal year. The previous year (FY 2016-17) saw temporary gains in the recycling of organic materials from vegetative debris generated by Hurricane Matthew. Total recovery results from the past decade show a picture of relatively steady and generally improving performance. This is best illustrated by the change in the per capita recycling rate over time, which has increased at an average rate of 1.8 percent since FY 2007-08. Local government recovery data reflects a mature public recycling system with a base level of programs, services and public participation that is holding its own in terms of material capture, even as the “evolving ton” of traditional recyclables generated in households becomes lighter over time. Highlights from Tables 4 and 5 will be examined in greater detail throughout this chapter.

Table 4. Local Government Recovery (Tons) FY 2008-09 through FY 2012-13

Material	FY 2008-09	FY 2009-10	FY 2010-11	FY 2011-12	FY 2012-13
Total Paper	342,008	343,031	347,622	344,758	321,819
Total Glass	69,446	75,124	86,163	96,819	117,237

Recovery Ratio (Recycling: Disposal)	0.13	0.13	0.14	0.16	0.15

* Includes white goods, aluminum cans, steel cans and other metals.

** Includes yard waste, pallets, wood waste and food waste.

*** For FY 2000-01 through FY 2008-09, Special Wastes includes electronics, used oil, oil filters, antifreeze, paint and batteries. Beginning in FY 2009-10, Special Wastes excludes electronics and includes recovery from the programs described in the Special Waste Management section.

**** For FY 2010-11 and beyond, the tons of tires listed as recovered includes only those tires originating from within North Carolina that were processed in North Carolina. Data on the recovery of North Carolina-originated tires that were exported outside of the state is not available. In FY2009-10, the tire recovery figure inadvertently included some tires from out-of-state sources. In fiscal years prior to FY 2009-10, the tires figure reported included all tires recovered at the private tire facilities in North Carolina, including those tires received at those facilities from sources outside of North Carolina.

† Construction and Demolition Debris Tonnages, Total Recovery and Per Capita Recovery for FY 2009-10, 2010-11 and 2011-12 were all revised in 2013 as a result of decreased Construction and Demolition Debris Recovery due to reporting errors. This change also resulted in a revised Recycling: Disposal Recovery Ratio for FY 2009-10.

Table 5. Local Government Recovery (Tons) FY 2013-14 through FY 2017-18

Material	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18

*** For FY 2000-01 through FY 2008-09, Special Wastes includes electronics, used oil, oil filters, antifreeze, paint and batteries. Beginning in FY 2009-10, Special Wastes excludes electronics and includes recovery from the programs described in the Special Waste Management section.

**** For FY 2010-11 and beyond, the tons of tires listed as recovered includes only those tires originating from within North Carolina that were processed in North Carolina. Data on the recovery of North Carolina-originated tires that were exported outside of the state is not available. In FY2009-10, the tire recovery figure inadvertently included some tires from out-of-state sources. In fiscal years prior to FY 2009-10, the tires figure reported included all tires recovered at the private tire facilities in North Carolina, including those tires received at those facilities from sources outside of North Carolina.

3. Recovery of Particular Materials

Public recycling programs play an important role in providing recovered materials to the supply chain for private manufacturing. Figure 7 below provides a material-specific look at those materials diverted from disposal to economic use by local government recovery operations in FY 2017-18.

Figure 7. Characterization of Local Government Recovery

The single largest category of material recovered by local governments continues to be organics. This category includes vegetative debris, clean wood (unpainted and untreated dimensional lumber), pallets, food waste and oyster shells. The recovery of vegetative debris or yard waste is accomplished through public and private mulching and composting, though boiler fuel and other energy markets are also an important destination for yard waste collected by local governments. For a detailed look at the management of yard waste in FY 2017-18, please see the section titled *Yard Waste Management* later in this chapter. The annual recovery of organic materials can be erratic because yard waste recovery can vary widely from one year to the next due to weather conditions and storm events. During FY 2017-18, organics constituted just over 46 percent of total local government recovery. Fiber, or paper products, and tires were the next two largest categories of materials recovered, contributing 21.8 percent and 9 percent, respectively.

4. Recovery of Traditional Materials

Traditional recyclable materials are the items or materials that most citizens think of when reflecting on recycling. These materials include fiber or paper (corrugated cardboard, magazines, newspapers, office fiber and residential mixed paper) and containers (aluminum beverage cans, glass bottles and jars, plastic bottles and containers, and steel food containers). These materials are common in households, though they are also found in the workplace, bars, restaurants and away-from-home settings such as parks and other public venues.

In FY 2017-18, recovery of traditional recyclable materials by public recycling programs remained virtually steady at 545,282 tons, with only a 0.4 percent increase compared to

the previous year. The maintenance of this recovery level is largely the result of increased recovery of corrugated cardboard, balanced by small declines in the recovery of other paper grades and containers. The increase in residential recovery of corrugated cardboard is perhaps driven by the increase of packaging generated from residential online shopping. In addition, it is possible that more aggressive recycling of these materials was employed as a result of better market values for corrugated cardboard compared to other recyclable commodities during FY 2017-18, as explored in the *Recycling Markets and Prices* section of this chapter. At just over 356,000 tons recovered, paper recycling by local governments was the highest recorded since measurement began. The increase in paper recycling is particularly notable since newspaper recycling continued to decline in 2017-18 based on the decreased circulation of newspapers and magazines across the country.⁵

For the first time since tracking these figures, container recovery for FY 2017-18 declined compared to the previous year at 189,000 tons. Factors impacting container recycling include continued efforts by consumer product manufacturers to reduce the weight of packaging, particularly plastic bottles and metal cans, and decisions made by consumer product brand owners to move products from being packaged in cans and jars towards increasingly popular flexible packaging such as pouches. The overall changing make-up of traditional materials recovery is known in the recycling industry as the “evolving ton,” a phenomenon not unique to North Carolina. Figure 8 documents the trend in the recovery of traditional materials over the past 18 years.

⁵ The decline in paper generation can be seen in statistics provided by the American Forest and Paper Association, which documents a fall in the available paper supply from 100,665,000 million tons in 2006 to 77,895,000 tons in 2015, a drop of 23 percent – see: <http://www.paperrecycles.org/statistics/paper-paperboard-recovery>.

Figure 8. Traditional Recyclable Material Recovery FY 2000-01 to FY 2017-18

5. Recovery of Construction and Demolition Materials

Local government recovery of construction and demolition (C&D) debris includes the capture of materials generated by construction and/or demolition activities. Materials in this waste stream include shingles, vinyl siding, sheetrock, carpet and aggregate (brick, block and other rubble). Clean lumber and wooden pallets, corrugated cardboard and scrap metal may also be generated because of construction and demolition activities, though for the sake of this report when these materials are recycled by local governments they are included in categories for organics, metal and paper.

Local governments have increasingly looked to the C&D waste stream for recycling success, and this has increased as new home construction remains strong across the state. Two counties – New Hanover and Pitt – are in their second year of operating new C&D processing facilities for sorting recyclable materials such as cardboard, clean wood and scrap metal from mixed construction and demolition waste. Recycling efforts focused on the C&D waste stream can yield large tonnage results. Public C&D recycling tons decreased in FY 2017-18 with 104,654 tons reported as recycled. Approximately half of C&D recycling in FY 2017-18 can be attributed to the recovery of aggregate at just over 58,697 tons. This material is relatively easy to recover at disposal facilities such as C&D landfills and it can provide substantial cost avoidance when processed into a gravel-substitute due to the decreased need to purchase new gravel. Figure 9 illustrates the change in the amount of C&D materials captured by public programs since FY 2006-07.

Figure 9. Public C&D Recycling (Tons) FY 2006-07 to FY 2017-18

6. Plastic Recycling in North Carolina

Total plastic recycling by local governments in North Carolina declined during FY 2017-18 for the second year in a row since the disposal ban on plastic bottles became effective on Oct. 1, 2009 – down from 42,567 tons in FY 2016-17 to 38,388 tons in FY 2017-18. This decline mirrors a national trend, reflected in recent annual reports on post-consumer plastic bottle recycling, prepared by the Association of Plastics Recyclers and the American Chemistry Council. The 2017 report⁶ illustrates three years of declining plastic bottle recycling since a peak in 2014. One potential factor leading to decreased plastic recovery could be the continued ‘light-weighting’ of Polyethylene Terephthalate (PET) and High-Density Polyethylene (HDPE) bottles by manufacturers. Figure 10 illustrates the public recovery of plastic over the past 18 fiscal years.

⁶ 2017 United States National Postconsumer Plastics Bottle Recycling Report – see: <https://plastics.americanchemistry.com/Reports-and-Publications/National-Post-Consumer-Plastics-Bottle-Recycling-Report.pdf>.

Figure 10. Plastics Recovery (Tons) FY 2000-01 to FY 2017-18

The combined number of plastic bottles made of PET and HDPE represent approximately 84 percent of all plastic materials recovered by local governments in FY 2017-18. Containers made of Polypropylene (PP) and the collective recovery of non-bottle plastic containers such as cups, tubs and 'clam-shell' style plastic containers (collectively known as Other Plastic Containers) along with the recovery of larger bulky rigid plastic durable items such as buckets, totes and carts are together becoming an increasingly important aspect of plastics recycling in North Carolina. Figure 11 provides a more detailed examination of the recovery of the different types of plastic materials over the last seven fiscal years.

Figure 11. Plastics Recovery (Tons) by Type FY 2011-12 to FY 2017-18

7. Collection of Commingled Recyclables

The nature of public recycling collection has changed substantially during the past decade, with the public recycling system moving from the collection of source-separated (sorted) materials to the collection of commingled or mixed recyclables. The recycling industry uses the term commingled to describe when commodities of different types are mixed together for collection and processing. The collection of mixed recyclables is commonly known as single-stream recycling. The advent of single-stream recycling has provided substantial benefit to the public recycling system. Benefits include increased collection efficiency and public participation due to ease of use. The transition to a single-stream collection system has been enabled by the establishment of mechanized Materials Recovery Facilities (MRFs), where mixed recyclables are processed, sorted and prepared for sale into the recovered materials marketplace. North Carolina is home to 17 MRFs that process the recyclables collected by public recycling programs.

As communities across the state moved to the collection of mixed recyclables, they have become less connected to or aware of the constituents in the mixed or commingled materials that their programs collect. Constituents are the traditional recyclable materials – cans, bottles and paper – that are discussed in the earlier section, titled *Recovery of Traditional Materials*. When local governments submit their Solid Waste and Materials Management Annual Reports to the state, they are asked to provide data on the amounts and types of recyclable materials that they have collected. Increasingly, the materials are not reported by individual commodity but instead as “commingled” tons. Figure 12 examines the reporting of commingled tonnage by communities since 2005-06.

Figure 12. Reporting of Commingled Recycling Tonnage Since FY 2005-06

When communities report commingled recycling tonnage, it becomes necessary to make assumptions about the constituents of those commingled materials to project recycling by individual commodities. As explored earlier in the *Recovery of Traditional Materials* section, the changing makeup of the traditional material stream is known as the evolving ton. There are a variety of forces acting on the mix of materials in the commingled ton from the adoption of paperless news consumption to changes in the types of packaging used in consumer goods.

