A BILL TO BE ENTITLED

AN ACT TO IMPLEMENT EFFICIENCIES WITHIN THE UNIVERSITY SYSTEM  
AS RECOMMENDED BY THE PRESIDENT'S ADVISORY COMMITTEE ON  
EFFICIENCY AND EFFECTIVENESS (PACE).

The General Assembly of North Carolina enacts:

**PART I. CAMPUSES MAY ESTABLISH BUILDING COMPONENT  
STANDARDS**

**SECTION 1.** G. S. 133-3 reads as rewritten:

"(a) Except as provided in subsection (b) below, all ~~AI~~ architects, engineers, designers, or draftsmen, when providing design services, or writing specifications, directly or indirectly, for materials to be used in any city, county or State work, shall specify in their plans the required performance and design characteristics of such materials. However, when it is impossible or impractical to specify the required performance and design characteristics for such materials, then the architect, engineer, designer or draftsman may use a brand name specification so long as they cite three or more examples of items of equal design or equivalent design, which would establish an acceptable range for items of equal or equivalent design. The specifications shall state clearly that the cited examples are used only to denote the quality standard of product desired and that they do not restrict bidders to a specific brand, make, manufacturer or specific name; that they are used only to set forth and convey to bidders the general style, type, character and quality of product desired; and that equivalent products will be acceptable. Where it is impossible to specify performance and design characteristics for such materials and impossible to cite three or more items due to the fact that there are not that many items of similar or equivalent design in competition, then as many items as are available shall be cited. On all city, county or State works, the maximum interchangeability and compatibility of cited items shall be required. The brand of product used on a city, county or State work shall not limit competitive bidding on

1 future works. Specifications may list one or more preferred brands as an alternate to the  
2 base bid in limited circumstances. Specifications containing a preferred brand alternate  
3 under this section must identify the performance standards that support the preference.  
4 Performance standards for the preference must be approved in advance by the owner in  
5 an open meeting. Any alternate approved by the owner shall be approved only where (i)  
6 the preferred alternate will provide cost savings, maintain or improve the functioning of  
7 any process or system affected by the preferred item or items, or both, and (ii) a  
8 justification identifying these criteria is made available in writing to the public.  
9 Substitution of materials, items, or equipment of equal or equivalent design shall be  
10 submitted to the architect or engineer for approval or disapproval; such approval or  
11 disapproval shall be made by the architect or engineer prior to the opening of bids. The  
12 purpose of this statute is to mandate and encourage free and open competition on public  
13 contracts.

14 (b) Notwithstanding subsection (a) of this section, a constituent institution of The  
15 University of North Carolina may establish construction specifications for building  
16 components pursuant to the process specified in subsection (c) of this section.  
17 Thereafter, without repeating the process, the constituent institution may specify the  
18 components by brand name in construction bid documents when doing so will further  
19 efficiency in the operation, maintenance, or upkeep of buildings.

20 (c) Prior to specifying a construction component by brand name pursuant to  
21 subsection (b) of this section, the constituent institution shall conduct a public process in  
22 which it (i) specifies in writing the performance and design characteristics required of  
23 the building component, (ii) documents its justification for invoking this subsection, and  
24 (iii) after complying with (i) and (ii), provides all suppliers an opportunity to propose  
25 one or more products which will meet the performance and design characteristics  
26 specified. The constituent institution must make its selection based on initial and life  
27 cycle costs as well as quality and suitability for the designated use."

## 28 **PART II. INCREASE INFORMAL LIMIT FOR SMALL CONSTRUCTION**

### 29 **SECTION 2.** G.S. 44A-26(a) reads as rewritten:

32 set forth in (1) and (2) is required by the contracting body from any contractor or

34 ~~(\$50,000);~~ (\$50,000); provided that, for The University of North Carolina and its

4 construction contract amount, conditioned upon the prompt payment  
5 for all labor or materials for which a contractor or subcontractor is
