   III. Facilities

III. Medicaid

IV. NCSL Resources

Presentation Overview
Strengthening the Legislative Institution
How NCSL Strengthens Legislatures

**Policy Research**
NCSL provides trusted, nonpartisan policy research and analysis

**Connections**
NCSL links legislators and staff with each other and with experts

**Training**
NCSL delivers training tailored specifically for legislators and staff

**State Voice in D.C.**
NCSL represents and advocates on behalf of states on Capitol Hill

**Meetings**
NCSL meetings facilitate information exchange and policy discussions

Workforce Shortages

- Shortage designations, like HPSAs, identify an area, population, or facility experiencing a shortage of health care services.
- HPSAs have a shortage of primary, dental or mental health care providers.
- Three scoring criteria are common across all HPSA disciplines:
  - Population-to-provider ratio
  - Percent of population below 100% of the Federal Poverty Level (FPL)
  - Travel time to the nearest source of care outside the HPSA designation area
State Policy Options: Scope of Practice

Modifying Practice Agreements
- Collaborative agreements
- Location of the physician and NP/PA
- Number of practitioners supervised by a physician

NCSL’s Scope of Practice Policy Website
- Nine provider types
- 21 policy areas
- Legislative database (2015-Present)
Practice Requirements: Physician Assistants

Existing Requirements

Under COVID

- Supervision determined at practice level
- Supervision determined by the State Medical Board or Law
- Information is not currently available

- Suspension/waiver of supervision requirements by Executive Order
- Suspension/waiver of all or partial supervision requirements by existing statute or regulation
- Only suspension/waiver of select practice requirements (licensure, ratios, telemedicine, etc.)
- No emergency provisions in effect

Source: NCSL, www.scopeofpracticepolicy.org

Source: American Academy of PAs
Practice Requirements: Nurse Practitioners

Existing Requirements

- Full independent practice authority
- Transition to independent practice period required
- Physician relationship required

Under COVID

- Executive Orders Expired
- Temporary suspension of all practice agreement requirements
- Temporary waiver of select practice agreement requirements
- Currently no action on this issue
- Full Practice Authority States

State Policy Options: Recruitment and Retention

Tax Credits and Federal Funding

- **Louisiana**: Small Town Health Professionals Credit
- **New Mexico**: Rural Health Professional Tax Credit
- **Maine**: Maine Health Care Provider Loan Repayment Program Fund
- **Massachusetts**: Funding for pandemic response and recovery efforts

Loan Forgiveness

- **Kansas**: Loan repayment to primary care and psychiatry residents
- **Minnesota**: Loan forgiveness for primary care providers in rural areas
- **Utah**: Provides educational loan repayment assistance to behavioral health professionals in HPSAs

Training, Development and Licensure

- **Hawaii**: Short-term training at University of Hawaii community colleges in recession-resistant fields
- **Kentucky**: Authorized the board of medical licensure, board of EMS and board of nursing to reactivate the licenses of inactive and retired health care providers
- **Vermont**: Retired residents with expired licenses to return to the workforce in a state of emergency
State Policy Options: Career Pathways

Pathways

- **Colorado**: Developed career pathways for counseling, therapy, social work, psychology, psychiatry and psychiatric nursing professions.

- **Washington**: Appropriated $1.5 million to establish apprenticeship programs, compensate providers and apprentices, develop on-the-job training and provide incentives for providers.

Residencies

- **Iowa**: Required psychiatry residency programs to provide rural rotations as an option for residents.

- **New Jersey**: Appropriated $4 million for 10 four-year psychiatry residencies focused on the treatment of lower income individuals, including those with serious mental illness and co-occurring mental health and substance misuse conditions.
State Telehealth Policy Levers

- Medicaid
- Private Insurance
- Cross State Licensing
- Telehealth Modalities
- Authorized Telehealth Providers
- Authorized Services for Telehealth
- Site Restrictions
- Teleprescribing
- Patient-Provider Relationship
- And more!

Interstate Licensure Compacts

**Active Compacts**
- Physicians
- Nurses
- Physical Therapists
- Psychologists
- Audiologists and Speech Pathologists
- Emergency Medical Personnel

**Not Yet Active**
- Occupational Therapists
- Licensed Counselors

**Bolded** providers means North Carolina has enacted legislation to join that provider compact.
Rural Hospital Closures by State: 2005 – Present

State Policy Options for Rural Health Care Facilities

1. Payment Reforms and Other Funding Opportunities
   - Alternative payment models and using state and federal funds for rural hospital initiatives

2. Other Health Facilities
   - Community health centers, rural health clinics, etc.

3. Medicaid
   - Coverage and eligibility

Note: Three states do not officially maintain CON oversight, but they maintain approval processes that function similarly to CON.