Each year, the materials recovery facilities processing commingled materials in North Carolina are asked to voluntarily provide data on the composition of the commingled materials they process. This information is used to produce an average materials composition that is then used to project recycling of individual materials -- from paper and plastic to aluminum and steel cans to glass bottles and jars. The influence of the determination of the make-up of the commingled ton has become increasingly important as more recyclables are reported as commingled, thus minor changes in the ratios of individual materials in the average commingled ton can have an outsized influence on the projected recovery of those materials. Table 6 below shows the constituents of the average ton of commingled recyclables collected in North Carolina over the past five years.

Table 6. Constituents of the Average Ton of Commingled Recyclables in North Carolina Since FY 2013-14

Material	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18
Glass Bottles and Jars	26.28%	27.38%	27.40%	25.80%	26.91%
PET Bottles	4.77%	4.78%	5.25%	4.51%	4.22%

HDPE Bottles	2.94%	3.37%	3.10%	2.58%	2.58%
Other Plastic Containers	0.91%	0.64%	0.79%	0.92%	0.76%
Bulky Rigid Plastics	0.46%	0.47%	0.50%	0.39%	0.19%
Aluminum Cans (UBC)	1.16%	1.21%	1.10%	1.26%	1.21%
Steel Cans	2.98%	2.46%	2.45%	2.27%	2.52%
Other Metal	-	-	-	0.41%	0.39%
Newspaper (ONP)	23.83%	20.81%	19.50%	12.97%	4.31%
Corrugated Cardboard (OCC)	16.43%	17.60%	16.10%	19.13%	20.71%
Residential Mixed Paper (OMP)	20.24%	21.27%	23.75%	29.76%	36.22%
Aseptic Paper / Cartons	-	-	0.06%	-	-
Total	100.00%	100.00%	100.00%	100.00%	100.00%

8. Public Electronics Recycling

North Carolina residents continue to have wide access to recycling programs collecting electronics and televisions. Local governments operate electronics recycling programs in response to citizen demand for responsible e-waste management options and to help the public comply with the state disposal ban on computer equipment and televisions that went into effect July 1, 2011. During FY 2017-18, 178 local governments indicated that they operated an electronics recycling program – many in partnership with another community. For example, in FY 2017-18, there were 44 municipalities that indicated cooperating with their county to provide electronics recycling services, with the municipality collecting electronics from residents within their jurisdiction and delivering the material to the county for further management. Table 7 describes the different types of electronics recycling services that communities offered in FY 2017-18 as compared to FY 2016-17.

Table 7. Types of Local Government Electronics Recycling Programs

Public Electronics Recycling Program Details	No. of Local Governments FY 2016-17	No. of Local Governments FY 2017-18
Operate a Public Electronics Recycling Program	179	178
Collect Electronics at Drop-off Sites	118	117
Number of Individual Drop-off Sites Operated Across North Carolina	470	460
Collect Electronics at Curbside	38	39
Collect Electronics at One-Day Event	35	35
Collect Electronics at HHW Program	12	12

As indicated above, the most common strategy used to collect electronics is to accept them at staffed recycling sites or convenience centers. During FY 2017-18, 117 communities operated a combined 460 individual sites statewide for electronics collection.

Data on the amount of material collected by public electronics recycling efforts measures the collection of televisions and other electronics, including computers, printers, scanners and other devices that connect to computers along with computer monitors, cell phones, stereos, video players and other low grade electronic devices. The combined total amount of electronics and televisions recovered by local governments during FY 2017-18 decreased by 15.5 percent when compared to FY 2016-17. Figure 13 examines public

electronics recycling efforts since FY 2008-09 and shows the relative amounts of televisions and other electronics recovered each year.

Figure 13. Public Electronics Recovery FY 2008-09 to FY 2017-18

The overall decrease in electronics recycling tonnage in FY 2017-18 marks the second year in declining tonnage since the state disposal ban went into effect in July 2011. Data from FY 2017-18 indicates a decrease in the weight of both televisions and other electronics collected for recycling. Local governments collected 9,834 tons of televisions and 3,519 tons of other electronics for recycling in FY 2017-18, down from 11,138 tons of televisions and 4,657 tons of other electronics the year before. Data tracking on television recycling separately from other electronics began in FY 2008-09. Each year from 2008-09 through 2015-16, televisions constituted a proportionally larger amount of the total electronics collected and managed by public programs. It is possible that FY 2015-16 marked the peak in recycling of Cathode Ray Tube (CRT) televisions in North Carolina. Compared to more modern Flat Panel Display (FPD) televisions, CRT televisions are substantially heavier and more difficult to handle for public recycling programs. Figure 14 examines local government collection of televisions for recycling since measurement began.

Figure 14. Local Government Television Recycling Collection (Tons)

9. Types of Public Recycling Efforts

Public recycling programs employ different strategies to recover a range of materials, including the operation of curbside recycling programs, drop-off recycling programs and other recycling programs that collect traditional recyclable materials from parks, schools, businesses and multi-family properties. Public recycling programs also manage special wastes to divert potentially toxic materials from disposal. In addition, public recycling programs also offer services that target specific waste streams such as construction and demolition debris, scrap metal, yard waste and other organic materials such as food waste and oyster shells. Finally, North Carolina counties are statutorily responsible for providing services to collect and manage white goods and scrap tires, though in some cases, these services may also be operated by municipalities on behalf of a county.

In addition to providing the types of services listed above, local governments can also implement policies and employ strategies that encourage or facilitate private sector recycling activities without necessitating that public recycling programs directly or contractually provide a recycling service. Examples of these strategies include local disposal bans on materials such as corrugated cardboard, mandatory recycling ordinances and licensed hauler systems where service providers are required to offer recycling collection as a condition of doing business in a jurisdiction. These types of strategies induce or encourage the growth of private sector recovery activities and infrastructure. In FY 2017-18, local governments reported the recovery of 35,684 tons of recyclables through these types of strategies.

10. Public Curbside Recycling Programs in North Carolina

The number of publicly operated curbside recycling programs in North Carolina continued its upward trend during FY 2017-18, climbing to a new high of 329 total programs, reported as shown in Figure 15. Curbside recycling continues to be the most popular way for citizens to access public recycling service in North Carolina. Three local governments initiated new public curbside recycling programs in FY 2017-18, including Albemarle, Bailey and Lake Waccamaw.

Figure 15. Local Government Curbside Recycling Programs FY 1998-99 to FY 2017-18

By the end of FY 2017-18, it is estimated that 2.161 million North Carolina households have access to publicly operated curbside recycling service. Excluding yard waste, just under half of all public recycling tonnage, or 46.8 percent, was collected by curbside recycling programs in FY 2017-18.

11. Special Waste Management

Many counties and municipalities in North Carolina offer their residents the opportunity to recycle a wide range of additional materials beyond the traditional paper, bottles and cans commonly collected in curbside and drop-off programs. These ‘special wastes’ include automotive-related materials such as oil, oil filters and lead acid batteries as well as other ubiquitous household items such as dry cell batteries and fluorescent lamps as shown in Table 8 below.

Recycling services for special wastes are typically provided at staffed collection locations such as county solid waste convenience centers or municipal public works departments. Some communities only collect special wastes as a part of a collection event or program, while others collect special wastes year-round. The number of local special waste programs remained relatively steady while tonnages diverted from disposal increased in

FY 2017-18, continuing a steady growth over the past five years, as highlighted in Table 8. Special waste tonnages can be affected by a range of factors, including a program's implementation or discontinuance, scheduling of market pickup services and changes in local record-keeping and reporting. The scrap or reclamation value of a particular special waste can also impact its collection rate. For example, when the scrap value of lead is down, communities generally collect more lead acid batteries; whereas, when the scrap value of lead is high, residents are more likely to bring used lead acid batteries to private scrap yards where the batteries can be sold.

The picture of collection rates for the individual special wastes was mixed in FY 2017-18. Local governments collected increased amounts of used motor oil, oil filters, cooking oil and paint, while collection of antifreeze declined. While the collection of Lights Containing Mercury (LCMs or fluorescent lamps) was lower, in FY 2017-18, the collection of both pesticide containers and propane tanks was significantly higher. A handful of local governments also continued to collect other special waste, including leftover pharmaceuticals, light ballasts and other Universal Wastes.

Two types of HHW programs are operated by local governments: temporary and permanent. Temporary HHW programs, also known as one-day events, are designed to collect HHW at a temporary location approved to be used only for a single specific date and time. Permanent HHW programs collect materials at a DWM-permitted facility for ongoing HHW collection. Information about HHW collection programs may also be found earlier in this chapter. The number of jurisdictions offering HHW collection services increased slightly compared to the previous two years, and the number of permanent programs increased by one. The overall amount of materials collected by HHW efforts increased by 5.3 percent in FY 2017-18.

Table 8. Local Government Special Waste Management, FY 2013-14 to FY 2017-18

	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18
Used Motor Oil					
Number of programs	128	129	128	127	129
Gallons collected	729,623	704,669	796,050	819,200	917,492
Oil Filters

Tons collected	27.51	73.95	90.28	80.83	77.24
Paint					
Number of exchange programs	17	15	15	14	14
Number of other collection programs	11	13	16	15	16

Total tons collected separate from HHW	160.21	182.14	161.4	230.18	345.31
Pesticide Containers					
Number of programs	60	59	58	58	59
Tons collected	128.03	170.6	109.52	115.25	160.88
Pesticides					
Number of programs	14	17	19	16	18
Tons collected	11.77	17.31	18.24	14.58	10.26
Lights Containing Mercury					
Number of programs	62	62	59	76	81
Tons collected	92.88	80.76	98.56	111.10	91.39
Propane Tanks					
Number of programs	41	43	41	40	37
Tons collected	63.47	63.23	136.84	72.35	106.71
Other Special Wastes					
Number of programs	9	9	11	11	13
Tons collected	3.17	1.98	9.01	3.26	9.76
Used Cooking Oil					
Number of programs	74	75	77	75	74
Tons collected	213.28	197.35	197.72	209.12	310.10
Household Haz. Waste					
Number of communities offering programs	67	65	62	59	63
Number of permanent programs	20	18	18	18	19
HHW tons collected	3,241.07	3,443.51	3,358.89	4,169.40	4,388.90
Total Special Wastes					
All Materials Combined (Tons)	6,870.14	7,052.77	7,390.76	8,238.89	9,009.50

Conversions: oil, 1 gal = 7.4 lbs; antifreeze, 1 gal = 8.42 lbs; lead acid battery, 1 battery = 35.9 lbs; paint, 1 gal = 11.5lbs; propane tank = 18 lbs; 1 gallon of used cooking oil = 7.5 lbs.

12. Yard Waste Management

The overall amount of yard waste managed by local programs in FY 2017-18 decreased 11 percent from FY 2016-17, reflecting a year where yard waste generation was not substantially impacted by a significant storm event. Of the 850,492 tons managed by municipalities and counties during FY 2017-18, 725,879 tons of yard waste were diverted from disposal in four main ways: delivery of materials like leaves to gardeners and farmers (end-users); processing by local government mulching and composting operations; mulching and composting of locally collected materials at private facilities; and sale of yard waste materials to boiler fuel and other energy markets. Table 9 examines the use of these strategies in FY 2017-18 and compares that to FY 2016-17. Figure 16 graphs the local government diversion of yard waste from disposal from FY 1995-96 to FY 2017-18, noting the impact of significant storm events in North Carolina over the years on yard waste diversion.

As permitted by the disposal ban, a portion of locally managed yard waste was disposed of in land clearing and inert debris (LCID) landfills in FY 2017-18 and years prior. However, as in past years, not all of the material delivered to LCID facilities may actually be disposed. Some of it may be converted by LCID operators to mulch, compost or biomass fuels, probably undercounting actual total diversion.

