SUBCOMMITTEE ON MILITARY, VETERAN AND

INDIAN AFFAIRS

The following final report of the House Select Committee for Federal Education Grants is hereby submitted pursuant to your directive of September 4, 1997. Enclosed are the final report, which includes a recommended bill for the 1999 legislative session, along with the following other Attachments:

- 1) Workforce Development (Vocational) Education program review form
- 2) Workforce Development (Vocational) Education contracts, fiscal years 1996-98
- 3) Vocational Education--State Allotments, fiscal years 1994-98
- 4) Abstinence-Until-Marriage program review form
- 5) Character Education program review form
- 6) N.C. Partnership in Character Education budgets, fiscal year 1996-97
- 7) N.C. Partnership in Character Education budgets, fiscal year 1997-98
- 8) Charter Schools program review form
- 9) Report on Federal Abstinence-Until-Marriage legislation by Mrs. Ann Frazier
- 10) Address by Mr. Thomas E. Williams to the House Select Committee
- 11) Letter from Congressman Tom Coburn, M.D.
- 12) Bill for the 1999 session of the General Assembly, proposing a Federal Funds Oversight Committee

Jonald Spencer Davis

Chairman, House Select Committee for Federal Education Grants

The Interim Report of the House Select Committee for Federal Education Grants, May 28, 1998, is hereby approved by the following Select Committee members:

Rep. Russell Capps
Jenes On
Rep Don Davis
State Like
Ren Sandy Hardy

Final Report

Pursuant to the directive by the Speaker of the House, Harold J. Brubaker, on September 4, 1997, the following is the final report of the House Select Committee for Federal Education Grants to the 1999-2000 first session of the House of Representatives.

The interim report reviewed federal education grants pertaining to Goals 2000, Child Nutrition, and School-to-Work (STW) programs. There is no need to revisit those programs, except to update the findings concerning the state's STW JobReady program, and to further address the subject of national teacher certification which was covered in one of the interim report's recommendations. Therefore, the final report will review federal education grants pertaining to vocational education, abstinence-until-marriage education, character education, and charter schools. The following are the Committee's findings:

1) Regarding a specific analysis of federal funds appropriated, program descriptions, State and local matching funds related to these federal grants, maintenance of effort requirements, and the impact of match requirements on the State budget, see Attachments 1-3 concerning vocational education, Attachment 4 regarding abstinence-until-marriage education, Attachments 5-7 pertaining to character education, and Attachment 8 related to charter schools.

Especially concerning vocational education, the mission of the Carl D. Perkins Vocational and Applied Technology Act has included improving education programs leading to occupational competence. In that regard, the State Board of Education promotes the movement of students away from the "general track" and into either a college prep or college tech-prep track. While the State Board was recently presented with figures showing there had been an increase of "completers" in these tracks from 59.61% in 1996-97 to 66.327% in 1997-98, the House Select Committee staff requested a breakdown of these figures and found that the percentage of college tech-prep completers had only increased from 1.80% to 2.478% (there is an additional percentage who would qualify as both college prep and college tech-prep completers). Most of the increase had come in the college prep area (45.56% to 49.308%). There is absolutely nothing wrong with an increase of students wishing to go to college. However, if statistics show that only 25-30% of students are graduating with 4-year college degrees, the college tech-prep track becomes very important.

Part of the problem in this regard was addressed by the House Select Committee in its hearings when the issue of what constitutes a college tech-prep completer arose. The State Board of Education and the Department of Public Instruction (DPI) have defined such a completer as a student who has taken at least 4 courses in one occupational cluster, with at least one of these courses being an upper level course (e.g., the student takes Electronics I & II). When DPI staff was asked whether a student taking Electronics I, II & III would be a completer, if he or she did not take a 4th course in the cluster because of a scheduling problem (e.g., the school district is small or poor and could only offer the 4th course at the same time as Senior English or Tech-math II, which are required also to be a completer or to graduate), the House Select Committee was told that student would <u>not</u> be a completer. DPI staff indicated that its singular definition of what should be required of

a completer was supported by research from the Southern Regional Education Board's "High Schools That Work" project, from research done by Mathematica Policy Research, and from others.

When the House Select Committee staff contacted Gene Bottoms, director of the High Schools That Work project, he indicated that "there needs to be some flexibility at the LEA level" concerning what constitutes a college tech-prep completer. The same answer was given by Alan Hershey, who heads Mathematica's research in this area. In addition, Hershey referred to research by John Bishop of the Center for Advanced Human Resource Studies at Cornell University, which "finds that among those students who find work in an area related to their vocational studies, those who 'concentrate' do better in employment. A 'vocational concentrator' is a student who completed 3 or more carnegie units in a specific labor market preparation area. This definition of 'concentrator' is less stringent than a 'vocational specialist' who completed 4 or more carnegie units in a specific labor market preparation area, with at least 2 in a second or later course (DPI's definition)."

The reason for pointing this out is that the State Board of Education's and DPI's inflexible definition may be harming the effort to have more students be college tech-prep completers. This is especially true when one considers that if a student takes, for example, Electronics I & II and then decides to change clusters, he or she has to take an additional 4 courses in that other cluster to be a completer.

Another mission of the Perkins Act deals with programs designed to eliminate sex bias. Relevant to this, DPI and others published "LEA Guide for Local Career Development Planning, 1998-99," which dealt with students' "personal beliefs and attitudes" several times, including asking students to "identify evidence of gender stereotyping and bias in educational programs and occupational settings." Because there is a great deal of controversy regarding educators' probing and trying to change students' beliefs, the House Select Committee staff raised the question of how a teacher would deal with a student who believed women should be in the military services, but not as combat infantry soldiers.

Pertaining to charter schools, there was a concern that the federal law (Improving America's Schools Act of 1994, Title X) providing for charter school funding, stated: "The Federal government should test, evaluate,...the effects of these schools" (Part C, Sec. 10301). The House Select Committee staff asked what specific federal tests and federal evaluations would be used to examine the effects of these schools. DPI staff indicated they would have to check into that.

2) Concerning an examination of potential State and local duplication of federal programs (including cost analysis), there appears to be no duplication except possibly in the area of character education. An external evaluation of the program was presented to the N.C. Partnership in Character Education in the Fall of 1997 comparing case-study schools with the Partnership to character education programs in a statewide random selection of schools. The evaluation revealed a similar level of involvement in the case-study and randomly selected schools, with the statewide schools actually showing more involvement at the middle school level. Furthermore, the evaluation stated: "Case-study schools reported least often building community consensus about character education

elements and talking to community groups about character education." Moreover, the evaluation found that case-study principals indicated "civic virtue" was the least identified element in their character education programs, and these principals reported including "courage" less than the statewide schools (50% compared to 80%). When asked about this, DPI Associate Superintendent Dr. Henry Johnson replied that "sometimes one of the advantages of a pilot is to, in fact, show that it's not needed."

Regarding charter schools, Attachment 8 gives the amount of state funding for charter schools in addition to the federal funds. Plus, the question could be raised as to why a charter school such as Exploris receives not only federal funds, but the legislature was asked to appropriate an additional \$2 million to be used by Exploris, and at the same time, it was receiving multiple millions of dollars in private funds.

Pertaining to vocational education, while there is not duplication, there does seem to be fragmentation of effort between DPI and the Commerce Department's STW JobReady program, and this was covered in the interim report of the House Select Committee.