Certificate of Need Legislative Examples

Substantial Reforms
- **Florida** and **Montana** enacted legislation limiting CON oversight to just long-term care facilities.

Targeted Modifications
- **Washington** enacted legislation exempting rural health clinics in home health shortage areas from CON review.

Additional Requirements
- **Illinois** enacted legislation requiring health facilities to seek CON approval prior to closing a facility.
Health Insurance Coverage of the Total Population

**North Carolina**
- Employer: 47%
- Non-Group: 5%
- Medicaid/CHIP: 17%
- Medicare: 16%
- Other Public: 4%
- Uninsured: 10%

**National**
- Employer: 50%
- Non-Group: 6%
- Medicaid/CHIP: 18%
- Medicare: 16%
- Other Public: 2%
- Uninsured: 9%

Presentation Overview

Medicaid Expansion
Managed Care
Home and Community-Based Services
Behavioral Health
Medicaid Expansion Adoption Status

- **Adopted Expansion**
- **Not Adopted**
Medicaid Expansion: 1115 Waiver Strategies

Premium Assistance

- State pays premiums for coverage purchased on the marketplace
- Medicaid provides “wrap around” services for items not covered under private plans
- Arkansas saw increased access to providers through this model compared to regular Medicaid

Health Savings Accounts (HSAs)

- Medicaid clients contribute to savings accounts to purchase like dental and vision services
- Arkansas implemented a new program for HSAs, but ended the program due to difficulties collecting fees
- Indiana leveraged its managed care organizations to collect fees and provide education

Healthy Behavior Strategies

- Arkansas provides additional benefits, like dental care, for people who see their primary care physician one per year
- Arizona reduced cost sharing to incentivize more use of preventive services
- States self-report that these strategies are successful aspects of their 1115 waivers
States were charging regular premiums to access services. Centers for Medicare & Medicaid Services (CMS) is moving to phase out premiums.

Several states had work requirements previously approved. Some were struck down in court.

CMS has rescinded approvals for work requirements and this issue will go back to the courts.
Medicaid Expansion Outcomes

State Budget Impacts

- State budget impacts were minimal – vast majority of increased spending for expansion came from federal funds.
- Increased funding allowed some states to reallocate funds to address other priorities. No significant cuts to areas like education or corrections.
- Most analysis is pre-COVID, so additional analysis is needed to see what impact COVID had on state spending for expansion.

State-only Program Savings

- States saw savings by moving individuals from state-only funded programs to Medicaid.
- Savings were seen in:
  - Corrections
  - Behavioral health programs
  - Health programs for older adults and people with disabilities

Medicaid Expansion Outcomes

Access and Health Outcomes

- Increased access by provided coverage and helped narrow coverage gap between urban and rural residents
- Increases in access to substance use treatment services
- Earlier detection and treatment for cancer, reducing mortality rates

Provider Impacts

- Decreased the amount of uncompensated care provided by hospitals and other providers
- Helps financial stability of hospitals, particularly in rural areas
- Many providers and managed care organizations were able to increase capacity
- There remain provider shortages and expansion may have increased waiting times for some services
Medicaid Expansion Opportunity in American Rescue Plan Act (ARPA)

ARPA provides an additional 5% federal funding for states choosing to expand.

Current North Carolina matching rate is 73.85%.

Potential increased federal funding could range from $1.5B to $2B.
Postpartum Coverage Option

Source: Medicaid Postpartum Extension Tracker (KFF)
Increasing Access through Managed Care Organizations (MCOs)

**Special Populations**
States are working to integrate special populations into MCOs

**Services**
States integrating services like behavioral and physical health

**Social Determinants**
Over half the states are integrating social determinants of health
Home and Community-Based Services (HCBS)

Home and Community Based Services (HCBS) Funding Opportunities in ARPA

• Increases federal funding for HCBS by 10% to enhance and strengthen HCBS

• HCBS services eligibility for the increased federal funding include:
  • HCBS waiver services
  • Home Health
  • Programs of All-Inclusive Care for the Elderly (PACE)
  • Rehabilitative and behavioral health services

HCBS Spending Plans

• One-time provider rate increases and wage pass throughs

• Workforce development and other supports

• Telehealth and supporting technology

• Caregiver supports
Behavioral Health Crisis Response

Ensure trained behavioral professionals respond to crisis situations

American Rescue Plan Act (ARPA) provides an incentive for mobile crisis intervention services

Establish specialized settings for crisis response including crisis diversion or stabilization centers
Behavioral Health Workforce

- Provide resources and technical assistance to help providers fully participate in Medicaid
- Ensure adequate reimbursement rates for substance use treatment services
- Expanding use of non-licensed providers such as peer counselors