Table 9. Local Government Yard Waste Management FY 2016-17 and FY 2017-18

<i>Destination of Materials</i>	<i>FY 2016-17 Tons Managed</i>	<i>FY 2017-18 Tons Managed</i>
End Users (direct delivery)	39,297	37,745
Local Mulch/Compost Facility	604,708	570,237
Local Government Yard Waste Diverted by Private Mulch and Compost Facilities.	95,564	106,806
Wood/Yard Waste Fuel Markets	54,263	11,091
TOTAL DISPOSAL DIVERSION*	793,833	725,879
LCID Landfill*	164,935	124,613
YARD WASTE TOTALS	958,768	850,492

* Yard waste tons delivered to LCID landfills are not included in diversion calculations.

The total amount of yard waste diverted from disposal since the implementation of state's yard waste disposal ban in January 1993 is now at 13.7 million tons of material, which is equivalent to 22.1 million cubic yards of landfill space.

Figure 16. Local Government Diversion of Yard Waste from Disposal, FY 1995-96 to FY 2017-18

13. Recycling Markets and Prices

Recycling commodity prices experienced a continual decline throughout most of FY 2017-18; although, data in the last quarter marked the first small increase in five quarters. The overall declining value is due to the decrease in fiber prices, with mixed paper hovering just above \$0 for the last two quarters of FY 2017-18. With fiber constituting 65 percent of the single-stream mix, overall pricing decreased despite a steady market for glass and PET, and the increasing value of aluminum and HDPE containers. Many factors impact commodities' recyclable value, including energy prices (particularly oil and natural gas), domestic and international economic activity, the value of the dollar relative

to other currencies, and, during FY 2017-18, policies governing the import and export of materials into countries such as China.

In the spring of 2017, China announced plans to ban the imports of certain categories of scrap material. Beginning in January 2018, a series of waste import restrictions were implemented, limiting or banning a variety of recyclable materials, including multiple types of plastics and mixed fiber. As the largest consumer of the world's scrap material, China's policies caused global impacts to recycling markets. This has led U.S. communities and businesses to seek new markets for materials previously exported to China. While the southeastern United States has strong demand for recycled commodities as manufacturing feedstock, market values for fiber experienced a drop due to abundant domestic supply. Markets for less common plastics, such as bulky rigids and #3-7 plastics and film, relied heavily on Asian buyers. Recyclers have struggled to find alternative markets, and in some cases, removing these materials from their recycling collection programs.

Figure 17 shows the quarterly blended value, or weighted average price, of a ton of single stream material at MRFs. Throughout the first three quarters of FY 2017-18, the blended value continued the decline that began in the last quarter of FY 2016-17 when China announced plans for import restrictions. As markets reacted to the implementation of the Chinese import bans, the blended value continued to decline and has appeared to level during the last two quarters of 2017-18 and into the first quarter of 2018-19.

Amid shifting markets, contamination in the recycling stream continues to be a challenge for MRFs. To meet the expectations of domestic markets and the stricter standards of international markets, these facilities are adding labor and slowing production lines to remove contaminants and produce higher quality outgoing commodity bales. These adjustments have resulted in increased per-ton processing costs. Coupled with depressed commodity values, MRFs have had to shift costs to customers, including local governments. Figure 17 below shows the history of MRF blended values since 2011.

Figure 17. MRF Blended Material Values, Spring 2011 to Summer 2018

Table 10 below provides more details on specific commodity prices through FY 2017-18. Except for office paper, fiber materials decreased in value through the course of the year; although, the last quarter shows a small recovery in corrugated cardboard value. With the decrease in value for mixed paper, some MRFs returned to separating paper into higher-value material grades (e.g., office paper, magazines), which is a reversal of the trend seen for the past several years. PET remained relatively steady through the year, while aluminum cans, steel cans and HDPE ended the fiscal year with increased prices despite some fluctuation during the year. Glass prices were not impacted by global market shifts and the value remained fairly steady. Additionally, the furnace at one of the North Carolina glass bottle manufacturing plants that was shut down in FY 2016-17 was rebuilt and reopened during FY 2017-18. However, the overall economic stresses on the system, including increased MRF processing costs and decreased blended revenue, led to increased attention on the negative value of glass and strict quality standards enforced by glass processors.

Table 10. Recycling Market Prices Received by Major N.C. Processors, FY 2017-18

Material	Summer 2017	Fall 2017	Winter 2017-18	Spring 2018	Summer 2018
Aluminum Cans, lbs.	\$0.64	\$0.70	\$0.66	\$0.71	\$0.80
Steel Cans, gross tons	\$124	\$140	\$177	\$163	\$185
PET, lbs.	\$0.16	\$0.16	\$0.13	\$0.15	\$0.17
HDPE Natural, lbs.	\$0.29	\$0.33	\$0.32	\$0.38	\$0.41
Newsprint, ton	\$102	\$85	\$60	\$70	\$35
Corrugated, ton	\$197	\$127	\$120	\$87	\$93
Office paper, ton	\$165	\$150	\$145	\$175	\$227
Mixed paper, ton	\$86	\$37	\$37	\$3	\$3
Mixed glass, ton	-\$18	-\$12	-\$12	-\$17	-\$21

Figure 18 below shows the history of paper (fiber) pricing over the last 22 years, demonstrating the fluctuating aspects of commodity markets. The figure shows increased value of office paper but decreasing values for newsprint, corrugated cardboard and mixed paper during FY 2017-18.

Figure 18. Market Prices Received for Fiber Materials by Major North Carolina Processors, 1996 – 2018

Figure 19 shows 22-year pricing for three key container materials: aluminum, PET and HDPE. It shows similar volatility for these commodities with aluminum and HDPE showing steady growth over the course of the fiscal year.

Figure 19. Prices Paid to North Carolina MRFs for Select Container Materials, 1996 – 2018

14. Recycling Market Developments in FY 2017-18

Despite challenging market disruptions, North Carolina continued to see expanded private sector investment in recycling infrastructure in FY 2017-18. EGGER Group, an Austrian manufacturer of wood-based materials for furniture, flooring and construction, announced that it will build its first U.S. manufacturing facility in North Carolina, investing \$700 million and creating 770 jobs. The company will manufacture sustainable particleboard using recycled wood chips from regional producers. Unifi continued to invest in the Yadkinville plant and installed a new pellet extrusion line, increasing the plant's capacity to convert recycled PET flakes to pellets which are spun into its Repreve brand polyester yarn.

MRFs also made investments in facilities and equipment to improve processing capabilities. One Raleigh MRF installed an optical sorter to remove contaminants and improve the quality of mixed paper. Another MRF invested in infrastructure to improve the quality of glass while two others invested in equipment to further automate processes and increase throughput. In addition, as mentioned in the *Recycling Markets and Prices* section above, one North Carolina glass bottle manufacturing plant made a major private investment to rebuild its furnace in FY 2017-18, increasing glass recycling capacity and illustrating the commitment to produce recycled glass containers in North Carolina.

As a key market development tool, North Carolina's Recycling Business Development Grant (RBDG) program helped spur additional private recycling infrastructure expansions in the state in FY 2017-18. Twenty-one companies were awarded grant funding, helping finance critical capital expansion projects. In anticipation of China's change in recycling import policies, the state targeted the 2018 grant cycle to prioritize projects that addressed materials affected by China's import ban (mixed paper, #3-7 plastics, bulky rigid plastics and agricultural plastics). As a result, 11 of the 21 awarded grants will expand domestic markets in North Carolina for these specific materials. Examples of projects awarded funding in FY 2017-18 include upgrades at two MRFs and two companies that manufacture new products using recycled content. Ten companies received grant funding to increase the quantities and types of recyclable plastic they can process such as agricultural plastic, PVC, polystyrene (Styrofoam) and post-industrial plastic. In addition, two companies received support to offer curbside recycling collection to new customers in rural areas, and four companies received support to increase electronics recycling, process tires into crumb rubber for manufacturing and increase recovery of wood waste from pallets and construction and demolition debris. Amid a year of challenging global market conditions, RBDG awards continued to play a key, strategic role in expanding private recycling infrastructure and strengthening the domestic marketplace to ensure a resilient, effective and efficient statewide recycling system in North Carolina.

F. Scrap Tire Management Program

1. Scrap Tire Management

Scrap tires were banned from disposal in landfills in 1990 by G.S. 130A-309.10. The Solid Waste Section administers the Scrap Tire Management Program and manages the Scrap Tire Disposal Account. This account was created by the 1993 General Assembly. Its

purpose is to provide each county with funds for the disposal of scrap tires at no direct cost to residents and businesses. To fund this account, the General Assembly imposed a 1 percent tax on the sale of new large tires and a 2 percent tax on the sale of new small tires. Table 11 shows the revenue and distribution of the taxes in FY 2017-18.

Table 11. Distributions of Scrap Tire Tax Revenue

Net Tax Collections by the N.C. Department of Revenue	\$19,593,645
Dept. of Revenue Cost of Collecting	\$315,041
Amount distributed to counties (70%)	\$13,495,023
Amount distributed to the General Fund	\$5,783,581

The money is used to provide additional funding to counties for the cleanup of illegal tire dumps and for county-incurred deficits in their scrap tire management programs. Scrap tire legislation requires the division to consider county efforts to avoid free disposal of out-of-state tires and other ineligible tires and county program efficiency in using allocated funds when making decisions about grant awards.

Table 12. Scrap Tire Management Account

Balance of Funds as of July 1, 2017		\$1,271,873.25
Cost Overrun Grants to Counties July 2017 (Table 14)	[\$401,545.27]	
Cost Overrun Grants to Counties Feb 2018 (Table 15)	[\$761,422.21]	-
Clean Up Grants to Counties (Table 16)	[\$173,496.73]	-
Total Debits		[\$1,336,464.21]
Transfer from General Fund	\$420,000.00	
Total Credits	-	\$420,000.00
Ending Balance June 30, 2018	-	\$355,409.04

2. County Tire Disposal

Ninety-eight county programs, including one regional program (the Coastal Regional Solid Waste Management Authority, which serves Carteret, Craven and Pamlico Counties), reported that they generated 153,999 tons of scrap tires in North Carolina.

Counties reported spending a total \$14,022,978.45 for scrap tire management and disposal. Of the total spent, \$12,872,131.05 was for direct disposal costs and \$1,150,847.40 was for other costs, such as labor or equipment. North Carolina processors report that county contracts typically charge \$60 to \$75 per ton, including transportation and trailer rental costs. Counties located far from processing facilities may pay as much as \$85 to \$120 per ton.

3. Tire Recycling

In FY 2017-18, North Carolina tire processors reported they received 277,946 tons of scrap tires from North Carolina counties, a 45 percent increase from last year. An additional 60,645 tons of tires were received from other states. It is also important to note that many tire sellers bypass county tire collection sites and have tires taken directly to processors. In FY 2017-18, 274,443 out of 277,946 tons, or roughly 98 percent, of scrap tires managed by North Carolina counties were processed, recycled or reused. Reuse or disposal of tires is shown in Table 13 and Figure 20 below.