3) Concerning a specific analysis of contracts awarded with federal grant funds or contracts related to federal grants programs using state funds, detailed figures are given for vocational education at the end of Attachment 1 and all of Attachments 2 and 3. Figures for abstinence-until-marriage are given at the end of Attachment 4, though they are general due to the pass-through nature of the federal funds through DPI to the LEAs. There were some questions raised regarding the use of funds by a number of LEAs to procure the training services and materials of Dr. Donna Breitenstein because of the possibility that a "mixed message" (not exclusively abstinence-until-marriage) had been offered (see Attachment 9, a report by Mrs. Ann Frazier to the House Select Committee). Detailed figures for character education are given at the end of Attachment 5 and all of Attachments 6 and 7. A specific breakdown of figures is given in Attachments 6 and 7, which is important because the "contracts" figures for Attachment 5 are different from those in Attachments 6 and 7. Detailed figures are given for charter schools at the end of Attachment 8.

There was a question raised in the area of character education regarding the amount being paid to consultants. For example, in the first year, Wake and Cumberland counties were paying \$1500 per day to several consultants (see Attachment 6), which DPI Associate Superintendent Dr. Henry Johnson verified was the standard fee for consultants. And in the second year, the Charlotte-Mecklenburg system paid \$29,640 to consultants out of a total budget of \$70,776 (see Attachment 7).

4) Regarding identification of the number of positions and salaries related to the grants including the amount of manpower used to administer federal grants at the state level, total funds expended for the administration/leadership of Vocational Education at DPI and the LEAs are included in Attachments 1, 2 and 3. In FY 1997-98, DPI employed 15.54 positions from Vocational Education resources. Pertaining to abstinence-until-marriage education, all funds for this program were for State Aid (see Attachment 4, and note Attachment 9 for relevant information about LEA administrative expenditures), and no funds were used by DPI for administration. Concerning character education, total funds expended for administration of the Partners in Character Education program at DPI

and the LEAs are included in Attachments 5, 6 and 7. There are no full-time DPI personnel paid by this program; however, DPI has contracted for a part-time employee's services at \$200 per day for 92 days totaling \$18,400. Regarding charter schools, total funds expended for the administration of the Public Charter Schools program at DPI and the local charter schools are included in Attachment 8. No DPI personnel are paid with funds from this program.

5) Pertaining to the grant process, including criteria, application review, grant awarding and grant monitoring as they apply to vocational education, see Attachment 1; as they apply to abstinence-until-marriage education, see Attachment 4; as they apply to character education, see Attachment 5; and as they apply to charter schools, see Attachment 8.

There was a concern expressed at the House Select Committee hearings regarding the monitoring of the abstinence-until-marriage funds. Apparently, federal guidelines were simply passed along to the participating LEAs without an official mechanism for monitoring the compliance of all of them other than a report submitted to DPI by each LEA. Mrs. Ann Frazier has compiled information regarding the compliance or non-compliance of nearly all of the participating LEAs, and this has been submitted to the House Select Committee in the form of a report (see Attachment 9). She also indicated that other states (i.e. Louisiana, Oklahoma, South Carolina, Arkansas, Virginia and Mississippi) have established separate offices within their Departments of Education to handle this federal program, and this has helped to alleviate confusion.

Concern was also expressed at the House Select Committee hearing on character education with respect to the outside evaluation not being based upon a totally random-selected sample. The case-study schools from the Partners in Character Education program included 9 principals "based on their willingness to participate in the evaluation and their interest and involvement in character education." This positively motivated, self-selected group was then compared to a randomly selected statewide group of principals whose schools had character education programs. Furthermore, Committee staff raised the question of how a Partnership program could be considered successful when at one of the partners (the Charlotte-Mecklenburg School System) each school was asked to develop an action plan for the 1997-98 school year, but only 36.5% did so?

With regard to charter schools, the Committee asked DPI to take another look at its decision to grant each school an equal amount of start-up funding regardless of the size of its school population and other factors. Serious questions were also raised about the monitoring of each charter school's licensed teachers. A draft report undercounting the number of licensed teachers was released by DPI, and State Board of Education chairman Phil Kirk stated: "I regret that the department put into writing information that is of questionable accuracy. It is inexcusable that such damaging information was put into a report without giving the charters a chance to respond." One of the individuals testifying before the House Select Committee in this regard was Mr. Thomas Williams, headmaster of the Healthy Start Academy charter school, and his address to the Committee is Attachment 10. One of Mr. Williams' contentions is that the charter schools "are being forced into the regulations and bureaucratic morass that your legislation freed us from. It

is common knowledge that if you don't subscribe to the A.B.C. testing program you won't get a charter."

- 6) Concerning an examination of the legal issues surrounding federal grants to K-12 education including constitutional issues and the authority of the General Assembly in relationship to federal grants to K-12 education, the budgets established for the grants for vocational education, abstinence-until-marriage education, character education, and for charter schools were based upon the grant requirements as specified by the federal government. State agencies have often been given a blank check by the General Assembly in this regard (e.g., 1997 state budget, section 7.1 of S.L. 1997-443). However, it is the opinion of Gerry F. Cohen, Director of Legislative Drafting, that "the General Assembly DOES have the power to decide if federal funds are to be spent, under the authority of Article 5, Section 7 of the North Carolina Constitution." For the full text of Mr. Cohen's letter, see Attachment 11 in the House Select Committee's interim report.
- 7) Pertaining to the identification of conflicts between federal grants and State statutory provisions, there appears to be no conflict with regard to the vocational education program. Furthermore, when DPI's Director of Instructional Services, Dr. June Atkinson, was asked what impact there might be from the recently passed federal Workforce Investment Act, she indicated that Section 501(a)(2)(A) of that Act says secondary vocational education programs authorized under the Carl D. Perkins Vocational and Applied Technology Education Act would only be covered in a State's unified plan if there were prior approval of the State's legislature. House Select Committee staff also pointed out in this regard that Section 191(a) of the Workforce Investment Act states that "any funds received by a State under this title shall be subject to appropriation by the State legislature, consistent with the terms and conditions required under this title."

There appears to be no conflict between federal grants and State statutory provisions with regard to character education as well. However, there was a question raised as to why the state law concerning charter schools had to have a provision in it with respect to racial requirements when the federal law had no such provision. And regarding the abstinence-until-marriage program, there was considerable discussion about the federal law's intent that an "abstinence only" message be presented, while state law concerning sex education allows LEAs to teach a "mixed message" (e.g., abstinence or "safe sex" with condoms, etc.). Correspondence from Congressman Tom Coburn, M.D. shows clearly the Congressional intent for this legislation (see Attachment 11), and one can also refer to Mrs. Frazier's report (Attachment 9) for additional information on this matter. She has indicated that Dr. Peter Van Dyck, who is in charge of the federal abstinence-until-marriage grants at the federal Maternal and Child Health Bureau, has also clearly stated that sending a "mixed message" cannot be allowed when federal abstinence-until-marriage funds are used.

For any members of the General Assembly who are interested in the investigations carried out by the House Select Committee, the verbatim Minutes of the Committee's hearings are available.

As indicated at the beginning of this final report, there is an update concerning the interim report's findings pertaining to the State's STW JobReady program. At the time of the interim report, the House Select Committee had recommended that some amendments be made to the state's application to the federal Department of Labor for additional STW funds for JobReady, and many of those amendments were made and approved by the federal government. The Committee thereafter suggested that some additional amendments be made, especially to make it clear that student's participation must be voluntary.

The original application's reference to a Certificate of Initial Mastery (CIM) was changed to simply indicate JobReady's support of the N.C. Standards and Accountability Committee's efforts. This latter Committee has not endorsed a CIM, but there has been some discussion about a differentiated diploma (which theoretically could include a CIM in the future).

