<b>PRINCIPAL DEPARTMENT(S) &amp; PROGRAM(S) AFFECTED:</b>					
Administrative Office of the Courts; Indigent Defense Services; Department of Public Safety					
<b>EFFECTIVE DATE:</b> December 1, 2015					
<b>TECHNICAL CONSIDERATIONS:</b>					
None					

**FISCAL IMPACT SUMMARY:**

The proposed bill may have a fiscal impact to address a new chargeable offense being enforced, adjudicated, and having penalties applied to those convicted of the new offense. However, given that there is no historical data on this new offense or similar offenses to use as a proxy for predicting the total number of new offenses, the Fiscal Research Division cannot reasonably estimate the total additional costs that may be incurred. The following costs may be incurred for every one person charged and convicted of this crime:

- Administrative Office of the Courts: \$912 per disposition
- Indigent Defense Services: \$497 per disposition
- Department of Public Safety (DPS) - Prison Section: \$5,967 per active sentence
- DPS - Community Corrections: minimum of \$1,174 per offender placed under supervision

Please see the Assumptions and Methodology section for additional information.

**BILL SUMMARY:**

Section three of this bill enacts G.S. 48-10-106, Re-homing of an adopted minor child. This statute prohibits various activities related to private re-homing of minor adopted children. Violation of the new statute is a

Class F felony. Section six of this bill amends the existing G.S. 14-43.14, Unlawful sale, surrender, or purchase of a minor, to expand the scope of the offense to include a person who willfully participates in re-homing and adopted minor child. Violation of this section is a Class F felony.

## **ASSUMPTIONS AND METHODOLOGY:**

### **General**

The Sentencing and Policy Advisory Commission prepares prison population projections for each bill containing a criminal penalty. The Commission assumes for such bills that expanding existing or creating new criminal offenses produces no deterrent or incapacitative effect on crime. Therefore, the Fiscal Research Division does not assume deterrent effects for any criminal penalty bill.

S.L. 2011-192 (H.B. 642), the Justice Reinvestment Act (JRA), made changes to North Carolina's court system, corrections system (both to prisons and probation), and to post-release supervision. All F-I felons are now subject to nine months of post-release supervision (PRS). B1-E felony PRS has been increased from nine months to twelve months. Due to the lack of historical data about JRA implementation, it is not possible to estimate the number of prison beds that may be needed as a result of revocations.

JRA also created the Statewide Misdemeanant Confinement Program (SMCP) for housing misdemeanants with sentences between 90 and 180 days in county jails (misdemeanants with shorter sentences were already the responsibility of the counties). County participation in the program is voluntary. The SMCP pays participating counties for misdemeanants' housing, transportation, and medical costs. In 2014, the program was expanded to include all misdemeanants with sentences longer than 90 days. The Sentencing and Policy Advisory Commission does not track county jail capacity, so it is not possible to estimate the impact of new or increased misdemeanor penalties on county jails.

Since the bill creates a new offense, the Sentencing Commission does not have any historical data from which to estimate the impact of this bill on the prison population. It is not known how many offenders might be convicted and sentenced under the new statute.

### **Judicial Branch**

The Administrative Office of the Courts provides Fiscal Research with a fiscal impact analysis for most criminal penalty bills. For such bills, fiscal impact is typically based on the assumption that court time will increase due to anticipated increases in trials and corresponding increases in workload for judges, clerks, and prosecutors. This increased court time is also expected to result in greater expenditures for jury fees and indigent defense.

Sections three and six of the bill creates a new Class F felony offense. Because this is a new offense, AOC does not have historical data upon which to estimate the number of charges that might occur. AOC provides estimates of the average cost to the court for a charge by offense class. For every additional person charged with a Class F felony, the average cost to the court would be \$912.

The Office of Indigent Defense Services (IDS) has provided Fiscal Research with the frequency and cost of indigent defense services for each level of crime, including the cost differentials for district and superior court with and without a trial and the percentage of cases handled in each category. Fiscal Research used this data to calculate a weighted average of IDS costs. In FY 2011-12, 74% of Class F cases were handled through IDS. The weighted average cost of a new Class F is \$497 per case for a private appointed counsel (PAC) attorney. This estimate assumes the appointment of a PAC attorney. In districts that have Public Defender offices, cases may be handled by those offices. In those instances, this cost may not be incurred.

**Department of Public Safety –Prison Section**

The chart below depicts the projected inmate population relative to available prison bed capacity system-wide. Capacity projections assume operation at Expanded Operating Capacity,<sup>1</sup> and represent the total number of beds in operation, or authorized for construction or operation as of December 2014.