Table 13. Final Disposal/Recycling of Tires (tons)

Tires disposed (landfill)	65,806.15
Tires used as fuel	128,020.40
Tires used as crumb rubber	18,869.13
Tires re-used or re-capped	20,199.64
Tires used in civil engineering	11,147.97
Tires used for other purposes	19,028.63

Figure 20. Final Disposal of Scrap Tires in NC

G. White Goods Management

1. White Goods Tax Collection and Distributions

White goods are defined in G.S. 130A-290 as "refrigerators, ranges, water heaters, freezers, unit air conditioners, washing machines, dishwashers, clothes dryers and other similar domestic and commercial large appliances." In 1993, the North Carolina General Assembly passed a white goods management law because white goods were difficult to dispose of and contained greenhouse gasses, particularly chlorofluorocarbon refrigerants (CFCs). To fund this law, the General Assembly imposed a \$3 tax on new white goods.

Counties are mandated to manage white goods by providing at least one disposal site, at no cost to residents, and arrange for the removal of CFCs. Much of the white goods tax

revenue is distributed to county governments for use in program administration, as shown in Tables 17 and 18 below.

Table 17. White Goods Tax Collection/Distributions

Net Tax Collections by the Department of Revenue	\$9,323,786.53
Department of Revenue Cost of Collecting	[\$303,631.94]
Total Revenue Available for Distribution	\$9,030,207.90
72% of Revenue - Available for Distributions to Counties	\$6,501,749.70
Funds Forfeited from ineligible counties (Sent to the General Fund)	
	[\$1,421,075.69]
Total Distributed to Counties	\$6,490,335
Funds Forfeited from ineligible counties (Sent to the General Fund)	
	\$1,442,796
28% of Revenue - Sent to the General Fund	\$2,528,458.20
Total Sent to the General Fund	\$3,966,816.21

Table 18. Counties that Forfeited Their White Goods Distributions

Avery	Bertie	Burke
Dare	Forsyth	Guilford
Halifax	Henderson	Jones
Lenoir	Martin	Montgomery
Pasquotank	Randolph	Rockingham
Transylvania		

County governments with unspent funds exceeding 25 percent of the amount received over the past year became ineligible to receive funding, and the forfeited funds went into the N.C. General Fund. The county fund information is from the Local Government Commission's 2016-17 Annual Fiscal Information Report, which counties submit prior to December each year. (The one for 2017-18 is not yet available.)

2. White Goods Disposal Account

Prior to July 1, 2017, county governments could apply for grants from a White Goods Disposal Account for white good program cost overruns, white goods clean ups and capital improvements. The Disposal Account was repealed effective June 30, 2017.

H. Abandoned Manufactured Homes (AMH) Program

As established in G.S. 130A-309.111, the state Division of Environmental Assistance and Customer Service (DEACS) operates a grant program that provides funding to North Carolina counties to facilitate the identification, deconstruction, recycling and disposal of abandoned manufactured homes which are deemed unfit, unsafe and hazardous. The Abandoned Manufactured Homes (AMH) Grant Program Request for Proposals (RFP) was originally

developed and made available to North Carolina counties in October 2009. Fiscal Year 2017-18 was the ninth year of this grant program's operation.

1. AMH Grants Awarded by Fiscal Year

Table 19 shows the number of grants awarded during each of the nine years of the program's operation and funding allocated to those grants.

Table 19. AMH Grants Awarded by Year

Fiscal Year	Number of AMH Grants Awarded	Grant Funds Allocated
FY 2009-10	10	\$385,000
FY 2010-11	3	\$105,000
FY 2011-12	4	\$150,000
FY 2012-13	3	\$117,500
FY 2013-14	4	\$80,000
FY 2014-15	3	\$74,500
FY 2015-16	6	\$69,000
FY 2016-17	4	\$35,500
FY 2017-18	5	\$49,000

Five new AMH grant contracts were initiated during FY 2017-18, representing a total expenditure of \$49,000 from appropriated funds allocated to the Solid Waste Management Outreach Program. For the past five fiscal years, the AMH Grant Program has allowed for grant contracts with initial terms of up to two years; whereas, previous contracts were limited to terms of one year. During FY 2017-18, Stanly County was awarded a two-year AMH grant; Alamance, Harnett and Perquimans counties received a six-month grant to conduct program planning activities. The Ashe County cleanup grant was initiated under the FY 2016-17 period, but the contract date did not begin until July 1, 2018 and therefore was included with the other four AMH Grants in FY 2017-18.

2. AMH Program Statistics

As required by G.S. 130A-309.117, each AMH grant program participant must submit an annual report to the state every August that documents and summarizes county program information from the previous fiscal year. Based on the August 2018 grantee reports, Table 20 shows the total number of AMH units deconstructed under the program and the resulting amount of waste disposed and recycled in FY 2017-18, including mercury thermostats which are required to be removed prior to disposal. Program statistics do not include deconstruction activities conducted by counties without state grant support.

Table 20. AMH Program Statistics for FY 2017-2018

Units Deconstructed	19 Units
Materials Landfilled	127.64 Tons
Materials Recycled (percentage of total tonnage)	23.89 Tons (15.8 percent)
Mercury Thermostats Recovered	0 Thermostats

There were nine AMH program grants active during FY 2017-18. The number of units deconstructed during FY 2017-18 decreased when compared to FY 2016-17, from 67 units to 19 units. As a result, the tons of materials landfilled and recycled were lower than that of the previous year. The overall percentage of materials recycled increased slightly from FY 2016-17 to just under 16 percent of total materials handled. Table 21 below presents the individual AMH grants that were active during FY 2017-18 and provides details from those programs.

Table 21. Active AMH Grant Program Participants During FY 2017-18

<i>County</i>	<i>Contract Start Date</i>	<i>Contract End Date</i>	<i>Grant Award</i>	<i>County Costs during FY</i>	<i>Responsible Party Fees Collected</i>	<i># Units Deconstructed with Grant Support During FY</i>
Alamance ¹	6/1/2018	5/31/2019	\$10,000.00	\$0	\$0	0
Ashe ¹	7/1/2017	6/30/2019	\$9,000.00	\$0	\$0	0
Burke	5/15/2016	11/14/2018	\$12,000.00	\$2,750.00	\$0	1
Chowan	5/15/2016	5/14/2019	\$14,500.00	\$0.00	\$0	0
Harnett ¹	7/1/2018	6/30/2019	\$10,000.00	\$0.00	\$0	0
Onslow	2/13/2017	2/12/2019	\$12,000.00	\$8,200.00	\$405.00	2
Perquimans ¹	5/1/2018	4/31/2019	\$10,000.00	\$0.00	\$0	0
Robeson	11/21/2019	5/22/2019	\$24,000.00	\$7,750.00	\$0	16
Stanly ¹	5/15/2018	5/15/2020	\$10,000.00	\$0.00	\$0	0
¹ Grants initiated during FY 2017-18						

3. Program Participant Highlights, FY 2017-18

Burke County completed work on existing AMH Grants during FY 2017-18. Burke and Chowan counties used grant extensions from FY 2016-17 to continue work on respective AMH grants during the FY 2017-18. Robeson County requested and was granted the opportunity to continued work on a grant initiated in FY 2014-15. Previous AMH grantees are eligible to reapply for new grants. During FY 2017-18, three “repeat” grants were initiated for Alamance, Harnett and Stanly counties. The total expenditure by counties associated with AMH grant program related activity in FY 2017-18 was \$18,700, and the total amount of funds contributed by responsible parties was \$405. Part of the cost was in the form of asbestos fees paid by Onslow County for two demolished units at \$1,000 and the remaining \$17,700 was costs for cleanup of abandoned manufactured homes.

4. Additional Information on the AMH Program

The authorizing legislation for the state AMH grant program expires on Oct. 1, 2023. Considering the potential sunset of the state program, one goal is to help counties develop local abandoned manufactured home clean-up programs that are able to operate independent of state financial support. The division has been developing new guidance to

assist counties minimize dependence on state funds. State staff provides technical assistance to counties that are interested in pursuing policies and identify potential source sources of funds that together can lead to local cleanup programs that do not rely on state funds to perform cleanup operations.

One strategy used by Onslow County is to collect a fee on new mobile homes and earmark those dollars for mobile home recycling. In FY 2017-18, Onslow was able to apply \$5,100 towards AMH grant-related projects. Another example in FY 2017-19 is Stanly County, which applied funding for AMH cleanup from dollars collected in its minimum housing ordinance. Stanly County staff reported no units were demolished using county funds during fiscal year 2017-18.

I. Electronics Management Program

North Carolina General Statute 130A-309.130 established the Electronics Management Program. The program directs manufacturers of electronics, retailers, consumers, and state and local governments to share accountability for the responsible recycling and reuse of electronic equipment. The law applies to computer equipment and televisions intended for consumer use. Computer equipment includes desktop and portable computers, monitors and video displays for computers, printers, scanners or combination printer-scanner fax machines, mice, keyboards and other peripherals. Household items such as cell phones, video recorders, cable or satellite boxes, and all commercial devices such as printers and data networking systems are not covered devices under the law.

1. Manufacturers' Responsibilities

Before selling equipment in North Carolina, manufacturers must register with the state and pay a registration fee, which is dependent upon the type of equipment and recycling plan level. Television and computer equipment manufacturers have different recycling obligations under the law. Television manufacturers are assigned a target weight to recycle based on their market share. Computer manufacturers are required to have a plan in place to make recycling of computers available to consumers. The law is designed to provide electronics recycling opportunities for the consumer, which is defined as an occupant of a dwelling who used the equipment for personal or home business use. A nonprofit organization with fewer than 10 employees is also considered a consumer.

Television manufacturers pay an annual fee of \$2,500. Each television manufacturer is obligated to recycle or arrange for the recycling of its market share of televisions, and must annually report the weight of televisions they recycled or arranged to recycle.

Computer manufacturers pay an initial fee of \$10,000 to \$15,000, followed by an annual fee of \$2,500 to \$15,000, depending on the level of their plan. Computer equipment manufacturers must provide a plan, which will provide a mechanism through which consumers can recycle their equipment. The plans must provide for free and reasonably convenient recycling. The related recycling and transportation must be accomplished using environmentally sound management practices. Manufacturers must provide a consumer recycling education program and toll-free phone number. Each registered computer equipment manufacturer must also submit an annual report detailing the total

weight of computer equipment collected for recycling and reuse for the previous year, summarizing the actions implemented from an approved plan.

2. Retailers' Responsibilities

Effective July 1, 2011, retailers in North Carolina may only sell televisions, computers, printers, scanners, printer-scanner-fax combinations, mice, keyboards and other computer peripherals that display the manufacturer label of a registered manufacturer in compliance with the electronics management law.

3. State Agencies and Governmental Entities Responsibilities

State agencies and governmental entities in North Carolina may only buy televisions, computers, printers, scanners, printer-scanner-fax combinations, mice, keyboards and other computer peripherals that are produced by registered manufacturers in compliance with the electronics management law. A list of manufacturers that are in compliance can be viewed at: <http://deq.nc.gov/about/divisions/waste-management/solid-waste-section/electronics-management>.

4. Registration of Facilities Recovering or Recycling Electronics

Beginning on Aug. 1, 2015, facilities that recover or recycle covered devices or other electronic devices diverted from the waste stream for transfer, treatment or processing must register annually with the department on or before Aug. 1 each year. The registration form and list of registered facilities can be found on the DWM's website at: <http://deq.nc.gov/about/divisions/waste-management/solid-waste-section/electronics-management/electronics-recyclers-collectors>.

5. Recycling Rates Within North Carolina

Data on the recycling of computer equipment and televisions comes from two primary sources: manufacturer reports and local government solid waste annual reports. Table 22 below presents information reported by manufacturers registered in North Carolina.