JobReady still uses skill certificates recognized by the National Skill Standards Board (NSSB), and the concern there has been the agenda of some Board members. One of them has indicated that "many of the countries of the former Communist bloc in Eastern Europe and the Soviet Union have done a better job than we of building effective human-resource development programs," which the U.S. should have "from cradle to grave and is the same system for everyone---young and old, poor and rich, worker and full-time student....Radical changes in attitudes, values and beliefs are required to move any combination of these agendas...." And another NSSB member has stated that "those who educate are more to be honored than those who bear the children. The latter gave them only life, the former teach them the art of living."

The House Select Committee wishes, though, to commend JobReady officials for making a good-faith effort to address this Committee's additional concerns, and the new amendments sent by JobReady to the federal Department of Labor have just been approved.

In the House Select Committee's interim report, there was a recommendation pertaining to the national certification of teachers in North Carolina by the National Board for Professional Teaching Standards (NBPTS). Since there has still been no study of whether national teacher certification has improved students' academic performance, the Committee recommends that the legislature consider not expanding the funding of this initiative in the future until such a study is completed. There are several reasons for this.

First, there is an <u>extremely low</u> number of minorities nationally certified. Of 207 nationally certified teachers in North Carolina in 1996-97, only six are black and one Hispanic. This should be of great concern to many, including the NAACP, and it raises a question about the fairness of the national certification process itself.

Secondly, teachers across the state will soon be asking why these nationally certified teachers should receive extra monies from the legislature for 5 years (the term of national

certification) <u>regardless</u> of their students' academic performance, while other individual teachers may receive nothing even if their students' academic performance is the best in the state?

And thirdly, there is the question of cost to the taxpayers. It has been projected in the next state budget that \$2.3 million will be the cost for these nationally certified teachers next fiscal year, and this does not even include salaries. The average teacher salary in the state is about \$31,388. The nationally certified teachers are to receive 12% above this, which comes to about \$3,767 per teacher. In addition to the 207 nationally certified teachers in North Carolina in 1996-97, there were about 329 more nationally certified in 1997-98, making a total of 536. That will amount to about an extra \$2 million in additional salaries. Thus, the total in additional appropriations for next year will then be about \$4.3 million. It is expected that over 1000 will apply for national certification next year. And at the current passing rate of about 40%, that will mean an additional 400 nationally certified teachers in 1998-99, for a total of almost 1000 nationally certified teachers. This will be an extra \$6.1 million, so that in just a few years, the cost to the state will be in the tens of millions of dollars from the taxpayers.

Also in the House Select Committee's interim report was a recommendation that a Special Provision be placed in the next legislative budget. Committee chairman, Rep. Don Davis, requested that the following be added to Sec. 7.2. G.S. 143-16.1(a):

"(a)...Each budgetary category shall show the total received and anticipated State and federal expenditures, along with a description of the purpose for which the federal funds will be spent at the program level. All expenditures for the prior fiscal year and all expenditures anticipated in the proposed budget shall be reported by objects of expenditure by purpose and shall be identified by each federal grant. For the purpose of the section, 'federal funds' are any financial assistance made to a State agency by the United States government, whether a loan, grant, subsidy, augmentation, reimbursement, or any other form...."

The State budget (Session Law 1998-212, Senate Bill 1366), including this Special Provision, was ratified by the General Assembly on October 28, 1998 and approved on October 30.

After conducting these hearings, it is the sense of the House Select Committee that since the total of federal grant dollars (not just those for education) coming into the state equals about 60% of the funds appropriated by the legislature in the state budget, it would be prudent for the General Assembly to have a report regarding these federal funds when the legislature prepares its own budget. It also seems appropriate to have a Federal Funds Oversight Committee to implement a 1998 state budget provision concerning oversight of federal grants. Attachment 12 is a draft of proposed legislation to create such an oversight committee, which would be limited to federal grants concerning the subject areas of social services, health, and elementary and secondary education.

Attachment #1

House Select Committee on Federal Education Funding Program Review Form

Program Name/Purpose

Carl D. Perkins Vocational and Applied Technology Education Act

The mission of the Carl D. Perkins Vocational and Applied Technology Act of 1990 is "to make the United States more competitive in the world economy by developing more fully the academic and occupational skills of all segments of the population." Purposes of the Act are to be achieved through concentrating resources on improving education programs leading to occupational competence needed to work in a technological society. There is a priority in the use of funds for programs and services for special populations.

Program Description

Program Administration

Title II is the core of the Perkins Act, and receives the lion's share of federal vocational education funds. States receive Vocational Education Basic Grants, which are provided by formula to states. States must subgrant 75 percent of the funds to secondary, postsecondary, and adult vocational education programs at the local level. States use the remaining 25 percent of their grants to perform state leadership activities and to support State Set-Aside Programs, which provide services for certain targeted populations such as displaced homemakers and inmates in correctional institutions.

All programs under Title II are subject to certain requirements designed to ensure the equal access and full participation of designated populations who have traditionally had limited access to vocational education. These populations include individuals with disabilities, educationally and economically disadvantaged individuals, individuals of limited English proficiency, individuals who participate in programs designed to eliminate sex bias, and individuals in correctional institutions. Local programs are also required annually to evaluate their performance and, if it is found lacking in any way, to make necessary improvements.

Title III-E of the Act authorizes the State-Administered Tech-Prep Program, which provides formula grants to states for projects to link secondary schools and community colleges and provide technical education that builds student competencies and leads to employment. "Tech-prep" education programs lead to a two-year associate degree or a two-year certificate.

The State receives the funds at the beginning of each state fiscal year and can use the funds for 27 months.

Federal Statutory and Regulatory Citations

Title II of the Carl D. Perkins Vocational and Applied Technology Act, as amended by the Perkins Act Amendments of 1990 (P.L. 101-392)

Education Department Administrative Regulations, 34CFR Parts 400 and 403

State Statutory and Regulatory Citations

Chapter 115C, Article 10, Parts 1 and 2 of the General Statutes enacted by the General Assembly provide the legal basis for Workforce Development Education in North Carolina.

Federal Matching Requirements

The state must match the portion of Title II funds reserved for state administration on a dollar-for-dollar basis from nonfederal sources.

Federal Maintenance of Effort Requirements

Payments may not be made to a state unless the state's fiscal effort per student or the aggregate expenditures for vocational education in the state are not less in the previous year than in the second preceding year.

Description of Allocation Formulas

Federal to State:

State and territorial educational agencies in the states, the District of Columbia, Puerto Rico, the Virgin Islands, and the Pacific territories receive formula grants for vocational education programs. Specified amounts of the Title II basic state vocational education appropriation are set aside each year for the Indian and native Hawaiian vocational education grant program and for the territories of the United States. Out of the funds that remain after the set-asides for Indians, Hawaiian natives, and the Pacific territories are deducted from the program's appropriation, states, D.C., Puerto Rico, and the Virgin Islands receive their formula grants based on population and per capita income (with proportionately higher grants for poorer states). Generally speaking, no jurisdiction will receive less and 0.5 percent of the annual appropriation for the basic state program and the Title III special programs; however, this provision is subject to several complex adjustments to ensure that no jurisdiction's allocation climbs or drops precipitously in any one year. Twenty-five percent of the state's allocation is set aside for use by states under Titles II-A and II-B for administrative expenses, state leadership and discretionary activities, and programs targeted at specified populations.

