DPR	Parks & Recreation	F12AP00589	Hydrologic Monitoring	\$180,000.00	US FISH & WILDLIFE	1280	2972	Active	07/01/2012	01/01/2017	N		Per Jon Blanchard (the administrator of this grant and associated contracts), the purpose of the grant is to restore hydrology on Dismal State Park Land. The siting study and design are completed for two water control structures. Two years of pre-construction vegetation and water sampling are completed. The stratigraphy analysis part was dropped because the DWQ program that was to do the drilling was eliminated; however, we are able to complete the project without the stratigraphy and we have made US Fish & Wildlife aware of this fact and they have informed us it will not affect our grant funding.

Division of Water Resources													
DWR	Water Resources	F 004296-14	State Public Water Supervision	\$628,944.00	US EPA	1490	4904	Active	10/01/2014	09/30/2015	Y	157,236.00	This is partial funding for current fiscal year. These funds are awarded to assist the State in implementing federal drinking water regulations. Requires that staff develop and maintain a water system inventory database and perform compliance and enforcement of Safe Drinking Water regulations.
DWR	Water Resources	C 9994657-12	NonPoint Source Implementation	\$3,645,000.00	US EPA	1720	7224	Active	10/01/2011	12/31/2016	Y	3,069,116.00	Requires the implementation of programs and projects designed to reduce nonpoint source pollution to achieve and maintain beneficial use of water. Requirements include technical and financial assistance, education, training, technology transfer, demonstration projects and programs to monitor and assess projects related to controlling nonpoint source pollution. The majority of these funds are required to be pass-through funds for financial assistance.
DWR	Water Resources	CD 00D013-12	Regional Wetlands	\$272,408.00	US EPA	1725	7279	Active	01/01/2013	06/30/2016	Y	90,803.00	Requires the establishment of a Wetland Monitoring Network in the Coastal Plain and Piedmont regions of NC. This data is to provide valuable information on the condition of wetlands and help support 401 Certification decisions when issuing 401 Certifications for artificial impoundments.
DWR	Water Resources	CD 00D015-12	Regional Wetlands	\$258,651.00	US EPA	1725	7278	Active	10/01/2012	09/30/2015	Y	82,500.00	Requires the development of wetland mitigation success criteria that will promote improved biotic integrity in mitigation wetlands. The project must evaluate the effect of restoration techniques intended to improve habitat for aquatic biota, with a goal of determining whether these techniques can be successfully implemented in wetland mitigation projects.
DWR	Water Resources	I 00D041-12	Water Pollution Control Program	\$325,300.00	US EPA	1690	6928	Active	10/01/2012	09/30/2015	N		Funds awarded to assist in the administration of programs for the prevention, reduction and elimination of water pollution through the enhancement in data sharing and management systems, statistically valid assessments of waters, improvements in monitoring equipment and laboratory services, enhancements to biological monitoring to support the development of water quality criteria and training for staff.
DWR	Water Resources	I 00D20714	Water Pollution Control Program	\$160,000.00	US EPA	1690	6922	Active	10/01/2014	09/30/2016	N		Supplemental funds from the Clean Water Act Section 106 funding awarded to support the enhancement of the State's monitoring program in an effort to report on overall conditions, and obtain the needed water quality information to manage State waters. The monitoring program supports the State's efforts in the prevention, reduction and elimination of water pollution.
DWR	Water Resources	I 00D20814	Water Pollution Control Program	\$175,000.00	US EPA	1690	6930	Active	10/01/2014	09/30/2016	N		Supplemental funds from the Clean Water Act Section 106 funding awarded to support the water quality monitoring programs through the use of statistical surveys, improving data management systems, enhancing biological monitoring efforts, expanding monitoring networks, monitoring new water types and/or obtaining monitoring equipment and laboratory services.