Table 22. Electronics Collection by Weight

Type of Collection	Computer Equipment Manufacturers (lbs.)	Television Manufacturers (lbs.)
Mail-back Program	10,126	0
Retail Collection	308,670	501,926
Scheduled Collection Events	0	85,223
Permanent drop-off through local government programs	575,420	21,380,598
Permanent drop-off sponsored by manufacturers	1,130,973	5,214,815
Total	2,025,189	27,182,562

As in previous years, permanent drop-off locations are the option consumers use for most of their electronics recycling. Although mail-back programs are an important option for rural areas with fewer drop-off locations available, the weight collected through these programs continues to be relatively small. Almost 80 percent of televisions recycled by

consumers are brought to local government programs. Table 23 and Table 24 below show recycling of electronics collected by county and municipal collection programs as well as overall collection programs by fiscal year.

Table 23. Electronics Collected by County and Municipal Collection Programs by Fiscal Year

<i>County and Municipal Collection Programs</i>	<i>FY2011-12 (tons)</i>	<i>FY2012-13 (tons)</i>	<i>FY2013-14 (tons)</i>	<i>FY2014-15 (tons)</i>	<i>FY2015-16 (tons)</i>	<i>FY2016-17 (tons)</i>	<i>FY2017-18 (tons)</i>
Televisions	6,423.58	8,739.47	9,314.94	10,025.66	12,057.66	11,137.81	10,690.30
Other Electronics	8,264.91	5,419.81	5,470.99	5,050.77	4,623.86	4,656.75	3,550.15
Total	14,688.49	14,159.28	14,785.93	15,076.43	16,681.52	15,794.56	14,240.45

Recycling rates indicate that the residents of North Carolina continue to discard a backlog of televisions; however, the backlog of computers appears to have been cleared.

Table 24. Overall Recycling of Electronics

<i>Collection Method</i>	<i>FY2011-12 (tons)</i>	<i>FY2012-13 (tons)</i>	<i>FY2013-14 (tons)</i>	<i>FY2014-15 (tons)</i>	<i>FY2015-16 (tons)</i>	<i>FY2016-17 (tons)</i>	<i>FY2017-18 (tons)</i>

Total Tons	21,417.48	17,881.70	19,089.62	19,103.92	20,021.97	18,892.87	17,866.32
Total Pounds Per Capita	4.43	3.66	3.87	3.84	3.98	3.76	3.47

6. Compliance and Enforcement of Electronics Laws

Some companies have not registered or paid their fees. These companies are ineligible to market their products in North Carolina. Residents and government agencies can check the DWM website, <http://deq.nc.gov/about/divisions/waste-management/solid-waste-section/electronics-management>, to determine which companies may sell in North Carolina.

The Division of Waste Management and DEACS have been coordinating with manufacturer stakeholder groups, as well as a national consortium of states with electronics programs – Electronics Recycling Coordination Clearinghouse (ERCC), to seek ways to streamline and automate reporting requirements for North Carolina. Manufacturer reporting requirements vary greatly from state to state. North Carolina has joined with other states in allowing manufacturers to register via web access at: <http://www.ecycleclearinghouse.org>.

7. Electronics Management Fund

The Electronics Management Fund, administered by DWM, consists of computer and television manufacturers' registration and annual fees. Fees paid into the electronics management fund are used to support approved electronics management programs within North Carolina counties. Table 25 reflects the fund's balance and payout for FY 2017-18.

Table 25. Electronics Management Fund

Balance of Funds as of July 1, 2017		\$398,642.21
Debits		
Distributions to Local Government Programs	[\$710,785.36]	
Cost of Market Share Data	[\$6,461.54]	
ERCC Membership	[\$6,000.00]	
Administrative and Salary Costs	[\$66,201.02]	
Total Debits		\$789,447.92
Credits		
Computer Equipment Manufacturer Fees	\$692,500.00	
Television Manufacturer Fees	\$50,000.00	
Total Credits		\$742,500.00
Ending Balance as of June 30, 2018		\$351,694.29

Electronics programs are required to prove to DWM that all recycling of computer equipment and televisions is being conducted by R2 or e-Steward-certified facilities to receive future distributions. The funding must be used only for management of electronics. The 78 local governments with approved electronics recycling plans received their per capita share of a total \$710,785.36 in distributions from the Electronics Management Fund in Feb. 2018. The distribution amounts can be viewed at: <http://deq.nc.gov/about/divisions/waste-management/solid-waste-section/electronics-management> and are shown in Table 26 below.

Table 26. Electronic Management Distribution FY 2017-18

<i>County</i>	<i>Distribution</i>	<i>County</i>	<i>Distribution</i>
Alamance	\$12,639.14	Macon	\$2,797.83
Alexander	\$3,055.90	Madison	\$1,754.40

Lenoir	\$4,582.33	Wilkes	\$5,583.29
Lincoln	\$6,547.86	Wilson	\$6,469.15
		Yadkin	\$3,011.30

Total of Distribution: \$710,785.36

J. Department of Administration - Environmentally Preferred Purchasing

The N.C. Department of Administration promotes the purchase and use of sustainable, efficient supplies and products. As the department progresses with this effort, more of these products are being added to statewide term contracts and agency specific term contracts awarded through open market bids. For more information, visit the Division of Purchase and Contract's website at: <https://ncadmin.nc.gov/about-doa/divisions/purchase-contract>.

1. Solicitations advertised by the Division

Bids advertised in the N.C. Division of Purchase and Contract contain a Recycling and Source Reduction section in paragraph 8 of the Instructions to Bidders. Also, in the Sustainability section in paragraph 10, the division encourages bidders to support its sustainability efforts by requesting they reduce use of paper and non-recyclable elements in their bid submission. When developing bid invitation language, requirements and specifications, purchasers are continuing to look at alternative methods and products that result in waste reduction, if their procurement is practicable and cost-effective.

Recycling and source reduction information provided by the contractors on bids received during FY 2017-18 indicate the sustainable features or criteria of those products. Sustainability descriptions include: reusable, more durable, energy efficient, water efficient, washable, used, refillable, repairable, refurbished/rebuilt, less toxic, longer-lasting and recyclable.

Refer to the Examples of Sustainable Open Market Awards and the listing of the Statewide Term Contracts with the applicable sustainable features identified.

Table 27 lists the IPS purchase awards by the type and dollar amounts awarded by the Division of Purchase and Contract.

Table 27. IPS Purchase Awards by Type and Amount

IPS Commodity Purchase by Bid Type	Number of awards by Bid Type	Percentage of Number of Awards by Bid Type	Award dollars by Bid Type	Percentage of Award Dollars by Bid type
Agency RFP (including services)	85	5.79%	\$54,328,711.71	9.17%
Agency-Specific Term Contract	106	7.22%	\$95,105,954.96	16.06%
Contractual Service	5	0.34%	\$473,390.00	0.08%
Open Market Purchase	325	22.12%	\$61,268,941.04	10.35%
Purchase from Quote	467	31.79%	\$225,578,696.64	38.09%
Statewide Term Contract	13	0.88%	\$84,382,125.57	14.25%
Waiver of Competition	468	31.86%	\$71,070,363.14	12.00%
Total	1,469	100.00%	\$592,208,183.06	100.00%

2. North Carolina E-Procurement @ Your Service

As of October 2018, the enterprise-wide system has 21,887 registered vendors and 12,565 users representing 158 entities statewide. This includes state agencies, hospitals and institutions, community colleges, K-12 public schools, universities and local governments. NC E-Procurement @ Your Service contributes to a sustainable environment through significant reductions in hard copy document reproduction (paper, printers and supplies) by using electronic business transactions and electronic documents. NC E-Procurement also continues to support state priorities for environmentally preferable products with more than 5,530 catalog items clearly marked as "Recycled" of a total of more than 103,645 catalog items.

3. Purchasing Compliance Reviews

North Carolina Administrative Code (01 NCAC 05B .1605) mandates that the Division of Purchase and Contract (P&C) conduct compliance reviews on the purchasing practices of all state agencies (departments, institutions, hospitals, community colleges and universities). All compliance reviews, except universities, are conducted using data from the NC E- Procurement system. Electronic data reduces the necessity of conducting most phases of the analysis on-site, thereby increasing efficiency as well as reducing travel costs, fuel emissions and operating expenses. In addition, all DP&C compliance files are maintained electronically, improving sustainability.

4. Procurement Training

The Division of Purchase and Contract's (DP&C) training program offers North Carolina public procurement personnel and contract administrators the skills necessary to carry out their duties efficiently and effectively. The procurement training program currently consists of nine core classes. Each calendar year, the Division typically offers on average a total of 40 classes with more than 1,500 total participants.

The classes are offered free of charge. The only costs incurred by North Carolina agencies are travel-related expenses. To minimize impact to agency business operations and travel-related expenses, the classes are offered regionally throughout the state. In addition, there are seven online training courses offered. NC E-Procurement web-based trainings are also available for those who are unable to travel. Overall, DP&C's training program prepares purchasers across the state to recognize and seek out opportunities to provide reused, recycled and sustainable items to satisfy the state's needs.

5. IPS (Interactive Purchasing System), North Carolina Business Invitation Delivery System (NCBIDS) and electronic Vendor Portal (eVP)

The Division of Purchase and Contract continues to promote opportunities for vendors to do business with the state through electronic advertisement of goods, services and design/construction in IPS. The entities using this system consist of state agencies, institutions, universities, community colleges, K-12 public schools and local governments.

The state of North Carolina will soon debut a new electronic bidding system. The North Carolina Business Invitation Delivery System (NC BIDS) will enable vendors to respond to specified solicitations electronically, saving both time and money. NC BIDS is part of

the ongoing effort to modernize procurement practices across North Carolina to enhance user experience and improve efficiency.

eVP is an internet application that allows companies and individuals to register to do business with the state of North Carolina. eVP had about 38,000 registered vendors as of October 30, 2018. The system includes approximately 559 agencies, schools and institutions in North Carolina, with 892 users posting more than 2,400 solicitations through the database during the 2017-18 fiscal year.

6. Examples of Sustainable Open Market Awards

Table 28 below lists examples of used, recycled and refurbished open market (non-term contract) awards made through DP&C during the 2017-18 fiscal year, representing a total value of more than \$2.908 million. These purchases were made by the state's 27 principal departments and 58 community colleges using the division's Interactive Purchasing System.