State to Local:

At least seventy-five percent of Title II state grants must be passed on to local education

agencies to conduct eligible vocational and applied technology programs under Title II-C. For secondary programs, funds are allocated to all eligible LEAs in the state as follows:

- 70 percent based on each LEA's share of Title I grant funds (which are distributed according to measures of student poverty) in the previous year;
- 20 percent based on each LEA's share of students served under the Individuals with Disabilities Education Act in the previous year;
- 10 percent based on each LEA's share of the total students enrolled in grades K-12 and adults enrolled in vocational education in the previous year.

Description of the State Level Application, Award, and Grant Monitoring Process

State Level Application

The State Board of Education is responsible for developing a three-year state vocational education plan followed by a two-year plan for the remaining years covered by the legislation, describing how the state will use its funds. As part of the development process, the State Board must conduct a statewide assessment of vocational education in the state and conduct public hearings on the plan. In addition, the board must consult with the state educational agency or agencies in charge of secondary and post-secondary education in the state, and must respond to any objections or comments registered by those agencies.

Local applications include many of the same elements required in state plans. Among other things, the local plans must describe the numbers and needs of the special populations to be served; how programs will be developed to meet those needs; provisions for consultation with parents and students; provisions for coordination with related programs and organizations, and the standards the recipient will use to evaluate its programs.

Award from the U.S. Department of Education

This program is forward-funded; that is, funds appropriated in the fall become available for expenditure the following July 1. Of each year's funding for vocational education basic grants, a small portion (equal to 1.5 percent of the combined Title II and Title IV national programs appropriation) is set aside for direct grants to Indian tribes and native Hawaiian organizations. The Pacific territories receive formula grants amounting to a total of 0.2 percent of the combined appropriation.

Grant Monitoring Process

In conjunction with the state committee of practitioners, the State Board of Education must develop core standards and performance measures for all programs assisted under the Perkins Act. Eligible recipients may make local modifications to this system to reflect economic, geographic or demographic factors, or the population to be served.

Using the statewide standards and measures, a local recipient of funds must annually

evaluate the effectiveness of its projects, services, and activities receiving assistance under the Title II basic program or a Title III special program. SEAs may use data from the National Assessment of Educational Progress (NAEP) when evaluating vocational education programs. Beginning not later than one year after the implementation of the system of standards and measures, if the recipient is not making acceptable progress in meeting the standards and measures, then the recipient must develop a plan for improvement for the next year, with the involvement of teachers, parents and students.

If, after a year of implementation of the plan, the local recipient is not making sufficient progress, the state education agency will step in and jointly develop another plan with the local recipient and teachers, parents, and students. The joint plan must detail the state role, describe strategies, and include a timetable for improvement. In conjunction with the local recipient, the state will annually review and improve the joint plan until the recipient fulfills the state and local standards for more than one year.

Separate from the local evaluation and program improvement process, the state board must conduct an assessment of the quality of vocational education in the state using measurable objective criteria. The assessment must address: the needs of students and the labor market; the integration of academic and vocational education; the relative academic, occupational, training, and retraining needs of secondary, adult, and post secondary students; the ability of programs to provide basic and higher order skills needed by students; and other factors specified by the statute and regulations. An assessment must be conducted prior to the submission of each new state plan.

Local Administration Cost

	FY 94-95	FY 95-96	FY 96-97	FY 97-98
Expenditures	\$32,729.97	\$9,731.26	\$17,063.48	\$26,591.08

^{*} Note: Expenditures for Fiscal Year 1997-1998 do not include expenditures for local central office staff.

Descriptions of Expenditure Summaries

Personnel Cost: Includes salaries, employee benefits, and compensation to board members.

Purchased Services: Includes food service agreements, operational services, and staff travel.

Office Support: Includes telephone, postage, printing, advertising, various services/fees, general supplies and other administrative expenses.

Indirect Cost: Transfer line-item to the State Board Office. Based on a rate approved by the federal Depart. of Education.

Equipment: Includes office and computer equipment.

Contracts: Includes academic services and personal services contracts.

Non-Educational Contracts: Includes other grants and aids to non-educational agencies. **Educational Contracts:** Includes other grants and aids to educational agencies.

AH. 4

HOUSE SELECT COMMITTEE ON FEDERAL EDUCATION FUNDING PROGRAM REVIEW FORM

Program Name/Purpose:

Abstinence Until Marriage

PROBLEM: Rates of teen sexual activity in North Carolina are alarmingly high. The Youth Risk Behavior Survey of 1995 indicated that 57.3% of all teens had sexual intercourse and 12.5% had sex prior to age 13. It also indicated that approximately 74% of all births to teenagers occur out of wedlock.

GOALS: The goal is to reduce the rates of sexual activity, out-of-wedlock births, and unintended pregnancies among teens.

OBJECTIVES:

1-Raise the awareness of the problems described above by:

a-Increase the likelihood that teens will consider the importance of abstaining from sexual activity outside marriage and the harmful consequences of out-of-wedlock births b-Increase the likelihood that parents will talk to their children about abstaining from sexual activity.

2-As a result of the exposure to an enhanced abstinence education program in their local schools, these adolescents will abstain from sexual activity outside of marriage.

Program Description:

Program Administration

The North Carolina State Board of Education developed the Healthful Living Education curriculum for abstinence until marriage instruction. It is funded from the Department of Health and Human Services. The Abstinence Until Marriage is a part of a larger program called School Health Education Program.

Spending Criteria

The funds received from this grant must be used to develop abstinence until marriage education programs provide the following:

- 1- Teach the social, psychological, and health gains to be realized by abstaining from sexual activity;
- 2- Teach abstinence from all sexual activity outside of marriage as the expected standard for all school age children;
- 3- Teach that abstinence from sexual activity is the only certain way to avoid out-of-wedlock pregnancy, sexually transmitted diseases, and other associated health problems;
- 4- Teach that a mutually faithful monogamous relationship in the context of marriage is the expected standard of human sexual activity;
- 5- Teach that sexual activity outside of marriage is likely to have harmful psychological and physical effects;
- 6- Teach that children that are born out-of-wedlock are likely to have harmful consequences for the child, the child's parents, and society;
- 7- Teach young children how to reject sexual advances and how alcohol and drug use increase vulnerability to sexual advances; and
- 8- Teach the importance of attaining self-sufficiency before engaging in sexual activity.

Federal Matching Requirements:

N/A

Federal Maintenance of Effort Requirements:

The Department of Public Education receives the grant money from the Department of Human Resources division of Human Services. It then makes it allotments according to the state allotment policy formula that was approved by the State Board of Education.

The Abstinence Education Grant is awarded annually for five years. It must be spent by September 30th, of each year, in the year the grant was awarded.

Description of Allocation Formulas:

Federal to State: Grant of 1.15 million dollars is given to the State of North Carolina, each year for five years. Each of these yearly grants must be spent by September 30 of the year received. There is no liquidation period for this federal grant.

State to Local: LEAs and eligible charter schools will receive \$333 for each grade 7-12. The remaining funds will be allocated on an LEA or charter school's ADM in grades 7-12 at approximately \$1.72/ADM.

Description of the State Level Application, Award, and Grant Monitoring Process:

Federal monitoring requirements, require all LEAs receiving funds to supply an unduplicated count of students served and total encounters by students. These counts include the categories of males, females, Black, Hispanic, non-Hispanic, White, and others. These reports are required to be sent to the Department of Public Education on a yearly basis.

House Select Committee on Federal Education Funding Program Review Form

Program Name/Purpose

Partners in Character Education

To support partnerships of State Education Agencies and Local Education Agencies to design and implement programs to educate students on ethics and elements of character, such as caring, civic virtue and citizenship, justice and fairness, respect, responsibility, and trustworthiness.

