

North Carolina Child Support Incentives – Proposed Plan
Session Law 2017-57, SECTION 11C.6.(d)

Report to the
Joint Legislative Oversight Committee on
Health and Human Services
and
The Fiscal Research Division

By

North Carolina Department of Health and Human Services

October 30, 2020

In 2015, North Carolina Session Law 2015-241, Section 12C.7(d) was enacted, requiring the North Carolina Child Support Services (NCCSS) program to achieve four objectives:

- retain up to fifteen percent of the federal earned incentives;
- review the incentives methodology;
- prepare the incentives guide; and
- submit a report to the Joint Legislative Oversight Committee on Health and Human Services and the Fiscal Research Division by November 1 of each year regarding the progress of the implementation plan.

This legislation was renewed, without amendments, in 2017 under North Carolina Session Law 2017-57, Section 11C.6(d).

Retained federal incentives

Under Session Law 2017-57, Section 11C.6 (d), NCCSS retained fifteen percent of the federal earned incentives received from the annual federal award beginning July 1, 2016. To date the state has retained the following:

State Fiscal Year	Total Incentives Received	Amount Retained by State
SFY 2016	\$14,249,571	\$2,137,436
SFY 2017	\$14,675,156	\$2,201,273
SFY 2018	\$14,309,773	\$2,146,466
SFY 2019	\$14,259,825	\$2,138,974
SFY 2020	\$14,458,422	\$2,168,763

Incentives Methodology

In State Fiscal Year 2020, the incentive workgroup merged with the NCCSS Policy Modification Liaison Committee (PMLC), a committee that meets regularly to review proposed modifications and enhancements for the program, as well as provide input regarding the priority of any such changes. The group represents both state and county child support professionals. At the time legislation was enacted, the incentive calculation method was carefully reviewed, and the recommendation was that no changes be made to the logic used in the incentive calculations.

Incentives Guide

NCCSS developed an Incentives Guide, which includes the incentives performance methodology, incentive overview, suggested use of incentives and instructions for exemptions. The guide is reviewed each state fiscal year to determine if there are any needed updates. The guide has been provided to the counties electronically and is available for download at any time through Child Support Services' SharePoint portal.

NCCSS developed an annual plan and report for incentives and each county is required to submit its plan by September 5th of each year. This plan and report documents

county reinvestment of federal incentive funding supporting the Child Support Program goals.

Implementation Plan

As mandated, fifteen percent of the federal incentives has been retained annually for reinvestments into the Child Support Program since state fiscal year 2016. As described below, the child support technical enhancements that have been achieved and planned to be implemented are designed to assist local child support agencies in increasing their performance and overall effectiveness.

NCCSS continues to collaborate with the Information Technology Division (ITD) to provide a description of technical needs, an analysis of options, proposed information technology solutions, timelines and cost, and how initiatives will be prioritized and implemented. The State continually works in partnership with the PMLC regarding implementation for all changes, enhancements and updates, including setting priorities for each.

Since its inception, NCCSS has completed several technology projects, and has initiated additional projects set to be implemented in the coming months. The following is a list of actions that have been completed:

- A multi-year project timeline was developed for executing the enhancements.
- Cost estimates, along with documented functional and technical requirements were completed.
- An updated child support application was created to assist local offices with ensuring data elements required for the federal data reliability audit are obtained.
- An online child support application process was created, providing citizens a quick and secure means to obtain information and apply for services online.
- In conjunction with the online application, a new Worker Portal was created that allows staff in the local offices to receive the data from the online application, review the information for any needed information, and then use the data from the online application to build the new case in the Automated Collection and Tracking System (ACTS).
- Improvements were made to the design of the eChild Support – a website for employers and parents to make payments, access child support information and inquire about their case. These improvements have provided a user friendly and secure environment for our customers and is now in-line with the North Carolina Identity Management process.
- To assist local offices in searching for Non-Custodial Parents (NCPs) who are failing to pay their court ordered child support on a regular and consistent basis, or who are avoiding service in the effort to obtain an Order, a contract was established with a company that specializes in location services. Through this contract, the local offices have been able to focus their efforts on cases that require specialized intervention to collect child support, resulting in parents meeting their obligations and increased collections.

- The *Request to Pursue IT Initiative* was granted by the Information Technology Governance Body (ITGB) to allow the Program to seek additional payment solutions. These new options will provide end users with the capability to submit child support payments to NC Child Support Services by way of cash, check, or debit/credit card utilizing one or more payment services including an interactive self-service kiosk, an interactive voice response system, mobile application, and/or walk-in payment site. Expanding the payment options offers greater convenience for our noncustodial parents to pay child support and leads to an overall increase in child support collections.
- A secure mobile optimized website was launched in January 2020. The new site is specifically designed to accommodate users that access the website via computer, smartphone or tablet. Allowing our customers to easily access their case information, request an appointment with their caseworker, make a payment, seek a review and modification of their order, upload documents, and many other features.
- Automation of a letter regarding 18-year-old children still attending school was implemented. The letter is now automatically generated and sent to both the custodial and noncustodial parent ninety (90) days prior to the child in his/her case turning eighteen (18). This information is essential to determine whether the child support order should extend beyond the child's 18th birthday according to NC General Statutes.
- A Request for Proposal to conduct a business case analysis for the modernization of ACTS has been approved by the ITGB. The process has been initiated with the Statement of Work (SOW) being completed. Onboarding of the selected vendor is expected by January 2021.
- Research and implement technology that sends text notifications to parents regarding important case information and updates.

As the program progresses into state fiscal year 2021, the primary focus is will be in conducting a business case analysis and completing the required documentation for use in the CSS system modernization effort.

It is worth noting that this modernization effort will allow:

- Enhanced reporting tools to provide the ability to view, evaluate, analyze, and diagnose a variety of child support case attributes;
- Provide staff with access to more robust information on which to base decisions and child support actions;
- Provide managers tools to assist in their decision making;
- Improved data analytics to increase performance and collections for families; and
- Expansion of ACTS to include a location request link to the State Services Portal.

Specific goals for this effort are as follows:

- 1) Identify relevant stakeholders
- 2) Conduct analysis of current business procedures.

- 3) Conduct analysis of current systems.
- 4) Identify new system requirements.
- 5) Conduct to-be business process analysis.
- 6) Conduct to-be systems analysis.
- 7) Conduct market analysis.
- 8) Complete cost benefit analysis.

Future improvements that are still being considered for implementation in the future include:

- Enhancing the customer service call center capabilities.
- Interface with the Department of Vital Records.
- Research additional tools, such as an interface with CLEAR location solutions, to improve collections.

The above referenced projects will be prioritized and implemented based on project expenditures and the availability of funds.

As federal regulations change, and systems requirements are revised, NCCSS will continue to evaluate the needs and enhancements for the child support program.