Table 28. Used, Recycled and Refurbished Equipment Purchases 2017-18

Description	Purchasing Agency	Award Amount
USED BUCKET TRUCKS	CC - Caldwell Community College and Technical Institute	\$65,000.00
USED CUMMINS ENGINE	CC - Cape Fear Community College	\$16,000.00
USED CUSHION STUFFER	CC - Catawba Valley Community College	\$11,449.00
Refurbished Hill Rom Advanta Suite	CC - Central Carolina Community College	\$13,400.00
USED DAY CAB TRACTOR TRUCKS & TRAILER	CC - Central Piedmont Community College	\$52,552.50
Used Police Interceptors	CC - Central Piedmont Community College	\$11,750.00
Used Paper Folder	CC - Coastal Carolina Community College	\$18,141.00
USED DRY VAN TRAILERS	CC - Coastal Carolina Community College	\$39,400.00
USED FREIGHT TRUCKS FOR CDL PROGRAM	CC - Fayetteville Technical Community College	\$112,477.00
Used Vehicles	CC - Fayetteville Technical Community College	\$82,795.00
REFURBISHED HOSPITAL BEDS	CC - Fayetteville Technical Community College	\$28,350.00
USED 2017 CHEVY MALIBU	CC - Gaston College	\$16,774.49
CAMPUS POLICE CROWN VICTORIA REFURBISHING	CC - Guilford Technical Community College	\$26,631.00
USED 2006 HARLEY DAVIDSON MOTORCYCLES	CC - Lenoir Community College	\$18,416.00
REFURBISHED SCOTT AIR PACKS	CC - Mitchell Community College	\$12,800.00
USED BUCKET TRUCK	CC - Nash Community College	\$35,500.00
Used Trucks- 2004 Freightliner-2005 Peterbilt	CC - Sampson Community College	\$99,889.00
Used/Refurbished Oral Medication Packaging System	CC - Vance/Granville Community College	\$10,750.00
Used 2013 Honda CRV-LX	CC - Vance/Granville Community College	\$14,863.00
Used/Refurbished Oral Medication Packaging System	CC - Vance/Granville Community College	\$10,750.00
Used Modular Office Building	DEPARTMENT - Agriculture	\$36,126.50
USED GENIE ARTICULATING LIFT	DEPARTMENT - Natural and Cultural Resources	\$22,319.53
USED 2015 DODGE PROMASTER SLT VAN	DEPARTMENT - Natural and Cultural Resources	\$15,067.71
USED 2011 CHEVROLET SILVERADO 1500 LT 4X4 CREW CAB	DEPARTMENT - Natural and Cultural Resources	\$25,352.33
USED OTTAWA 30 SERIES YARD SPOTTER	DEPARTMENT - NC State Ports Authority	\$86,000.00

USED BACKHOE LOADER	DEPARTMENT - NC State Ports Authority	\$47,824.00
USED FRONT END LOADER	DEPARTMENT - NC State Ports Authority	\$85,000.00
USED GENIE TELESCOPIC BOOMLIFT - JIB	DEPARTMENT - NC State Ports Authority	\$72,500.00
USED 2006 GMC DURAMAX DUMP TRUCK	DEPARTMENT - NC State Ports Authority	\$17,000.00
Repair/Refurbish Clamshell Bucket	DEPARTMENT - NC State Ports Authority	\$26,703.49
Used Forklifts	DEPARTMENT - Public Safety	\$29,500.00
Used Excavator	DEPARTMENT - Transportation	\$110,396.00
USED 2015 CATERPILLAR TH407C TELEHANDLER	DEPARTMENT - Transportation	\$66,491.00
USED WHEEL LOADER	DEPARTMENT - Transportation	\$113,475.00
USED 2013 CATERPILLAR TELEHANDLER	DEPARTMENT - Transportation	\$59,652.00
Used Excavator	DEPARTMENT - Transportation	\$148,557.00
USED 2015 CATERPILLAR 312E L EXCAVATOR	DEPARTMENT - Transportation	\$141,133.00
USED 2014 CATERPILLAR 924K WHEEL LOADER	DEPARTMENT - Transportation	\$140,981.00
USED 2015 CATERPILLAR 312E L EXCAVATOR	DEPARTMENT - Transportation	\$124,328.00
USED CAT WHEEL LOADER	DEPARTMENT - Transportation	\$133,595.00
USED 2015 CAT WHEEL LOADER	DEPARTMENT - Transportation	\$133,595.00

USED 2014 CATERPILLAR 930K WHEEL LOADER	DEPARTMENT - Transportation	\$143,620.00
Used Cat 313F Excavator	DEPARTMENT - Transportation	\$139,330.00
USED 2015 CATERPILLAR 930K WHEEL LOADER	DEPARTMENT - Transportation	\$149,795.00
Grand Total		\$2,908,533.55

7. Statewide Term Contracts

As existing term contracts are re-bid and new term contracts are developed, the DP&C continues to improve contracts by offering a wide range of sustainable or environmentally friendly products. Recycled content is encouraged pursuant to G.S. 143-58.2. Examples of the sustainable features of these term contracts are listed below.

- Oils, Lubricants, Greases and Antifreeze, 001A** – Correction Enterprises offers synthetic, bio-degradable and re-refined (recycled) lubricant choices. Synthetic lubricants are longer-lasting than conventional ones. Under this contract, the following synthetic lubricants were purchased: synthetic blend motor oil (93,500 gallons), synthetic motor oil (16,169 gallons), synthetic gear oil (17,210 pounds), synthetic automatic transmission fluid (18,800 gallons), antifreeze (12,553 gallons) and synthetic grease (10,395 pounds). Biodegradable lubricants are better for the environment, and the following types were purchased: bar-and-chain oil, two-cycle oil, hydraulic oil and tractor transmission fluid, for a combined total of over 20,000 gallons. Several fluids are also available in bio-synthetic formulations: two-cycle oil, motor oil, hydraulic oil and marine oil. Additionally, re-refined used motor oil is available, as is recycled antifreeze. State Surplus Property disposes of waste oil and antifreeze under contract. This year, 54,958 gallons were purchased of Diesel Exhaust Fluid (DEF), an aqueous urea solution used in diesel engines to lower nitrogen oxides concentration in exhaust emissions. Nitrogen oxides, like hydrocarbons, are precursors to the formation of ozone and contribute to the formation of acid rain.

- **Rain Barrels** – These rain barrels are made from recycled pickle barrels.
- **Reupholstery Services** – Recovering furniture prolongs its service life.
- **Filters, Air (HVAC), 031B** – Extended-surface and electrostatically-enhanced filter offerings result in lower HVAC pressure drop, resulting in less energy use. Extended-surface filters also last much longer than traditional panel filters.
- **Automotive, Industrial Parts and Supplies, 060A** – Some products included have recycled materials with 10 to 20 percent post-consumer content.
- **Batteries, Storage, 060B** – Typical lead-acid batteries contain 60 to 80 percent recycled lead and plastic, according to the EPA. Battery cores (spent batteries) are considered an environmental hazard (G.S. 130A-309.70 prohibits the landfilling or incineration of lead-acid batteries) and are otherwise expensive to properly remove. All state agencies are required to dispose of battery cores under a separate battery recycle contract (LAB082714) administered by the State Surplus Property Agency.
- **2017 Vehicles, 070A** – Per the Steel Recycling Institute, 60 percent of a typical vehicle is steel or iron. Of that steel or iron, 25 percent of the shell of a vehicle is recycled material. Nearly 100 percent of the steel and iron of a retired vehicle is recycled. The current contract focuses on providing fuel-efficient vehicles, while also reducing fossil-fuel reliance through alternative fuels (E85 ethanol flex-fuel, CNG compressed natural gas, LPG liquefied petroleum gas (propane), AFV gasoline/electric hybrids, all-electric, B20 biodiesel) and meeting strict emissions standards.
 - Cars: All 2017 and 2018 gas-model sedans are four-cylinder compacts or mid-sized, with options for E85-capable or CNG/LPG-capable engines (Ford Focus, Ford Fusion). Also available are hybrids (Ford C Max, Chevrolet Volt). Gas model emissions are rated ULEV II (ultra-low-emission vehicle).
 - SUVs: All 2017 and 2018 models have an option for CNG/LPG-capable engines and include a four-cylinder crossover (Dodge Journey) and a six-cylinder mid-size (Nissan Pathfinder). Gas model emissions are rated ULEV II.
 - Vans: Passenger vans all have an option for CNG/LPG-capable engines and include a four-cylinder compact (Dodge Caravan), plus full-size six-cylinder models with E85-capable engines (Ford Transit Wagon, Ford Transit 350). Cargo vans also all have an option for CNG/LPG-capable engines and include a four-cylinder compact (Nissan NV200) with an emission rating of SULEV II (super-ultra-low-emission vehicle), plus full-size six-cylinder models with E85-capable engines (Ford Transit 250, Ford Transit 350). The cube van also has an option for a CNG/LPG-capable engine. The mobility van for wheelchair transport has an E85-capable engine, with an option for a CNG/LPG-capable engine.
 - Pick-up trucks: These trucks include a six-cylinder (Ford F150), or eight-cylinders with an option for ultra-low sulfur or B20 fuel capability (Ford F250, Ford F350). All pick-ups have an option for CNG/LPG-capable engines. Gas model emissions are rated LEV II (low-emission vehicle).
 - Cab and Chassis trucks: Most gasoline versions may be purchased as diesels with ultra-low sulfur or B20 fuel capability, and all versions have an option for a CNG/LPG-capable engine. Gas models' emissions are rated LEV II. A conventional cab truck with diesel engine is also available.
 - Law Enforcement Vehicles: Requiring more power for pursuit purposes, there is still a six-cylinder sedan and a six-cylinder SUV, in addition to eight-cylinder

models. There are options for E85-capable or CNG/LPG-capable engines. Gas model emissions are rated ULEV II.

- Conventional School and Activity Buses, 070C – Vehicles typically contain approximately 20 percent post-consumer recycled material by weight and 80 percent of the vehicle by weight is recovered for reuse. Used school buses are usually sold or are used for spare parts (the Department of Public Instruction, Transportation Services Section lists used school buses for sale on their website). There is an option to have a propane-powered engine.
- Utility, Transportation & Golf Vehicles & Related Accessories, Equipment, Parts and Services, 070G and EZGO Golf, Utility & Hospitality Carts, Parts, Supplies & Related Services, 071A – These contracts cover an assortment of electric vehicles, all of which are quiet and release no emissions.
- **Carpet, 360A** – Recycled or recyclable content is required by the carpet covered within the nylon carpet specification.
- **Propane, 405A** – Propane is the third most popular vehicle fuel in the world. It is produced as a by-product of petroleum refining or natural gas processing, with about 90 percent of the US supply produced domestically. Propane is a cleaner and cheaper fuel than the other two, with a higher-octane rating.
- **Diesel, 405B** – This contract covers bio-diesel (B20) and ultra-low-sulfur diesel (ULSD) #2. B20 blended fuel contains 80 percent diesel fuel and 20 percent virgin soy or reprocessed vegetable oil, resulting in a reduction of crude oil consumption. Compared to regular diesel, B20 biodiesel reduces emissions as follows: unburned hydrocarbons – 20 percent, carbon monoxide – 12 percent, particulate matter – 12 percent. Nearly 2 billion gallons of biodiesel were produced in the United States in 2015. Ultra-low-sulfur diesel has 15 parts per million (ppm) of sulfur content compared to 500 parts per million sulfur content of the diesel primarily used in the past, resulting in less black soot and smell. Additionally, use of ULSD enables the use of advanced emissions control devices that reduce the precursors of ozone.
- **Gasohol, 405C** – A mixture of gasoline and ethanol, the ethanol content reduces emissions. Under the right conditions, carbon monoxide emissions may be reduced by up to 30 percent. Ethanol is derived from biomass, including crop waste that would otherwise be left in the field. As such, ethanol is a renewable energy source that reduces dependence on fossil fuels. E10 (10 percent ethanol) is compatible with any gasoline vehicle. E85 (85 percent ethanol) is for flex-fuel vehicles (FFV) only.
- **Pipeline Natural Gas, 405N** – Originally an unwanted by-product of producing oil, natural gas used to be burned off at the oil fields if cost-effective transportation for it was not available. Today, it is considered a valued commodity that is often returned to its reservoir for future recapture if transportation is problematic. Natural gas produces less carbon dioxide per joule of energy delivered than oil (29 percent less) and coal (44 percent less).
- **Furniture, All Types, 420A** – Contractors support sustainability through different practices. Mechanical parts can be recycled or replaced, thereby extending service of the item. Packaging is recyclable. Wood may be ground up into particleboard. Packaging may contain from 15 to 75 percent post-consumer waste and is reusable. Wood, plastic and metal contain recycled post-consumer content and are recyclable. Product offerings are using more sustainable methods because they offer a competitive

price advantage compared to those that use all virgin materials. Soy foam in chair seats and backs is now becoming available and is more environmentally friendly because it is made partly from soybeans, a renewable resource.