Program Description

Program Administration

The North Carolina Partnership in Character Education is comprised of three county school systems (Charlotte-Mecklenburg, Cumberland, and Wake) working collaboratively with the North Carolina Department of Public Instruction and the North Carolina Center for the Prevention of School Violence. The Partnership is developing, piloting, and disseminating a model character education program.

None

Federal Matching Requirements

None

Federal Maintenance of Effort Requirements

None

Description of Allocation Formulas

Federal to State:

Character Education grants support partnerships of State Education Agencies and Local Education Agencies to design and implement programs to educate students on ethics and elements of character, such as caring, civic virtue and citizenship, justice and fairness, respect, responsibility, and trustworthiness. Up to 30 percent of a grant may be used by the SEA for administrative costs to establish a clearinghouse, develop materials, and train teachers. The remaining funds must be subgranted to LEAs, which, in turn, may use funds for administrative costs, subgrants to individual schools, and for collaboration with the SEA. LEAs may contract with other entities, including IHEs and private for-profit and nonprofit organizations for assistance in developing curriculum and materials, teacher training, and other related activities.

State to Local:

Each LEA partner identified in the grant application was included because of its capacity to contribute to the project goal. The goal of the partnership is reached through a division of labor among the LEA partners and is focused on three primary strands throughout the grant period: 1) finding common ground and sustaining community and parental involvement (Mecklenburg); 2) improving the climate for learning (Cumberland); and 3) integrating elements of character across the curriculum (Wake).

Description of the State Level Application, Award, and Grant Monitoring Process

State Level Application

North Carolina submitted an application to Washington in March, 1996, for this competitive grant. The application narrative described the quality of the project design; goals, objectives and outcomes of the project; building common ground and sustaining parental and community involvement; improving the climate for character education; integrating elements of character across the curriculum; character education clearinghouse; and the evaluation component of the proposed project. The application was approved for three years.

Award from the U.S. Department of Education

The grant is for \$249,900 annually for three years. Second and third year funding is contingent upon satisfactory progress in year one and availability of funds.

Grant Monitoring Process

The North Carolina Partnership for Character Education utilizes a three-part evaluation process: a process evaluation, an outcome evaluation, and a qualitative narrative analysis as an overall project assessment.

House Select Committee on Federal Education Funding Program Review Form

Program Name/Purpose

Public Charter Schools

The purpose of this program is to increase understanding across the state of the Charter Schools Model by providing financial assistance for the design and initial implementation of charter schools; and evaluating the effects of such schools, including the impact on students, student achievement, staff, and parents.

Program Description

Program Administration

Agency receives start-up funds from the U.S. Department of Education to the State Board of Education (SBE). Funding is initiated from an application submitted by the SBE through the Office of Charter Schools which administers the program for the N.C. Department of Education. The application identifies how North Carolina will use the funds based on the U.S. Department of Education criteria in support of North Carolina's Charter Schools initiatives.

The state receives the funds effective October 1st of each year. The funds can be used for 27 months; however, the federal funding in scheduled to end with the October 1, 1998 grant.

LEAs or other eligible applicants receive funding from the SBE which is equally distributed among new applications receiving final approval. If an eligible SEA elects not to participate or if its funding is not approved, the U.S. Department of Education can make grants directly to eligible local partnerships.

Federal Statutory and Regulatory Citations

Improving America's Schools Act of 1994, Title X, Part C, 20 U.S.C. 8061-8067

State Statutory and Regulatory Citations

The Charter School Act of 1996, House Bill 955 as amended.

Description of Allocation Formulas

Federal to State:

Each State educational agency desiring a grant from the Secretary shall submit an application to the Secretary of the U.S. Department of Education.

Each State educational agency receiving a grant pursuant to this act may reserve not more than five percent of such grant funds for administrative expenses associated with the charter school grant program.

State to Local:

Ninety five percent of the allocation received from the U.S. Department of Education is designated for subgrants to one or more eligible applicants in the state.

Description of the State Level Application, Award, and Grant Monitoring Process

State Level Application

It has been concluded that the enhancement of parent and student choices among public schools can assist in promoting comprehensive educational reform. Charter schools can provide students with diversity in choices and the opportunity to pursue those choices for achieving high standards and performance.

The State Board of Education (SBE) application shall describe the objectives of the charter school grant program and a description of how such objectives will be fulfilled, including steps taken by the SBE to inform teachers, parents, and communities of the SBE charter school grant program; and contain assurances that the SBE will require eligible applicants to submit an application describing the educational and financial program.

Local education agencies (LEAs) applications shall contain a statement of impact from the LEA where the proposed Charter School will be located, a copy of the approved application as a private nonprofit corporation including the articles of incorporation, by-laws, etc., a contract negotiated with the LEA, credential of the members of the board of directors, and any other supporting documentation.

Award

The Secretary shall award grants to the State Board of Education on the basis of the quality of the applications submitted after taking into consideration such factors as the contribution that the charter schools grant program will make to assist educationally disadvantaged and other students to achieve high standards and performance; the State Board of Education improvement plan; the degree of flexibility afforded by the State Board of Education to charter schools under the State's charter schools law; the ambitiousness of the objectives for the State charter school grant program; the quality of the strategy for assessing achievement of those objectives; and the likelihood that the charter school grant program will meet those objectives and improve educational results for students.

Grants awarded to the State Board of Education shall be awarded for a period of not more than three years. The SBE may not use more than five percent for administrative purposes associated with this grant.

Grants awarded by the Secretary of the U.S. Department of Education to eligible applicants or subgrants awarded by the State Board of Education to eligible applicants shall be awarded for a period of not more than three years, of which the eligible applicant may use not more than eighteen months for planning and program design; and not more than two years for the initial implementation of a charter school. Eligible applicants may use the funds only for postaward planning and design of the education program of the charter school. It may include such activities as refinement of the desired education results and of the methods for measuring progress toward achieving those results and for initial implementation of the charter school, which may include informing the community about the charter school, acquiring the necessary equipment, materials, and supplies, and other operational costs that cannot be met from state and local sources.

Grantees must submit performance reports as required.

Grant Monitoring Process

Local boards of education are authorized and encouraged to provide administrative and evaluative support to charter schools located within their local school administrative units. The school is subject to the financial audits adopted by the SBE for charter schools. The school shall report annually to the chartering entity and the SBE the information required by either.

The N.C. Department of Public Instruction has appointed a fifteen member Charter School Advisory Committee to oversee (1) application review and recommendations; (2) monitoring of operations; and (3) recommendations for revocations.

Final Report

Federal Abstinence Until Marriage Legislation

December 14, 1998

By Ann Frazier

A provision of the 1996 welfare reform bill PL 104-193 provides \$50 Million per year for 5 years for Abstinence Until Marriage education funds. The legislation also defines Abstinence Until Marriage education.

The annual allotment for North Carolina is \$1,151,876.00 for each of 5 years. In August, 1997 the North Carolina General Assembly passed a provision in its budget bill Section 15.34 that transferred the funds from the Maternal and Child Health Division (MCH) to the State Department of Public Instruction (DPI) where the funds would be allocated to the LEAs and eligible Charter Schools. Section 15.34 limits the alignment of our state Abstinence Until Marriage law HB 834 to the federal Abstinence Until Marriage legislation to just one paragraph and that is (4)—the A—H components of the state law that complement the A—H components of the federal law, which defines abstinence until marriage education.