	DWR	Water Resources	I 954717-11	Water Pollution Control - State	\$24,826,269.00	US EPA	1690	6902	Active	10/01/2010	09/30/2015	Y	9,301,565.00	These funds are for the implementing the Clean Water Act Section 106 program for the surface water program. Requires the establishing and maintaining adequate measures for the prevention, reduction and elimination of water pollution and to protect the quality of rivers, lakes and streams on a watershed basis and protect coastal and ocean waters.
	DWR	Water Resources	I 954717-15	Water Pollution Control - State	\$1,294,022.00	US EPA	1690	6902	Active	10/01/2014	09/30/2017	Y	see above	These funds are for the implementing the Clean Water Act Section 106 program for the surface water program. Requires the establishing and maintaining adequate measures for the prevention, reduction and elimination of water pollution and to protect the quality of rivers, lakes and streams on a watershed basis and protect coastal and ocean waters.
	DWR	Water Resources	C 6004771-11	Water Quality Management Plan	\$1,427,804.00	US EPA	1710	7102	Active	10/01/2010	09/30/2015	N		Awarded for water quality improvement activities designed to develop analytical modeling tools for performing resource assessments of assimilative capacity of selected watersheds, streams, rivers and lakes to further enhance the initial work done in support of the Water Councils. The Basinwide Water Quality Management Initiative includes support of watershed restoration projects and support of the pass-through funding (40%) and administration of the grant.
	DWR	Water Resources	C 6004771-15	Water Quality Management Plan	\$100,000.00	US EPA	1710	7102	Active	10/01/2014	09/30/2015	N		Awarded for water quality improvement activities designed to develop analytical modeling tools for performing resource assessments of assimilative capacity of selected watersheds, streams, rivers and lakes to further enhance the initial work done in support of the Water Councils. The Basinwide Water Quality Management Initiative includes support of watershed restoration projects and support of the pass-through funding (40%) and administration of the grant.

Deliverables are generally due quarterly and consist of 3 or 4 forms/narratives that document the grant funds are being spent consistently with the goals/categories described in the grant application. Our state program goals align closely with those of the National Dam Safety Program (plan review, regular dam inspections, condition assessments, dam owner outreach & education, emergency planning). Therefore, outside of the quarterly reports, few additional actions are required as a result of accepting the grant.

DAQ	XA 954957-12	Clean Air Act Section 103 - Nitrogen Dioxide Monitoring	\$200,000	EPA	1770	7725	Active	07/01/2012	12/31/2014	N		Funding provided by the EPA to help the state meet federal nitrogen dioxide monitoring requirements. Programmatic conditions include: DAQ required to install and operate a near-road nitrogen dioxide monitoring site in RTP, NC. Began operation in 2014.	
DAQ	A 004060-10	Clean Air Act Section 105 - Air Pollution Program Support	\$4,473,382	EPA	1770	7703	Active	10/01/2014	09/30/2016	Y	18,430,854	Support ongoing program to protect air quality so that it achieves established ambient air quality standards and protects human health. Programmatic conditions include: EPA sets forth expectations in an annual agreement; annual evaluation of performance; EPA review and approval of CAA requirements; and minimum matching share requirement.	The actual cost share portion for EPA is 19.53% because DAQ has an Maintenance of Effort requirement that we must meet as a condition of the grant. The amount of \$18,430,854 is both the state match and the MOE together over the 2-year grant cycle.
DAQ	PM 964968-08	Clean Air Action Section 103 - PM 2.5 Ambient Air Monitoring	\$4,744,500	EPA	1770	7708	Active	04/01/2008	03/31/2015	N		Continue ongoing collection of data on ambient air concentration of fine particulate matter. Programmatic conditions include: Collection of quality assured ambient air data, primarily fine particulate matter and its precursors, such that the data can be used for comparison to the national health based standards; development and tracking of air plans; and assessments of regional haze.	Currently processing new grant for this project
DAQ	XA 834927-01	EPA Energy Efficiency Grant	\$358,875	EPA	1770	7724	Active	03/01/2011	06/30/2015	N		This has been a multi-year project focused on assisting North Carolina facilities with increasing the efficiency of their operations while saving money and reducing air pollution. The project goals include: (1) Educating facilities about the interdependency between energy consumption, air emissions and energy costs; (2) encouraging facilities to take voluntary actions to reduce air emissions through implementing energy efficiency measures that have low pay back periods and reduce operating costs; and (3) educating and assisting facilities with multi-pollutant air emission calculations, including understanding the federal reporting requirements.	
DAQ	XA 954957-12	State Clean Diesel Grant	\$147,325	EPA	1770	7722	Active	10/01/2014	09/30/2015	Y	98,217.00	Designed to assist in the State's efforts to reduce emissions from diesel engines. This project will implement a rebate program for 6 Auxiliary Power Units (APUs) or diesel particulate filters on long haul trucks; and a repower/replacement program for nonroad and onroad engines. Programmatic conditions include: use of verified emission control technologies, quarterly reporting and environmental results, final project report.	EPA cost share = 60% or \$147,325. DAQ cost share = 40% or \$98,217.