Based on the most recent population projections and estimated bed capacity, there are surplus prison beds available for the five-year fiscal note horizon and beyond. Therefore, no additional beds will be required unless the projected number of additional inmates resulting from a bill (row four) exceeds the projected number of beds under the inmate population (row three).

Since the bill creates a new offense, the Sentencing Commission does not have any historical data from which to estimate the impact of this bill on the prison population. It is not known how many beds may be required as a result of this bill.

<b>Population Projections and Bed Capacity Five Year Impact</b>					
	<b>June 30 2016</b>	<b>June 30 2017</b>	<b>June 30 2018</b>	<b>June 30 2019</b>	<b>June 30 2020</b>
1. Inmates <sup>2</sup>	37,360	37,522	37,348	37,462	37,610
2. Prison Beds (Expanded Capacity)	38,749	38,749	38,749	38,749	38,749
3. Beds Over/(Under) Inmate Population	1,389	1,227	1,401	1,287	1,139
<b>4. Additional Inmates Due to this Bill<sup>3</sup></b>	<b>No estimate available</b>				
<b>5. Additional Beds Required</b>					

In addition to the capital costs that may be associated with additional bed needs, there are also per diem costs for housing inmates. The cost to add one additional inmate to the prison system is \$11.53 per day, or \$351 per month, which includes the cost of food, clothing, and health care. In FY 2013-14, 51% of Class F felony offenders received active sentences averaging 17 months. For every one Class F felony offender receiving an active sentence, the cost to the prison section will be \$5,967 (\$351 monthly cost times 17 months equals \$5,967).

**Department of Public Safety – Community Correction Section**

All active sentences for felony offenses now result in a minimum of twelve months of post-release supervision (PRS) for B1-E level offenses and a minimum of nine months of PRS for F-I level offenses. Additionally, for felony offense classes E through I offenders may be given non-active (intermediate or

<sup>1</sup> Expanded Operating Capacity (EOC) is: 1) the number of single cells housing one inmate, 2) the number of single cells housing two inmates, and 3) the number of beds in dormitories, allowing between 35 (130% of Standard Operating Capacity) and 50 (SOC) square feet per inmate.

<sup>2</sup> The Sentencing and Policy Advisory Commission prepares inmate population projections annually. These projections are derived from: historical information on incarceration and release rates under Structured Sentencing; crime rate forecasts by a technical advisory group; probation and offender revocation rates; and the decline (parole and max-outs) of the stock prison population sentenced under prior sentencing acts. Projections were updated in February 2015.

<sup>3</sup> Criminal penalty bills effective December 1, 2015 should not affect prison population and bed needs until FY 2016-17 due to the lag time between offense charge and sentencing - six months on average. No delayed effect is presumed for the Court System.

community) sentences exclusively, or in conjunction with imprisonment (split-sentence). Sanctions include electronic house arrest, community service, substance abuse treatment, participation in educational or vocational skills development, payment of court costs, fines, and restitution, and short-term jail sentences not exceeding six days per month.

JRA essentially eliminated the distinction between “community” and “intermediate” supervision. Under structured sentencing, the two types of supervision were each defined by a set of specific sanctions. Under JRA, both community and intermediate probation may now include electronic monitoring, short-term periods of confinement, substance abuse assessment, monitoring, and treatment, participation in educational programs or vocational skills development. Whether a probationer is subject to more stringent conditions is determined by the results of a risk-needs assessment administered by the Department of Public Safety.

All types of post-release supervision are supervised by the Community Corrections Section (CCS); CCS also oversees community service. Supervision by a probation officer costs \$130.50 per offender, per month; no cost is assumed for those receiving unsupervised probation, or who are only ordered to pay fines, fees, or restitution. Total costs are based on average supervision length and the percentage of offenders (per offense class) sentenced to active sentences requiring post-release supervision and supervised probations.

In FY 2013-14, 51% of Class F felony offenders received active sentences; 49% received probation. All active sentences result in 9 months of post-release supervision (PRS). The average length of probation imposed for this offense class was 32 months. Therefore, at a minimum, one conviction resulting from Sections three or six of this bill will require at least nine months of supervision. The cost of nine months of supervision is \$1,174 per offender (\$130.50 per month times 9 months).<sup>4</sup> For every offender sentenced to probation, the average cost would be \$4,176 (\$130.50 per month times 32 months).

<sup>4</sup> Due to the effective date of December 1, 2015 and the typical lag time between charge and conviction (6 months), little impact is assumed for CCS in FY 2015-16. Though some offenders may come under CCS supervision during this time, this note assumes an even entry over the course of FY 2016-17.