The guidelines and purposes of the federal legislation are clearly stated in the definition. Abstinence education means "an educational or motivational program which (A) has as its exclusive purpose teaching the social, psychological, and health gains to be realized by abstaining from sexual activity."

Through mailings and hearings, it appears that DPI staff violated the federal law, guidelines, and congressional intent. Instructions were stated that could be interpreted to mean that comprehensive sex ed/promotion of contraceptive use and abstinence until marriage education could be mixed in the same classroom instructional period from one sentence to the next with the same students, as long as the LEA did not fund the comprehensive sex ed portions with the federal abstinence until marriage funds.

Congressmen, congressional attorneys, and MCH Bureau staff responded: It is possible that North Carolina is violating the federal law and congressional intent by mixing comprehensive sex education with abstinence until marriage education. The Congressman wrote, "if such a sex education program includes instruction in the use of birth control devices, then it would definitely be illegal to use the abstinence grant money in connection with it."

There are 117 LEAs and 21 eligible Charter Schools in North Carolina that receive the Federal Abstinence Until Marriage funds. Five LEAs and three Charters have not reported on expenditures of the funds. Six LEAs and nine Charters refused the funds. One LEA reported no funds spent. It appears that 28 LEAs and 3 Charters most

Page 2 Final Report by Ann Frazier on Fed. AUM Leg.

clearly used the Federal Abstinence Until Marriage funds according to federal law and congressional intent. Additional information has been requested from some LEAs.

Seventy-seven LEAs and six Charters appear to have used the funds not in compliance with Federal law, Guidelines, and Congressional intent.

Appearance of violations of the Federal law and Congressional intent and misuse of federal funds include:

- 1. Purchasing comprehensive sex ed. instructional materials
- 2. Mixing the messages of comprehensive sex ed. and abstinence until marriage in teacher training opportunities
- 3. Selective use of the A--H definition of the federal legislation
- 4. Violating the exclusive purpose statement
- 5. Funding organizations that are committed to the safer-sex message and non-directive comprehensive sex ed rather than abstinence until marriage as the expected standard of behavior
- 6. Excessive amount (more than the suggested 10%) used for administrative purposes

Most blatant violations include:

- Teacher Training/Assessing Health Literacy opportunities and instructional materials used—by Donna Breitenstein/staff—reported by 32 LEAs. The State Board of Education had ruled previously that the Manual Successfully Teaching Middle School Health developed/promoted by Dr. Breitenstein/staff was Not Recommended for Abstinence Until Marriage. Several LEA Reports included pages from the Manual and the workshop outline. It appears that comprehensive sex ed was included in the teacher training. According to Reports, Dr. Breitenstein/staff received approximately \$50,000.00 of the Federal Abstinence Until Marriage funds.
- Manuals purchased by 3 additional LEAs with Federal Abstinence Until Marriage funds amounted to \$1633.37.
- Twelve LEAs reported teacher training by Donna Breitenstein/staff for Grades 4-5. The Federal Abstinence Until Marriage funds were designated, and clearly stated to LEAs, for Grades 7-12.
- Funds were used for meetings sponsored by other organizations that are on record stating that Abstinence Until Marriage education is ineffective and/or have consistently promoted comprehensive sex ed/non-directive mixed message. Those organizations that received the Federal Abstinence Until Marriage funds are the Adolescent Pregnancy Prevention Program Office (APPP), the Adolescent Pregnancy Prevention Coalition of North Carolina

Page 3 Final Report by Ann Frazier on Fed. AUM Leg.

(APPCNC), Planned Parenthood of Chapel Hill, and Poe Health Center in Raleigh.

- Approximately 61 LEAs and 6 Charters reported using the funds to purchase curriculum, videos, Manual Successfully Teaching Middle School Health, and other instructional materials that include comprehensive sex ed/mixed messages. These violate the exclusive purpose clause of the Federal law. ETR Assoc. Publisher was the supplier of most of the materials.
- Federal Abstinence Until Marriage funds were used by some LEAs for materials that are totally unrelated to Abstinence Until Marriage. One LEA purchased the video on Head Lice; another used funds for a Children's Vision Conference. Many LEAs purchased equipment. Teacher/staff salaries and benefits, including social security and retirement were funded with the Federal Abstinence Until Marriage money. One LEA was allocated \$16,522.00 and spent \$14,724.19 on salaries and benefits—about 98.5% of the grant. Other LEAs used almost 50% of the funds for salaries and benefits. North Carolina sales taxes accounted for some of the expenditures when instructional materials were ordered by the LEAs.
 Some LEAs reported that a percentage of the Federal funds was used as indirect costs, as suggested/required by DPI.

RECOMMENDATIONS:

- 1. Establish a separate office for Abstinence Until Marriage Education for North Carolina. States such as Louisiana, Virginia, South Carolina, Mississippi, Oklahoma, and Arkansas operate the program in a separate office.

 The General Assembly currently funds two offices that promote comprehensive sex ed/safer sex message: Adolescent Pregnancy Prevention Project Office (APPP) and Adolescent Pregnancy Prevention Coalition of North Carolina (APPCNC).

 Federal Guidelines recommend that 10% of the Federal Abstinence Until Marriage funds-\$1,151,786.00-may be used for administrative purposes. This is a sufficient amount of funds to operate an office for that purpose. A separate office for Abstinence Until Marriage Program would help to alleviate the some of the confusion that exists today.
- 2. Require Donna Breitenstein or the LEAs to refund some \$50,000 that she and/or staff were paid by LEAs for teacher training opportunities. She is a professor the university system and is already on the state payroll. Outlines of her presentations and pages from the Manual that were sent with Reports from LEAs indicate that comprehensive sex ed was most likely included in the

Page 4 Final Report by Ann Frazier on Fed. AUM Leg.

presentations.

Twelve LEAs reported payment for workshops for grades 4-5-6. The Federal Abstinence Until Marriage funds were intended for grades 7-12.

- 3. Funds used for the Manual Successfully Teaching Middle School Health, which had been ruled Not Recommended for Abstinence Until Marriage by the State Board of Education, need to be returned. Amount: \$1633.37.
- 4. Planned Parenthood, Poe Center, Adolescent Pregnancy Prevention Projects Office, and the Adolescent Pregnancy Prevention Coalition of North Carolina Office should refund all Federal Abstinence Until Marriage money that was given to them for meetings, telephone conferences, instructional materials, etc.
- 5. Funds used in approximately 61 LEAs and Charters for the Manual Successfully Teaching Middle School Health, other curricula, videos, and instructional materials that promote the comprehensive sex ed/mixed message should all be returned to the state.
- Funds should be returned that were used for instructional materials that are unrelated to abstinence until marriage, such as the video on Head Lice and Children's Vision Conference.
- 7. State DPI staff should be required to clearly communicate with LEAs and Charters that it is illegal to use the Federal Abstinence Until Marriage Education funds in connection with any program that includes comprehensive sex education. DPI should mail to every LEA and Charter the national definition of Comprehensive Sex Education that was provided to DPI staff by myself last year. The June 18, 1998 letter from the Congressman that clearly states the federal law and congressional intent should also be sent to every LEA and eligible Charter school.
- 8. DPI should provide teacher training opportunities for LEAs and utilize publishers, authors, professionals who promote directive abstinence until marriage education, rather than those who promote the non-directive mixed mossage/comprehensive sex ed.