- **Bedding Mattress Term Contract, 420E** – Mattresses comprised of innersprings (like the type used primarily in the residential and hospitality bedding industries) now require successful evaluation to the 16 CFR Part 1633, the Consumer Product Safety Commission’s new mattress flammability testing standard, “Standard for the Flammability (Open Flame) of Mattress Sets.” Successful evaluation of products offered continue to require the 16 CFR Part 1632, Standard for the Flammability of Mattresses and Mattress Pads (directed toward cigarette ignition of mattresses). The revised specifications promote increased safety and durability to extend product life.
- **Industrial, Medical and Specialty Gases, 430A** – These gases are delivered statewide in reusable cylinders and are exchanged when replacement cylinders are needed.
- **Maintenance, Repair & Operation Supplies, 445B** – Items which were offered under the following contracts are now covered under this contract: Ballasts (285B), Dry Cell Batteries (450A), Energy Saving Devices (285D), LED Lighting (285C). Lamps may contain up to 65 percent recycled content, including glass and mercury. Lamp packaging that may contain 73 percent recycled content. Some of the lamps are low mercury (TCLP compliant), non-hazardous. Low-flow plumbing fixtures are offered to reduce water consumption.
 - Ballasts – Electronic types are available that are up to 30 percent more energy efficient, last longer, support variable illumination and reduce electromagnetic radiation compared to the older magnetic ones. Electronic ballasts contain no PCBs and can be disposed in the trash. Reduced product shape and size (form factor) also minimizes packaging and metal enclosure requirements.
 - LED Lighting – Contract consists of lamps for cove lighting, area lighting, downlights, troffers and wall packs employing LED illumination for energy savings. Packaging is 60 percent recycled materials. LED illumination uses 80 percent less energy than incandescent bulbs and lasts up to 25 times longer.
 - Energy Saving Devices – Contract includes T8 size tubular fluorescent retrofit kits, LED exit signs, LED exit sign retrofit kits, occupancy/vacancy sensors, electronic dimmable ballasts, and controls. Products use LED illumination and dimmable ballasts for energy savings. T8 fluorescent lighting provides higher energy efficiency and less heat generation than older T12 lighting.
- **Locks, Locking Devices & Accessories, 450B** – Product metal content includes 26 to 31 percent pre-consumer recycled materials and 4 to 6 percent post-consumer recycled materials. Some models support the material and resources credits for Leadership in Energy and Environmental Design (LEED) building certifications.
- **External Defibrillators, 465B** – Defibrillators can be refurbished and packaging materials can be recycled.
- **Grounds Maintenance Equipment, 515B** – Contract includes, walk behind products/equipment, mowers and lawn and garden tractors, hand-held equipment, tractors, utility vehicles, golf and turf equipment, and other equipment. This equipment typically contains 20 percent recycled steel and plastic.

- **Traffic control Devices, 550A** – Traffic cones have UV stabilizers to provide longer life. Pavement marking materials contain 60 percent recycled content, and 29 percent of the components are rapidly renewable resources (such as pine trees, sunflowers, cotton and soybeans).
- **Vehicle Dedicated and Bi-Fuel Propane Conversion Kits, 557A and 557B and Vehicle Natural Gas Conversion Kits, 557C and 557D** – These contracts enable existing vehicles to be converted from 100 percent gasoline-fueled into cleaner-burning propane- or natural gas-fueled.
- **Office Supplies, 615A** – Contractors are required, to the extent feasible and practical, to offer recycled products, including packaging, especially those having post-consumer waste content. Wherever possible and practical, these products should be identified with their recycled content.
- **Remanufactured Toner Cartridges, 615A** – G.S. 130A-309.14 requires the purchase and use of remanufactured toner cartridges to the extent practicable. All spent toner cartridges under this contract must be collected by the vendor during regular office supply deliveries, and complimentary recycle bins are available.
- **Napkins, Bathroom Tissue, Paper Towels and Toilet Seat Covers, 640A** – All products on the contract are manufactured from 100 percent recycled fiber, with post-consumer content meeting or exceeding EPA Comprehensive Procure Guideline (CPG) standards. All products are also manufactured using either elemental chlorine-free or chlorine-free systems. All bathroom tissue and some paper towels are certified to the Green Seal GS-1 environmental standard.
- **Office Paper, 645A** – Pursuant to NC law (G.S. 143-58.3), all available paper types on this contract offer 30 percent post-consumer content choices, compliant with the EPA's Comprehensive Procurement Guidelines (CPG). Recycled paper reduces landfill waste while conserving forest resources.
- **Bags, Plastic, Trash, 665B** - Liners contain a minimum of 10 percent post-consumer or pre-consumer reprocessed copolymer. High-density material options are offered that utilize up to 70 percent less plastic than the same strength low-density material. All the liners awarded were thoroughly evaluated for strength and performance.
- **Agricultural Chemicals, 675A** – Recyclable containers are encouraged when available.
- **Ammunition, 680A** – Brass shell casings can be saved and recycled, and other casings can be reloaded.
- **Construction Equipment, 760H** – Construction Equipment covers excavators, wheel excavators, track loaders, compact track loaders, wheel loaders, skid steer loaders, backhoe loaders, crawler dozers, crawler loaders, wheel dozers, motor graders, utility cranes, and compactors. Appropriate attachments or equivalent products are included in the contract. Equipment manuals and parts catalogs are provided in hard copy and electronic copies. Engines meet current EPA Tier and emissions guidelines.
- **Tires and Tubes, 863A** – Tire manufacturers are actively committed to improving sustainability for their products. For instance, low rolling resistance tires are available that improve fuel efficiency (Firestone Fuel Fighter, Bridgestone Ecopia, Michelin Energy Saver, for example). Longer treadwear warranties are available, such as Bridgestone Alenza at up to 80,000 miles and Michelin Defender at 90,000 miles. Recycled rubber content in new tires used to not exceed 2 percent, but Bridgestone

Ecopia has 5 percent recycled content in the treads. While that recycled content sounds small, the annual volume of tires is so large that if all tires went to 5 percent recycled crumb rubber content, the market for recycled crumb rubber in new tires would exceed 150 million pounds annually. The tire industry is aggressively investigating technology to allow higher rubber reuse, without increasing rolling resistant (and thereby hurting fuel efficiency).

- **Recycling Services for Fluorescent Lamps, Ballasts & Other Mercury Containing Devices, 926B** – This contract assists agencies and local governments with contracted disposal of products containing mercury, diverting that toxic material from landfill disposal, as required by G.S. 130A-310.60. From July 2017 through June 2018, the following recycling was reported: 319,324 lamps; 11 pounds of other mercury devices; 21,588 pounds of ballasts; 86,306 pounds of batteries; and 4,625,971 pounds of computer equipment.
- **Electronic Equipment Recycling Services, 926C** – North Carolina requires that its recycled electronics not contribute to unsafe and environmentally damaging processing practices. The purpose of this contract is to assist agencies in complying with the state’s electronic recycling requirements (G.S. 130A-309.130 through .142) by providing recycling service options for end-of-life electronic equipment, including the collection, de-manufacturing, and recycling of computer monitors, televisions, desktop CPUs, laptop computers, printers, scanners, keyboards and mice, copy machines, tablets, DVD players, VCRs, stereo systems, tape players, CD players, radios, telephones, cell phones, readers, network equipment, servers, fax machines, electronic games, cable and wire, batteries and other consumer electronics generated by State of North Carolina agencies and other eligible users. Eligible contract users include county and municipal governments, local education agencies, community colleges, state universities and other local public agencies or authorities. Some recycled products generate a revenue stream that may be used to pay for the recycling of other products.
- **Equipment Maintenance Management Program, 936A** – Regular maintenance and repair of equipment prolongs equipment life, resulting in frequent product replacement and disposal.
- **Pharmaceutical Waste Disposal Services, 948A** – Proper disposal of pharmaceutical wastes provides for a cleaner and safer environment.
- **Vehicle Rental Services, 975B** – Among the vehicles available are compacts, hybrids and alternative fuel vehicles.

8. Items Aiding Waste Reduction Purchased by State Agencies through Term Contracts and Open Market Purchases

The following items purchased by state agencies meet the criteria for aiding waste reduction by being reusable, refillable, repairable, more durable and/or less toxic than their traditional counterparts:

Reusable
Refrigerant Recovery System (filters
reusable refrigerant), Recycled Carpet fiber,

Used
Breakers, Cubicles, Heavy Machinery,
Helicopters, Lab Equipment, Medical
Equipment, Printing Press, Storage

Re-refined Motor Oil, Recycled Paper fiber, Recycled Antifreeze, Recycled Content Furniture (not traditional wood), Printers, Toner Cartridges, Uniforms

More Durable

Above-Ground Vaulted Fuel Storage Tanks, Classroom Furniture, Electronic Lamps and Ballasts, Vacuum Cleaners, Floor Polish, Grader Slope Attachment, Plastic Lumber, Mattresses, Vertical File Cabinets, Wood Case goods, Wood library furniture, LED Lighting

Energy Star – Reduced Energy Consumption Audio Visual System, Changeable Message Signs – Solar Powered, Domestic Appliances, Lighting Fixtures, Lamps, Warning Lights – Vehicle Safety, Water Coolers

Flow Plumbing Fixtures for Reduced Water Consumption – 0.5 GPM lavatory facet nozzles and 1.5 GPM showerheads support the Governor's water conservation initiative during severe water restrictions throughout the state.

Recycled content

Office Paper, Napkins, Paper Towels, Bathroom Tissue, Plastic Trash Bags, Tires Locks, Vehicles, Furniture, Re-refined Motor Oil, Recycled Antifreeze, Storage Batteries.

Refillable

Ammunition – Cartridge Refills, Drums – Steel, Fire Extinguishers, Cylinders for Welding, Medical and Specialty Gases, Fuel Tanks, Self-Contained Breathing Apparatus, Toner Cartridges, Containers, Trailers, Vehicles (automobiles, buses and trucks), Firearms

Containers, Trailers, Vehicles (automobiles, buses and trucks), Firearms

Repairable

Defibrillators, Musical Instruments

Refurbished/Rebuilt

Beds, Breakers, Exercise Equipment, Medical Diagnostic Equipment and Instrumentation, Remanufactured Toner Cartridges, Scientific Equipment, Storage Containers

Longer-Lasting

Floor Maintenance Machine Batteries, Library Furniture, Aluminum Nuts and Bolts – non-rusting alloys, Fluorescent electronic ballasts permit longer lamp life, LED lighting, extended-surface HVAC air filters, synthetic lubricants

Less-Toxic

Alternative Fuel Vehicles, Compact Vehicles, Hybrid Vehicles, Electric Vehicles, Dry Cell Batteries, Electronic Lamps and Ballasts, Fertilizers/Farm Chemicals, Inks for printing (using non-petroleum based inks), Instructional Art Materials, Markerboard Markers, Mattresses, Scientific Products (eliminating Freon), Refrigeration and A/C Equipment, Synthetic and Biodegradable Lubricants, Chlorine-free Sanitary Paper Products (napkins, paper towels, bathroom tissue), Cleaner Fuels (propane, gasohol, natural gas, bio-diesel), Diesel Exhaust Fluid, Vehicle Fuel Conversion Kits, Disposal/Recycle Programs (mercury content, electronics, oil, antifreeze, pallets, tires, batteries, steel)

Recyclable

Commodity Packaging, Commodity Metal enclosures & parts, Plastics, Steel and Reinforced Concrete Pipe, Chain Link

Fencing, Electrical Wire, Treated Lumber, and Motor Oil – refined, HVAC & Refrigeration Equipment – Refrigerants, Toner Cartridges, Motor Oil, Antifreeze.