AN ADDRESS TO THE NORTH CAROLINA ASSEMBLY SUB COMMITTEE ON EDUCATION

Thomas E. Williams

November 23, 1998

Thank you for the opportunity to speak to you today. My name is Thomas Williams. I was a public educator for 28 years, a private educator for 5 years and now I am a Charter School educator. I know how children learn. The school that employs me, Healthy Start Academy, is one of 60 some Charter Schools, and like other groups that have something in common, we meet now and then to discuss our situations and try to help one another out. Over the past two years, we, as a group, have come to some conclusions about our general situation. First of all, let me review our conclusions on why you people in the legislature passed the Charter School Law.

We believe that you challenged the government school monopoly by permitting parents and teachers a great deal of autonomy from the bureaucratic strangle hold that was stifling their schools. We also believed that you hoped that if we were

successful the monopoly schools would learn from us. Finally, we believed that you had introduced choice and freedom back into education in North Carolina.

We also believe that the N.E.A. and your own D.P.I. burcracracy are trying to destroy your legislation. Let me explain by using my own school as an example. You may recall that our mission was to work with seriously at-risk children. What does seriously at-risk mean? It means struggling in school, it means 70% of the children without fathers at home, it means almost 80% on free lunch because of poverty, it means living in projects with all the violence, drugs and alchololism that goes with it. That's what *at-risk* means at Healthy Start.

Using the Iowa Test of Basic Skills we found that the vast majority of our students had *major* deficiencies in Reading,
Listening and Math.

So, in a church basement on used furniture our teachers went to work. It was a tough year, a very tough year. But when the smoke cleared our children were now ladies and gentlemen, our kindergartners had grown 1.7 academic years in one year, and were in the 99%ile of the 5 million children who took the test. Our first grade had grown .9 years inone year, and our second grades grew 1.6 years in Reading and 2 years in Math in only one year to score in the 76%ile. Now if you consider that they were almost all one year behind when we started, this growth was not just interesting, it was astounding.

Well the nation took us into its heart. We were successful.

Only then did Raleigh get interested in us. Suddenly Raleigh
discovered that we had too many black children. You see your
legislation put quotas on charter schools, (there are no quotas
on government schools), because some of you were afraid of

white flight to charters. Instead, in many cases, you got black flight. Given a choice, large numbers of black parents left government schools where their children make up the majority of retarded and emotionally handicapped students and where their children can't read or calculate nearly as well as white and Asian children, and took refuge in charter schools. Then low and behold, Raleigh, when the children succeeded beautifully found that we were breaking the law, and the N.E.A. was right there too. Here are the words of Mr. Wilson, President of the N.E.A. in North Carolina and its chief lobbyist speaking about healthy Start. "Reading and Math ability do not offset the kids learning to play and work together. If charter schools can't conform to the law, they should be closed".

We sued the D.P.I. and the State Board of Education to protect our school, and the Board of Education graciously wrote

a letter to the judge pledging not to close us for racial reasons.

The case was put aside.

Then the News and Observer published a major article based on information "leaked" from D.P.I. that large numbers of charter school teachers were uncertified. The D.P.I. information was completely erroneous. When our Board president called to check their information she discovered that the Bureau of Licensure was reporting on three people who had been released by Healthy Start Academy over a year ago and reported two others as holding expired certificates, while our Board President was holding those certificates which were valid through 1999. Just errors? we doubt it! This report was compiled in April, 1998 while the three people in question hadn't worked for us past November of 1997.

The News and Observer was told by us its story was wrong but printed it anyway. Net result, Healthy Start lost five students who were withdrawn because of the article.

We are being forced into the regulations and bureaucratic morass that your legislation freed us from. It is common knowledge that if you don't subscribe to the A.B.C. testing program you won't get a charter. The A.B.C. program, another initiative of the legislature, is being circumvented and distorted by the education monopoly. Check the number of learning disabled and remedial students that have recently appeared in schools. Check the schools who put their poor teachers in Grade 2 and their best ones in Grade 3 guaranteeing poor pre test scores and significant growth and exemplary status later on. Does it make sense for a school that moves from 30% literacy to 45% literacy to be exemplary? You have them. That means that a school where 55% of the 3rd grade can't read is exemplary.

How many millions of dollars have been spent on extra personnel to tutor poor readers?

How many sample tests called testlets have been distributed so that teachers know in advance what the test will look like?

Who composes the test? Is it validated? What is the content of the Reading? Who grades it? None of these things is known to you or any of us. It is a system that rewards improvement at the expense of achievement and takes up valuable learning time to prepare for it.

Now let me discuss the legislature for a moment. There are things you do and things that you don't do that confuse us. We know that some of you don't think too much of us and that's okay. We understand all about N.E.A. money and lobbying, and we know that some school boards and many superintendents

despise us. But why do you deny us a fair chance? Why are we specifically denied capital fund aid and transportation aid and yet receive special scrutiny from D.P.I.?

In effect you seem to be saying separate and unequal is okay as long as it is charter schools who are unequal. We thought that Brown vs. Board of Education ended that once and for all. Why are charter school children, in our case 98% black, sitting in a building abandoned as uninhabitable by a government school, okay for our black kids. Why do you demand that we provide transportation but deny us the transportation aid you lavish on government schools. Are our kids better walkers than other school kids?

As one of my black board members said upon the arrival of discarded government school books for our little ones, "We are

right back where we started. When they don't use them any more, we get them".

To conclude this little talk, charter schools are alive and well and in spite of our enemies in the monopoly, harassment by the N.E.A., and the injustice of unequal treatment, we will succeed. We will succeed because we are committed to our children. The support of our parents and our undying determination will to see that choice and freedom are reestablished in American education. We dare not fail.

The abstinence education grant program, established as part of our welfare reform, spells out very clearly that "abstinence education" means "an educational or motivational program which (Λ) has as its exclusive purpose, teaching the social, psychological, and health gains to be -realized by abstaining from sexual activity..."

That "exclusive purpose" language was the basis for the conclusion reached by the House Ways and Means Committee that it would be "illegal" to use the abstinence grant funds to support a program which was part of a curriculum that included "information about birth control, including instruction in the use of various birth control devices." The Committee document is so adamant on that point that it says that even if the federal funds were used only to fund an otherwise acceptable abstinence education unit, if that unit were part of a larger curriculum that includes instruction in birth control, it would be illegal. I enclose the relevant pages from the Committee's document "Abstinence Education Under welfare Reform."

You have informed us that under North Carolina law, school districts are required to provide "a comprehensive school health educational program" which "may include a comprehensive sex education program." According to the text of the law, and the very specific guidance from the Ways and Means Committee, if such a sex education program includes instruction in the use of birth control devices, then it would definitely be illegal to use the abstinence grant money in connection with it. Abstinence education programs offered by school districts would have to be completely separate from such sex education programs.

I hope this information is helpful to you.

Sincerely,

Member of Congress

Congressional Intentwritten by Staff attorneys

think the tradition outdated—that'sex should be confined to married couples. That both the practices and standards in many communities across the country clash with the standard required by the law is precisely the point. As in the cases of civil rights and smoking, the explicit goal of the abstinence education programs is to change both behavior and community standards for the good of the country. It follows that no program that in any way endorses, supports, or encourages sex outside marriage can receive support from the abstinence education money. Officials at the federal MCH Bureau, state officials administering the program, and those conducting local abstinence education programs have the legal responsibility to ensure that none of the money from this grant supports projects that violate this standard.

Nonetheless, it may be possible to live with this aspect of the definition without great difficulty. Projects funded by the new abstinence education money certainly do not need to place equal emphasis on every component of the definition. In our view, projects that do not violate any aspect of the definition and that emphasize abstinence as the expected standard for children and teenagers (which is an actual requirement stated in subparagraph (B) of the definition in the legislation) are eligible for funding. As long as the specific curriculum and teaching of the project do not violate the abstinent until marriage standard, the project should qualify for funds.

Consider an example. Assume that a given public school system now conducts a oneyear sex education class for 10th graders. During the course of the year, the class curriculum calls for presentation of information about birth control, including instruction in the use of various birth control devices. Now assume that the school officials decide that they would like to revise the course to include a six-week unit that exactly follows the definition of abstinence education outlined in the new statute. Can state officials use their abstinence education dollars to fund this unit of instruction even though other parts of the course teach birth control?

We believe it would be illegal to fund this project under the abstinence education statute. The language clearly states that abstinence education is a program with the "exclusive purpose" of teaching the various principles outlined earlier. If this unit is part of a course that teaches use of birth control, then it violates the "exclusive purpose" criterion.

This example, of course, is less than definitive. The "exclusive purpose" criterion is clear enough, but a lack of clarity is introduced by the various possible meanings of the term program. The school example illustrates that a set of abstinence activities within the broader context of a single program that includes teachings that violate the abstinence definition is not acceptable. But how far away from activities that cannot be supported by the grant must a program be to qualify legally for funding?

Realizing that a definitive clarification will be nearly impossible to achieve, we nonetheless assume that the MCH guidelines will deal with this question as clearly as possible. To err on the side of caution, however, programs that qualify as abstinence education should be conducted by different people at a time different and with materials separate from programs that violate any tenet of the statutory definition of abstinence education. In addition to meeting these conditions, state officials must ensure that the people who plan and conduct the program are making a sincere attempt to create activities consistent with the statutory definition of abstinence education. Thus, program operators must make

AH. 12

GENERAL ASSEMBLY OF NORTH CAROLINA

SESSION 1999

H

D

98-LB-328A(11.24) (THIS IS A DRAFT AND IS NOT READY FOR INTRODUCTION)

Short Title: Federal Funds Oversight Committee.

(Public)

Sponsors: Representative.

Referred to:

1 A BILL TO BE ENTITLED

2 AN ACT TO CREATE THE FEDERAL FUNDS OVERSIGHT COMMITTEE TO

1998 BUDGET PROVISION CONCERNING IMPLEMENT A OVERSIGHT OF

FEDERAL GRANTS.

5 The General Assembly of North Carolina enacts:

Section 1. G.S. 143-16.1 as amended by Section 7.2 of

7 S.L. 1998-212 reads as rewritten:

Section 7.2. G.S. 143-16.1(a) reads as rewritten:

9 "\$ 143-16.1. Federal funds. All federal funds shall be expended and reported in 11 accordance with provisions of the Executive Budget Act, except as 12 otherwise provided by law. Proposed budgets recommended to the 13 General Assembly by the Governor and Advisory Budget Commission 14 shall include information concerning the federal expenditures in 15 State agencies, departments and institutions in the same manner 16 as State funds. Each budgetary category shall show the total 17 received and anticipated State and federal expenditures, along 18 with a description of the purpose for which the federal funds 19 will be spent at the program level. All expenditures for the 20 prior fiscal year and all expenditures anticipated in the 21 proposed budget shall be reported by objects of expenditure by 22 purpose and shall be identified by each federal grant. For the 23 purpose of this section, 'federal funds' are any financial 24 assistance made State agency the United to а by

1 government, whether a loan, grant, subsidy, augmentation, 2 reimbursement, or any other form. The Director of the Budget may 3 adopt rules and regulations establishing uniform planning, 4 budgeting and fiscal procedures, not inconsistent with federal 5 law, that ensure that all federal funds shall be expended in a 6 standardized manner. The function of the Advisory Budget 7 Commission under this section applies only if the Director of the 8 Budget consults with the Commission in preparation of the budget. 9 (b) The Secretary of each State agency that receives and

- 10 administers federal Block Grant funds shall prepare and submit 11 the agency's Block Grant plans to the Fiscal Research Division of 12 the General Assembly not later than April 20 of each fiscal year. 13 The agency shall submit a separate Block Grant plan for each 14 Block Grant received and administered by the agency, and each 15 plan shall include, but not be limited to, the following:
 - (1) A delineation of the proposed dollar amount allocations by activity and by category, including dollar amounts to be used for administrative costs; and
 - (2) A comparison of the proposed funding with two prior years' program budgets.

22 The Director of the Budget shall review for accuracy, 23 consistency, and uniformity each State agency's Block Grant plans 24 prior to submission of the plans to the General Assembly.

- 25 (c) No federal grant concerning the subject areas of social services, health, or elementary or secondary education, may be accepted or expended without the approval of the General Assembly, except those relating to:
 - Unanticipated disasters such as floods, hurricanes,
 or tornados; or
 - (2) Research grants within The University of North Carolina or community college systems.
- (d) There is created the Federal Funds Oversight Committee within the Legislative Branch. The Committee shall consist of nine members, three members of the House of Representatives appointed by the Speaker of the House of Representatives and one appointed by the Minority Leader, three Senators appointed by the President Pro Tempore of the Senate and one appointed by the Minority Leader, and one person appointed by the Governor.

 Members shall serve terms expiring 15 days after convening of the next regular session of the General Assembly after appointment.
- The President Pro Tempore of the Senate and the Speaker of the 43 House of Representatives shall each designate a cochair of the

17

18 19

20

21

29

30

31

32

- 1 Committee. The Committee shall meet at least once a quarter and 2 may meet at other times upon the joint call of the cochairs.
- 3 A quorum of the Committee is five members. While in the 4 discharge of its official duties, the Committee has the powers of
- 5 a joint committee under G.S. 120-19 and G.S. 120-19.1 through
- 6 120-19.4.

١

- 7 Members of the Committee receive subsistence and travel
- 8 expenses as provided by law. The Committee may contract for
- 9 consultants or hire employees in accordance with G.S. 120-32.02.
- 10 The Legislative Services Commission, through the Legislative
- 11 Services Officer, shall assign professional staff to assist the
- 12 Committee in its work. Upon the direction of the Legislative
- 13 Services Commission, the Supervisors of Clerks of the Senate and
- 14 of the House of Representatives shall assign clerical staff to
- 15 the Committee.
- 16 (e) No federal grant may be applied for, accepted, or expended
- 17 by the State of North Carolina unless a report of the proposal is
- 18 transmitted to the Federal Funds Oversight Committee prior to
- 19 application being made. This subsection applies whether or not
- 20 legislative approval is required under subsection (c) of this
- 21 section. This section does not apply to any grants made to a
- 22 city, county, or other unit of local government other than a
- 23 school administrative unit.
- 24 (f) If the General Assembly is not in session, and the Governor
- 25 determines that prompt action is required for acceptance or
- 26 expenditure of any federal grant for which legislative approval
- 27 is required under subsection (c) of this section, the Governor
- 28 may call an extra session of the General Assembly as allowed by
- 29 the Constitution.
- 30 (g) The purpose of this section is to ensure that the General
- 31 Assembly carries out its constitutional duty of approving all
- 32 expenditures made by the State, so as to ensure accountability.
- 33 Oversight by the representatives of the people of the cost of
- 34 government is an essential component of any democratic system.
 35 The current absence of legislative accountability in the
- 26 expenditure of fodoral funds is an unaccontable state of officing
- 36 expenditure of federal funds is an unacceptable state of affairs
- 37 <u>in light of the state constitutional requirement that no</u> 38 expenditures be made from the public treasury but in consequence
- 39 of appropriations made by the General Assembly."
- 40 Section 2. This act is effective when it becomes law.