For more information regarding this report, please contact William Sam Byassee, deputy director of the Division of Purchase and Contract, at 919-807-4533 or sam.byassee@doa.nc.gov.

K. Department of Transportation - Recycling and Solid Waste Management Report for Highway Construction and Maintenance Projects

This report is a summary of the recycling and solid waste management efforts on highway construction and maintenance projects within the N.C. Department of Transportation for State Fiscal Year 2018 (July 1, 2017 - June 30, 2018) as required by G.S. 136-28.8(g) and G.S.130A-309.14(3). These statutes mandate that the NCDOT prepare an annual report on the amounts and types of recycled materials specified or used in construction and maintenance projects during the previous state fiscal year and review of bid procedures, respectively. The types of recycled materials incorporated into this report would routinely contribute to the consumer and industrial waste streams, compounding the problem of declining available space in landfills.

Efforts to use recycled and solid waste materials are in response to the requirements of G.S. 136- 28.8(b), which mandates the Department use recycled materials in highway projects. All applications of recycled materials are to be consistent with economic feasibility, applicable engineering, and environmental quality standards. In addition, the NCDOT continues to comply with Chapter 136 of the General Statutes to encourage the purchase or use of reusable, refillable, repairable, more durable and less toxic supplies and products.

1. Research

NCDOT is continuously looking for new and innovative ways to reuse materials, reduce waste, recycle used products, and use products comprised of recycled content. This year, NCDOT became a partner state with the Recycled Materials Resource Center (RMRC). The RMRC is a research-based organization that investigates the best practices and safe use of materials in DOT projects. Through this partnership, NCDOT can propose outreach and research projects for the RMRC to develop. Additionally, NCDOT now has relationships with many other state DOTs and can share the successful products, technologies and processes that promote the reduction of waste from construction and maintenance activities with each other.

2. Bid Procedure Review

The department continues to review bidding procedures and processes yearly, to encourage the purchase and use of recycled and reusable products and practices in construction and maintenance projects. The newest edition of the NCDOT Standard Specifications for Roads and Structures was released January 2018. Specification 104-13 encourages contractors to not only use recycled or solid waste materials in their projects, but also allows them the opportunity to initiate and develop the use of recycled

products and construction methods that promote sustainability. Furthermore, the contractor is required to report to the Value Management Office (VMO) any use of recycled materials by July 1 each year.

3. Data Collection

In SFY 2017, NCDOT introduced an online form for recycled data collection from both NCDOT offices as well as contractors. The process was beneficial for the Department as a whole. However, to continually improve the Resource Conservation Program and gather the most accurate data available, the VMO personnel met with employees from across the state. It was determined that much of the data on the reporting form could be collected from HiCAMS (Highway Construction And Materials System). HiCAMS is a database utilized during construction projects by Project Managers to aid in contract administration. The database tracks materials used and payments to contractors.

After meeting with the HiCAMS team and determining how the recycled materials could be tracked, a report was formed that can be pulled at any time throughout the year using various parameters of dates, specific Divisions, materials, etc. The HiCAMS information, however, is not conclusive, as maintenance project materials are not included. The online form was adjusted to collect only those materials, so as not to collect double information. The data given in this report was collected through HiCAMS reporting as well as through the online form.

**Table 29. North Carolina Department of Transportation
Recycled Products and Solid Waste Use in Construction and Maintenance Projects
Fiscal Year July 1, 2017 – June 30, 2018**

Product Category and Description	Usage	Quantity	Unit of Measure
1-Asphalt:			
Reclaimed Asphalt Pavement (RAP)	Asphalt Mix Additive	5,510,000*	Tons
Reclaimed Asphalt Shingles (RAS)	Asphalt Mix Additive	2,290,000*	Tons
2-Organics:			
Mulch	Wood	4,500	Cubic Yards
Mulch	Hydromulch	8,600	Bales
Compost Material	Soil Amendment	5,100	Cubic Yards
3-Coal Combustion Products:			
Fly Ash	Concrete Mix Additive/Fill	8,800*	Tons
4-Concrete:			
Recycled Concrete	ABC/Fill Material/Base Material	3,200	Tons
5-Glass:			
Glass Beads	Pavement Markings	6,800*	Tons
6-Plastic:			
Recycled Plastic Offset Blocks	Guardrail Offset Blocks	280,000*	Each
Recycled Plastic Pipe (All Types and Sizes)	Pipe	144,000*	Linear Feet
Plastic Jugs	Recycled Herbicide Containers	650	Each

Type III Barricades		34,300*	Linear Feet
7-Scrap Tires:			
Tire Sidewalls	Traffic Drum Ballast	58,900*	Each
8-Misc. Materials:			
Guardrail		184,000*	Tons
Wood Posts		15	Each
Signs		209,000	Square Feet
Steel Beams		91	Each
Signal Heads		50	Each
Silt Fence Posts		11,900	Each
Sheet Piles		5,500	Square Feet
Cable Guiderail		991,000	Linear Feet
Sign Posts		9,500	Each
Paint Totes		4	Tons
Recycled Metal Pipe		160	Tons
Scrap Metal		260	Tons

APPENDIX
Brownfields Agreements Finalized Between
October 1, 2017 through September 30, 2018

DSCA Site Status Definitions

Certified:	The DSCA Program has entered into an agreement with a petitioner and is in the process of assigning a state-hired, independent environmental contractor to conduct a prioritization assessment.
Assessment:	The DSCA Program's independent environmental contractor is determining the extent of soil and groundwater contamination at the site.
Monitoring:	The DSCA Program's independent environmental contractor is monitoring the levels of contaminants in the groundwater at the site.
Remediation:	The DSCA Program's independent environmental contractor is performing cleanup at the site.
Interim Action:	Site conditions are favorable for source removal or for conducting a pilot study for remediation.
Emergency:	The DSCA Program has determined there is an immediate need for corrective action to abate a potential hazard to human health or the environment.
On Hold:	Please contact the site's project manager for more details.
Closure:	The extent of contamination is defined and considered stable. The DSCA Program is developing and implementing a risk management plan to protect human health and the environment from remaining contamination.

APPENDIX B. INACTIVE HAZARDOUS SITES INVENTORY-SITE STATUS

Note: Upon discovery, sites are added to the Evaluations Pending or Pollutant Only Site-Open categories of the Inactive Hazardous Sites Inventory. As resources are available, the sites are ranked and transferred to the Sites Priority List. The Sites Priority List is used to determine the order of full-scale remedial actions at sites without responsible parties, providing funds are available for such. If a party volunteers to clean up a site and enters into an agreement with the Division, the site is then transferred to the Voluntary Action category. Once cleanup is complete, the site is transferred to one of the "No Further Action" categories (NFAs). Information on contaminants and contaminated media have only been compiled for the Sites Priority List. That information can be found in Appendix A. Other information on sites activities this reporting year can be found in sections II -V of this report. Location information on the pre-1983 landfills can be found in Appendix C.

N.C. County Waste Disposal Report FY 2017-18

Watauga

Calculated Total:

53,068.13

Population:

56,418

Tons/Person:

0.94

Calculated Amount of waste disposed by county = [MSW Landfills + CD Landfills] + [Waste Exported out of county to recycling facility or transfer station] - [Waste imported into county to a recycling facility or transfer station]

Landfilled Waste

Solid waste landfilled in the county's name:

Total: 53,048.33

Waste	Total
MSW	53,048.33

Exported Waste

Solid waste sent outside the county to transfer station or recycling facility and subsequently landfilled:

Total: 19.80

Waste	Total
MSW	19.80

Imported Waste

Solid waste received in the county at transfer station or recycling facility and subsequently landfilled:

Total: 0.00

Facilities Listing County as Source of Waste

Facility Name	Tons Received / Tons Transferred
1403-MSWLF-1998 Foothills Environmental Landfill	53,048.33 / 0.00
1805-TRANSFER-2001 GDS Recycling Services	146.08 / 19.80
9503T-TRANSFER-1996 Watauga Co Transfer Facility	51,288.00 / 51,288.00

N.C. County Waste Disposal Report FY 2017-18

Wayne

Calculated Total:

117,228.82

Population:

124,227

Tons/Person:

0.94

Calculated Amount of waste disposed by county = [MSW Landfills + CD Landfills] + [Waste Exported out of county to recycling facility or transfer station] - [Waste imported into county to a recycling facility or transfer station]

Landfilled Waste

Solid waste landfilled in the county's name:

Total: 98,657.37

Waste	Total
MSW	128.92
MSW	76,194.03
CD	22,334.42

Exported Waste

Solid waste sent outside the county to transfer station or recycling facility and subsequently landfilled:

Total: 18,571.45

Waste	Total
MSW	18,535.88
MatRecovery	35.57

Imported Waste

Solid waste received in the county at transfer station or recycling facility and subsequently landfilled:

Total: 0.00

Wilkes	97-04	MSW
Wilkes County MSW Landfill		
Open Date	10/7/1993	
Survey Date	5/3/2018	
Years Open	24.6	
Fiscal Year Tons	57,243.41	
Total Tons Disposed to Date	1,274,986.00	
* Average Tons per Year	51,893.10	
Volume Used	2,750,270	
Volume Constructed	2,892,662	
Total Permitted Volume	4,661,952	
* Compaction Density	0.46	
* Remaining Volume for Future Construction	142,392	
* Remaining Permitted Volume	1,911,682	
* Approximate Constructed Remaining in Tons	66,010.9	
* Approximate Constructed Remaining in Years	1.3	
* Remaining Constructed in Fiscal Year Tons	1.2	
* Approximate Total Permitted Volume Remaining in Tons	886,229	
* Approximate Total Permitted Volume Remaining in Years	17.1	
* Approximate Total Tonnage Remaining in Fiscal Year Tons	15.5	

Calculated Values:

Average Tons = (Total Tons Received) / (Years Open)

Compaction Density = (Total Tons) / (Volume Used)

Remaining Volume for Future Construction = (Volume Constructed) - (Volume Used)

Remaining Permitted Volume = (Volume Overall) - (Volume Used)

Approximate Constructed Remaining in Tons = (Volume Constructed Remaining) x (Compaction Density)

Approximate Constructed Remaining in Years = (Volume Constructed Remaining in Tons) / (Average Tons)

Remaining Constructed in Fiscal Year Tons = (Volume Constructed Remaining in Tons) / (Fiscal Year Tons)

Approximate Total Permitted Volume Remaining in Tons = (Volume Overall Remaining) x (Compaction Density)

Approximate Total Permitted Volume Remaining in Years = (Volume Overall Remaining in Tons) / (Average Tons)

Approximate Total Tonnage Remaining in Fiscal Year Tons = (Volume Overall Remaining in Tons) / (Fiscal Year Tons)

Number of Reports: 106

Note:

The data for these calculations are collected from Annual Facility Reports.

The calculations are based on historic tonnage and compaction density data. The approximations may be affected by changes in operations, waste stream characteristics or growth.
